Yeas, 21. Nays, 39.

So the motion was not agreed to.

Mr. Potter

Moved to recommit the Resolution to the Committee on Surverys, with instructions to report as to the durability of a cast iron bridge, and the relative value of such a bridge with bridges built of other materials.

Which was agreed to.

Mr. Hacker

From the Committee on Finance, presented a Report with a Bill annexed, entitled, "Resolution to enter

satisfaction on the bond of Joseph Megary." (*See Appendix No. 2.*)

And moved to proceed to the second reading and consideration of the same.

Which was agreed to.

The Resolution was read and agreed to.

A Message was received from Select Council informing that they had received a Report from the Committee on Girard Estates, with "Resolution to authorize the appointment of two Attorneys at Law," which they had passed and ask concurrence.

Mr. Hacker

Moved to proceed to the second reading and consideration of the same.

Which was agreed to.

The Resolution was again read.

Mr. Wister

Moved to amend by striking out "two Attorneys at Law," and insert, "an Attorney at Law;" also, strike out the words, "take charge of," and insert, "to act in conjunction with the City Solicitor in."

The first amendment was not agreed to.

The second amendment was agreed to.

Mr. Dyer,

A Petition for gas lamps at Broad street and Township Line Road.

Which was referred to the Committee on Police.

Mr. Harmer

A Petition for gas lamps on Clapin street.

Which was referred to the Committee on Police.

Mr. Wister

Presented the following Protest, of which he gave notice at the last meeting.

The undersigned, a member of Common Council, protests against the passage of that part of the Ordinance fixing the tax rate for the year 1860, allowing 15 cents in the \$100, to those parts of the City which support their own poor, for the following reasons:

The Ordinance is based upon an appropriation of \$228,917 for poor purposes, which would leave a balance of not quite \$4,000 for further appropriation, to that Department.

This sum the undersigned believes to be entirely inadequate.

In 1855, the expenses of the Poor Departm't were	\$300,000
1856,       "       "       "       "	248,000
1857,       "       "       "       "	274,000
1859,       "       "       "       "	284,000

In other words, the average expenses have been about \$270,000 a year, and the smallest sum expended was \$248,000.

\$228,917 is the sum asked for, for the year 1860.

The present Guardians are new in the exercise of their duties, and are therefore extremely likely to decrease the sum required; and in practice it has been found that extra appropriations are always asked for and made, and extra appropriations for deficiencies in 1859, for about \$15,000, have been passed by this body, and will probably be passed finally.

All such appropriations will have to be added to the appropriation for 1860.

The undersigned, therefor, protests against the passage of the Ordinance, because it gives a false basis of taxation, and as a consequence, does injustice to those portions of the City supporting their own poor, because it unfairly diminishes their poor rate allowance for the year 1860.

WM. ROTCH WISTER.

Dr. Ward, on leave,

GEORGE W. GAMBLE, *Chairman*,  
JAMES PETERS,  
Dec. 15, 1859. A. MCINTYRE,

The following Message was received from the Mayor:

OFFICE OF THE MAYOR, }  
*Philadelphia, December 15, 1859.* }

*To the President and Members of the  
Common Council of the City of Philadelphia.*

GENTLEMEN:—The following Ordinances and Joint Resolutions have been approved and signed, viz:

On the 9th inst., "A Resolution releasing the sureties of W. V. McGrath, late City Treasurer."

On the 9th inst., "A Resolution authorizing the City Solicitor to satisfy a certain judgment."

On the 10th inst., "A Resolution relative to a transfer in the appropriation to the Board for drawing Jurors."

On the 10th inst., "A Resolution to release certain property of George C. Rickards, from the lien of a judgment."

On the 10th inst., "A Resolution authorizing the Commissioner of Market Houses to advertise for proposals."

On the 10th inst., "An Ordinance making an appropriation for building Market Sheds at the end of certain Markets."

On the 10th inst., "An Ordinance to authorize a Loan to redeem the Funded Debt of the City maturing in 1860."

On the 10th inst., "An Ordinance to establish a Satur-

day Night Market in the Market Houses at Broad and Race streets."

On the 10th inst., "A Resolution to authorize the Commissioner of Market Houses to make an abatement of certain rent."

On the 13th inst., "A Resolution removing the suspension of the Hope Engine and the Marion and America Hose Companies."

I have also signed—

On the 14th inst., "An Ordinance to levy and fix the rate of Taxes for the year 1860, having been unable to discern any constitutional objections that would warrant the withholding of my signature therefrom.

The adoption of a tax rate before the annual appropriation, or at least the more important of them, have been determined, does not allow to the Mayor the exercise of that careful consideration which should precede his official approval, whilst at the same time, he may not assume that Councils will in such appropriations, exceed the revenue reasonably to be looked for from the proposed tax rate and other municipal income. I feel it incumbent upon me to recommend a careful scrutiny into the amount and value of the assets of the city in the nature of registered taxes which have probably been over estimated in the apprehension of Councils, and also the utmost economy in the annual appropriation, consistent with the true interests of the City.

Respectfully,

ALEXANDER HENRY,

*Mayor of Philadelphia.*

A Message was received from Select Council, informing that they had concurred in the the following Bills:

"An Ordinance to make an appropriation to the Department of the City Controller, for the purposes therein stated."

Also, "Resolution discharging the Committee on Fi-

nance from the further consideration of the claim of Paul Labrousse."

Also, in the amendments of Common Council to the Bill entitled, "An Ordinance Supplementary to An Ordinance providing for a Committee on Printing, Stationery, and Supplies."

Also, that they have passed a Bill, entitled, "A Supplement to the various Ordinances organizing the different Departments of the City of Philadelphia."

Mr. Eldridge

Moved to adjourn.

Which was agreed to.

zell, Justice, Lare, Laning, Loughlin, Miller, Quinn, Thompson.

Yeas, 54. Nays, 12.

So the Bill passed finally.

Protest of Mr. A. Miller and others against the Ordinance just passed :

The undersigned respectfully submit and enter upon the Journal of Common Council the following reasons for voting against the passage of the "Ordinance selecting an area of ground to be laid out and maintained forever as an open public place, for the health and enjoyment of the people, and also to preserve the purity of the Schuylkill water at Fairmount."

1. The 4th Section of the Act of Assembly, approved May 13, 1857, under which it is proposed to take the plot of ground described in the Ordinance, is in the following words :

"That the Councils of said City, whenever they shall select any square, or other area of ground, to be laid out and maintained forever as an open public place or park, for the health and enjoyment of the people, shall have the power, if they cannot agree with the owner or owners thereof as to the price, to cause a petition to be filed in the Court of Quarter Sessions of the City and County of Philadelphia, on behalf of said City, setting forth, by proper metes and bounds, the grounds so selected, and that by ordinance the said Councils have appropriated the same for said purpose ; whereupon the said court shall appoint a jury to assess the damages in the manner now provided by law, and the proceedings thereupon shall be the same, and with the like effect, as upon the assessment of damages for the opening of streets in said city."

From the language of this law it is very clear that when this ordinance has passed both branches, and been approved by the Mayor, the land described in it is selected and appropriated by the City as and "for an open public place or park," and having taken the land, the City must pay for it whatever sum of money may be assessed by a jury, and confirmed by the court, and after the lapse of a year from the confirmation of the report of the jury, the

owner of the land may sue the City for the amount. There can be no giving up of the land after it has been once selected and taken by the City.

2. The land proposed to be taken contains about four acres, part of which is under water, and no part of it is over five feet above the water of Fairmount dam. The whole of it has been made by filling in the dirt and cfil of the neighborhood, and a large portion of it is yet a quagmire. None of it is fit for the purposes of a park, and cannot be used as such until it is filled up.

3. Lemon Hill, containing about 45 acres, was purchased for \$70,000, being about \$1,450 an acre. Sedgley, containing about 33 acres, was put upon the City at \$125,000, being \$3,787 per acre, about four times its true value. The land in question, containing 4 acres, the Ordinance proposes to give \$25,000 for, which is \$6,250 per acre. The owners say it is worth \$60,000, and they desire the City will not trouble them about it.

If the jury assess the damages at the price the owners have put upon it, which it is highly probable they will, and the court confirms their award, then this land will be put upon the City at \$15,000 an acre. And where the City has already over one hundred acres of land suited to the purpose devoted to public use as a park, is it not a shameful waste of the money of the tax-payers of Philadelphia to give, or to put the City in a position where she may be compelled to give, sixty-thousand dollars for four acres of quagmire?

4. The idea that this land must be taken for public use, in order to preserve the purity of the Schuylkill water, is sheer nonsense. There is two water courses passing through it into Fairmount dam; one of which—perhaps both—must be kept open for the accommodation of the adjoining property. All of the hill side between Landing Avenue and the Railroad, containing from ten to fifteen acres, is nearly filled with houses, the ofal from which has no other way to pass but into Fairmount dam; yet it is not pretended that this land, or these houses, do any injury to the water. The four acres of land proposed to be taken is made ground, and for that reason cannot be built upon, and it is so low that every flood in the Schuylkill over-

flows it. The idea, therefore, that if this land is left in the hands of its present owners it will impair the purity of the Schuylkill water is a fallacy.

5. This idea of preserving the purity of the Schuylkill water is a great favorite with every band of speculators in land along the margin of the Schuylkill, from Fairmount dam to Manayunk. It is the Syren song, whereby they are enabled to deplete the City Treasury, and fill their own coffers, so that they may live in luxurious indolence upon money wrongfully taken from the tax payers of Philadelphia.

The water used by the people of Philadelphia is the purest in the world. It needs no change, and least of all such change as the land speculators would bring us.

6. The whole scheme bears upon its face evidence of a job whereby sixty thousand dollars will be drained from the tax payers of Philadelphia, and passed into either the already plethoric coffers of some real estate owners, or some hungry real estate jobbers or agents. Let the people look to their Councilmen.

Their monies are being squandered to enrich land owners and land agents.

Mr. Wm. B. Thomas

On leave, offered the following: RESOLUTION

Dissenting from the action of the Board of Direction of the Pennsylvania Railroad company, relative to a terminus of said Railroad.

*Resolved*, By the Select and Common Councils of the City of Philadelphia, That the action of the Board of Directors of the Pennsylvania Railroad, on Wednesday, fixing the terminus of their road, is in the opinion of this Council, an effort to forestall their action, and therefor meets our decided disapproval.

Mr. Quinn

Moved that the Resolution be referred to the Special Committee which has the matter in charge.

Which was not agreed to.

On the final passage of the Resolution, the yeas and nays were demanded by Messrs. Wister and Leigh.

And being ordered, were as follows :

YEAS:—Messrs. Bassler, Brooke, Case, Craig, Dennis, Dorlan, Dyer, Eckfeldt, Eldridge, Foust, Foulon, Gamble, Harper, Haas, Hodgdon, Hunter, Ihrie, Justice, Kerr, Laning, Malone, Manuel, Oat, O'Neill, Randolph, Sites, Stratton, Summers, Thomas Wm. B., Warner, Watson, Trego, *President*.

NAYS:—Messrs. Baird, Bobb, Cattell, Creswell, Dunk, Hazell, Heins, Houseman, Kelch, Layer, Leigh, Loughlin, McClean, Miller, Potter, Quinn, Riley, Stewart, Thomas D. G., Thompson, Tyson, Waite, Wister.

Yeas, 32. Nays, 23.

So the Resolution was agreed to.

A Message was received from Select Council, informing that they had passed a “ Resolution to transfer a part of a certain Item, and to pay Lewis Williams for extra service.”

The First Resolution was read and agreed to.

The Second Resolution was read and agreed to.

A Message was received from Select Council, informing that they have passed “ Resolution relative to the repeal of a portion of the Resolution entitled, ‘ Resolution relative to publishing names of delinquent tax payers, &c., approved Dec. 23, 1859.’ ”

The Resolution was read and agreed to.

The Mayor's Clerk was introduced, and presented a Message from the Mayor in writing.

On the 12th inst., "An Ordinance to pay the claims of Wm. H. Engard, and others."

Respectfully,

ALEXANDER HENRY,

*Mayor of Philadelphia.*

Also, a Message in writing, returning, with his objections, the Bill entitled, "An Ordinance selecting an area of ground, to be laid out and maintained forever, as an open public place, for the health and enjoyment of the people."

OFFICE OF THE MAYOR, }  
*Philadelphia, January 12, 1860.* }

*To the President and Members of the  
Common Council of the City of Philadelphia.*

GENTLEMEN:—I return without my approval, the Ordinance entitled, "An Ordinance selecting an area of ground, to be laid out and maintained forever, as an open public place, for the health and enjoyment of the people, and also to preserve the purity of the Schuylkill water, at Fairmount," for the following reasons:

The Second Section of this Ordinance assigns to the Mayor the duty of negotiating, on behalf of the City of Philadelphia, with the owner or owners of the piece of ground designed to be appropriated, without specifying who such owner or owners may be—thus imposing upon him a preliminary inquiry of title, that does not pertain to his office.

The power given to the Mayor in the same Section, to agree with said owner or owners, relative to the price of such property, is, by the paramount Act of Assembly of May 13, 1857, required to be exercised by Councils; and under the strict construction always given by the judiciary to legislative enactments divesting the rights of citizens, it is certain that any other than the most exact compliance with the requisites of this Act, will be deemed invalid. Besides these objections, I entertain the opinion that *the right of eminent domain*, which is to be exercised under the provisions of this Ordinance, should never be resorted to but in cases of extreme public necessity, where the safety and health of the community absolutely demand it.

Although the existence of this right can not be denied, nor the power of the Supreme Legislature of the State to delegate its exercise by special enactments to municipal or other corporations, yet it is none the less repugnant to a sense of equity where it is resorted to under unusual circumstances.

The growth of a city may demand the occupancy of portions of adjacent districts, for the laying out or widening of streets and avenues—and such demand must be complied with, although private convenience and cherished rights be thus destroyed.

In the present instance it is well known that the estimate placed by the owners upon their property, far exceeds the price to which the Mayor is limited in the offer for its purchase, and perhaps may exceed the damages that would be assessed by a jury.

If the owners of this ground are unwilling to part with it, and do not make use of it for purposes affecting the health or safety of the community, should their legal rights be divested to gratify the fancy that demands a continuous extent of ornamented park—a fancy commendable under other circumstances. Will it hereafter prove a pleasing reminiscence or the source of proper pride, that the beauty and extent of the park, which is to offer health and recreation to future generations, has only been compassed through the wrongs of individual citizens.

Respectfully,

ALEXANDER HENRY,  
*Mayor of Philadelphia.*

On leave, offered the following: RESOLUTION

Relative to the incorporation of Passenger Railway Companies.

*Whereas*, Many applications have been made to the present Legislature of this State for the incorporation of Companies for the construction of Passenger Railways on the few principal streets of this city, which are not already so occupied; and,

*Whereas*, The Passenger Railways now constructed furnish speedy and convenient access to all parts of the city, rendering the construction of additional Railways unnecessary.—therefore,

*Resolved*, By the Select and Common Councils of the City of Philadelphia, That we respectfully but earnestly request our Senators and Representatives at Harrisburg to oppose the incorporation of any more Passenger Railway Companies, or the extension of the rights, privileges, or powers of the Passenger Railway Companies now incorporated, without the proviso inserted in all such original bills or supplements, that, before they become operative, they shall become subject to the approval of Councils and the sanction of the Mayor upon an application made in writing, and presented to Councils. And, also,

*Resolved*, That the above Preamble and Resolution be printed, and copies thereof sent to the Governor of the State, and to the members of both branches of the Legislature, inviting their attention and efforts to resist any attempt to force upon us any local legislation so unnecessary and obnoxious as that proposed.

Mr. Wm. B. Thomas

Moved to strike out all after the word "Resolution," and insert the following:

"*Resolved*, By the Select and Common Councils of the City of Philadelphia, That the honorable the Senate and House of Representatives of the Commonwealth of Pennsylvania be and they are hereby respectfully requested to attach to all acts or bills effecting the interest of the city of Philadelphia alone, especially such as provide for the incorporation of City Passenger Railroads, or that otherwise interfere with the streets or public highways of the city, a proviso, as a condition precedent to their becoming operative as laws of the State, that they receive the sanction of the City Councils of Philadelphia.

*Resolved*, That the clerks of Councils are hereby instructed to forward to the Governor and to each member of the Senate and House of Representatives a copy of the foregoing Resolutions.

Mr. Wister

Moved to postpone the further consideration for the present.

Which was not agreed to.

Mr. Bullock

Moved to add the following:

"And also that such Railway Companies shall be subject to all such laws and ordinances of Philadelphia, for the regulation of Passenger Railways and the care and management of the streets and highways of said city, which may now be in force, or which may hereafter be passed by said City."

Which was agreed to.

Mr. Dyer

OFFICE OF THE MAYOR, }  
February 9th, 1860. }

*To the President and Members of the  
Common Council of the City of Philadelphia.*

GENTLEMEN:—The following Ordinances and Joint Resolutions have been approved and signed, viz:

On the 27th ult., "A Resolution removing the suspension of the Philadelphia Hose and Steam Fire Engine Company."

On the 28th ult., "An Ordinance authorizing the Committee on City Property to designate a location for the Skaters Club House."

On the 7th inst., "A Resolution to release the surities of John Tibbin."

On the 9th inst., "An Ordinance to make an appropriation to the Department of Poor, to pay for the deficiencies for the years 1858 and 1859."

On the 9th inst., "On Ordinance to make an appropriation to the Trustees of the City Ice Boat for the year 1860."

Respectfully,

ALEXANDER HENRY,  
*Mayor of Philadelphia.*

Also, the following message:

OFFICE OF THE MAYOR, }  
*February 9th, 1860.* }

*To the President and Members of the  
Common Council of the City of Philadelphia.*

GENTLEMEN:—I return without my signature "An Ordinance to make an appropriation to the Department of the City Commissioners for the year 1860." Objecting to to the 3rd Section thereof, appropriating the sum of one thousand four hundred and fifty-nine dollars and seventy cents, to pay for curbing, paving, and water pipe in front of the Episcopal Hospital lot, between Lehigh Avenue and Huntingdon street, on Front street.

Such appropriation would be virtually a contribution from the city treasury towards the maintenance of that Institution, obviating the expenditure of its funds that would otherwise be required in payment of the charges for municipal improvements.

The philanthropic and liberal aim of the Episcopal Hospital, the important aid it has already afforded to the sick and maimed among our fellow-citizens, and the inestimable benefits that it is destined to confer upon the community, justly place it in the front rank of the charities of Philadelphia, but I am unable to perceive that it has any claim upon the public revenue, either for direct gift or indirect assistance, that may not with equal propriety be urged by each and all of the other benevolent associations of this city.

The only legitimate plea for appropriating to an institution unconnected with the municipal government, any portion of the money raised by taxation, is that such appropriation will necessarily avail to the diminution of public expenses. This view has been recognized in the Act of Assembly, which authorizes annual donations to the Northern Home for Friendless Children, and to the Foster Home, by its proviso that "the Councils shall be satisfied that the amount so appropriated will eventually be saved by such

Institution to the tax payers of the county, in the education and maintenance of children who might become objects of public charge."

The "Union School and Children's Home" is entitled for this reason to assistance from the public treasury. The other Institutions authorized by special legislative enactments to apply for aid to the Councils of the City, are the House of Refuge, and the Rosine Association. The former of these is a necessary charge upon the city, but in the case of the Rosine, I have heretofore refused assent to the appropriation for its use.

If no other objection presented itself, the precedent thus set would be deemed sufficient reason for withholding my approval.

The distribution of public money to charitable Institutions at the pleasure of Councils, makes each tax payer the involuntary contributor to objects which cannot in all cases have his approbation. The increase of taxation for such purpose, however slight, is at variance with the true policy of government, which demands from the citizen only that portion of his means that shall be required to defray its legitimate and necessary expenses.

Respectfully,

ALEXANDER HENRY,  
*Mayor of Philadelphia.*

The Ordinance vetoed by the Mayor was again read  
The President

Stated the question to be, "Shall the Bill pass notwithstanding the objections of the Mayor."

The Yeas and Nays were ordered agreeable to law, and were as follows :

YEAS:—Messrs. Brooks, Leigh, Randolph, Riley, Warner.

WEDNESDAY, February 22, 1860.

Council met pursuant to adjournment, to celebrate the Birth-day of Washington.

At half past ten o'clock, Mr. Binney, accompanied by the Mayor of the City, Rev. Wm. J. R. Taylor, of the Third Dutch Reformed Church, the President, and members of Select Council, and other gentlemen, entered Common Council Chamber, escorted by the Committee of Arrangements.

The Mayor of the City was escorted to the Chair, with O. P. Cornman, President of Select Council, on his right, and Chas. B. Trego, President of Common Council, on his left.

The Rev. Mr. Taylor then offered a fervent prayer. We had come, he said, to express the national joy, to thank Almighty God for what he had done for this land and its people—for what is good in our history; to express gratitude for the indulgence that had been shown for our sins; gratitude for the Gospel, for the liberties secured to us by the wisdom, the courage, and the blood of our fathers—for the extension of the influence of the nation—for the great man whose birth-day we have assembled to celebrate; for his history, for his example, his influence, and the heritage he had left us, and for his Farewell Address. May we learn as a people its lessons of wisdom, patriotism, and righteousness. Will God secure to us this precious heritage? Will He save us from the influence of wicked men, and from unrighteous rulers? Bless the City, the Mayor and Councils, and all others in authority; bless our institutions of religion, of charity and benevolence. Bless commerce and industry; bless the President and his Cabinet; bless the Senate and Congress of the United States; bless the Governors and Legislatures of the States; bless the youth of the country; bless the churches. And may we continue in loving brotherhood never to be sundered by internal division, nor broken by foreign invasion. Spread abroad the principles of liberty, peace, and righteousness; bless the oppressed; bless those who have not the same privileges which we enjoy. We commend to Thee thy venerable servant who is here to perform the chief services of the

day ; may the lessons which he reads be sealed upon every heart, and make his hoary head a crown of glory, for Christ's sake. Amen.

After a brief pause, Mr. Binney arose at the desk of the President of the Chamber, and said :—

"Gentlemen of the Select and Common Councils of the City of Philadelphia, in obedience to your joint resolution, by which I am highly honored, I proceed to read to Councils the Farewell address of George Washington."

Mr. Binney then proceeded to read the address, a task which he performed with much feeling and earnestness. At the end of the reading, he said "Thus closes the noblest compend of the wisdom of the Father of his Country, and no words are fit to follow them."

After Mr. Binney and the other gentlemen, not members of Councils, had retired, the Councils organized in their respective chambers.

Common Council organized.

C. B. Trego, *President*, in the Chair.

A message was received from Select Council informing Common Council that they had passed a "Resolution of thanks to Hon. Horace Binney," in which they respectfully ask concurrence.

*Resolved*, By the Select and Common Councils of the City of Philadelphia, That the thanks of the City of Philadelphia are due to the Hon. Horace Binney, for his kindness in reading the Farewell Address of the illustrious Washington, to its assembled branches and heads of departments, this morning the 22d day of February, and that the best wishes of the City are tendered to Mr. Binney, that the declining years of a life so full of eminent usefulness and honor, may be crowned with enduring peacefulness and prosperity.

Mr. Hacker

Moved that Common Council concur.

The Resolution was read twice and unanimously adopted.

The President

Presented a communication from the Directors of the Sunbury and Erie Railroad Company, in relation to a memorial to the State Legislature.

Which was laid on the table.

Mr. Bullock,

On leave, offered the following Preamble and Resolution, entitled, "Resolution relative to the Bill for the Relief of the Sunbury and Erie Railroad Company.

*Whereas*, The City of Philadelphia is deeply interested in the speedy completion of the Sunbury and Erie Railroad, opening up to her as it will the trade and revenues of a

large portion of this State now lying dormant, as well as direct access to the immense business of the great lakes.

*And Whereas*, The City of Philadelphia is also largely interested as a stockholder in the said Company, as well as in contributing a large proportion of the taxes of the State, that the said Company should be able to complete their work without the danger of a sacrifice of the work held by the City and other stockholders, and the bonds held by the State, which must be the result of a sale of the work in its present unfinished state.

RESOLUTION relative to the Bill for the Relief of the Sunbury and Erie Railroad Company.

*Resolved*, By the Select and Common Councils of the City of Philadelphia, That the best interest of the City and the State would be subserved by the passage of the Bill now pending in the House of Representatives of Harrisburg, for the Relief of the Sunbury and Erie Railroad Company, and we recommend our Senators and Representatives in the Legislature, to give the same their earnest support.

The Resolution was read.

The Mayor's Clerk was introduced with a message in writing from the Mayor, in relation to the Sunbury and Erie Railroad Company. (*See Appendix No. 130.*)

##### REPORT OF THE COMMITTEE ON FINANCE.

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Finance, to whom was referred the claim of Robert D. Wilkinson, late Recorder of Deeds, for recording Ordinances and renewing old Indices in his Office, in the years 1856 and 1857, respectfully Report, That they have carefully examined the claim, and find it to be correct and legal. The charge for recording Ordinances from September 10, 1856, to Au-

gust 1, 1857, inclusive, has been compared with the fee bill, and found to be accurate and just. This charge amounts to \$801 37½.

The charge for renewing old Indices was founded upon an order of Court, and was made out agreeably to law. This charge amounts to \$291.

The Committee, therefore, Report the annexed Ordinance, and ask that it may be passed.

##### REPORT OF THE COMMITTEE ON PORT WARDENS, PUBLIC WHARVES AND LANDINGS.

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Port Wardens, Public

Wharves and Landings, beg leave to Report to Councils the necessity of some slight repairs to certain Wharves on the Schuylkill.

By Ordinance of Councils the public wharves are now leased by auction, and as the leases of some of the wharves spoken of will shortly expire, your Committee believes that better prices could be obtained, if the wharves were put in good order previous to the sale.

The Committee Report the annexed Ordinance and recommend its passage.

*To the Select and Common Councils  
Of the City of Philadelphia.*

GENTLEMEN:—The attention of the Committee on Port Wardens, Public Wharves and Landings, having been called to a Resolution reported by the former Committee to Coun-

cils, the consideration of which was at that time postponed, asking that an abatement of rent be made to the Philadelphia and Camden Steam Ferry Company, on account of Walnut street Wharf. Your Committee Report as the previous Committee Reported, that the Wharf during the last three months of the lease, was in a condition to be useless to the Company, and it would be but an act of justice to make the abatement asked for.

We therefore submit the annexed Resolution, and ask its adoption.

REPORT OF THE COMMITTEE ON FINANCE.

*To the President and Members of the Select and Common Councils of the City of Philadelphia.*

GENTLEMEN:—The Committee on Finance, to whom was referred a Resolution from Select Council to authorize the Receiver of Taxes to enter satisfaction on certain Registered Taxes against the Estate of Paul Labrousse, deceased, for 1855, respectfully Report, That they have examined the subject referred to them, and have ascertained that during the absence of Mr. Labrousse, in France, his Agent paid to the Tax Collector a small sum of money not to press the claim for taxes for that year, (1855) and that, in consequence of this arrangement, the taxes were registered agreeably to law. In May, 1857, the Agent paid the amount of these taxes, \$165. to C. McCormack, who had been appointed in 1855 to collect the taxes of 1854. McCormack gave a receipt, which was produced before the Committee, but he did not sign his name in any official capacity, or as a Collector for the City.

Under these circumstances the Committee are clearly of opinion that the claimant or estate is not entitled to any relief at this time. The City never received the Taxes, and this was the result of the arrangement between Mr. Labrousse's Agent, and the Tax Collector, and the subsequent payment to Mr. McCormack was equally irregular, and was made at the risk of the parties.

The Committee, therefore, Report the said Resolution, as committed, with a recommendation that it be negatived.

 REPORT OF THE COMMITTEE ON TRUSTS AND FIRE DEPARTMENT.
 

---

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Trusts and Fire Department asks leave to make the following Report, the 11th

Section of an Ordinance "Relative to the management of the Wills' Hospital, passed 26th of September 1833, by the Mayor, Aldermen and citizens of Philadelphia, *Provides*, that 'the managers are hereby authorized and requested to take such measures to increase the fund of the charitable institution either by donations, life or annual subscriptions, or such other means as they may deem most expedient.' "

And by an Ordinance "to provide for the care and management of the trusts vested in the Corporation of the City of Philadelphia, August 24, 1854," it is enacted by the 4th Section, that "the said Board of Managers shall direct and manage the said Hospital in conformity to the will of the late James Wills, and as directed by an Ordinance of the Select and Common Councils of the Corporation of the Mayor, Alderman and Citizens of Philadelphia, passed the 20th of September 1833, entitled an Ordinance relative to the management of the Wills' Hospital, except so much thereof as requires that their accounts shall be audited by a Committee of Councils, and the said Board of Managers shall have, possess, and exercise, all the powers and authority which by said Ordinance is conferred on the Managers therein mentioned."

At a meeting of the Committee on Trusts and Fire Department held at the Hospital, the Managers called the attention of the Committee to the subject of *increasing the fund*, by disposing of the property now occupied by the Hospital, which has now become every valuable, and purchasing another lot, and erecting buildings equally suitable, at a saving of fifty or sixty thousand dollars. After deliberate consideration the subject was referred to a Joint Special Committee consisting of four Managers and an equal number of the Committee.

And at a joint meeting of the Managers, and Committee on Trusts and Fire Department, held the 14th inst., the Joint Special Committee made the following Report: the Joint Special Committee to whom was referred the subject of changing the location of the Hospital, ask leave to make the following Report:

The Committee having enquired as to the value of the present property on Race Street, find that it is worth from 150 to 160 thousand dollars. They have also ascertained

that properties equally suitable could be purchased, and buildings erected, much better adapted to the purposes of the Charity, and effect a saving of at least fifty thousand dollars. The present building was erected many years ago, and is devoid of many of the modern improvements. If the location should not be changed, alterations and additions must be made at considerable expense. If more commodious accommodations can be obtained in lieu of the present building, and at the same time fifty thousand dollars be added to the fund, the Managers would be enabled to extend the benefits of this valuable Institution to many more of the objects of the charity. Although the Special Committee believe that the Managers have full authority to make the change suggested, they would nevertheless recommend that the approval of Councils be first obtained.

The Committee approve of the plan, believing that it will enable the Institution to bring within its fold, a larger number of patients.

WM. NEAL,

At a Joint Special Committee held November 14, 1859 at the Wills Hospital, the above report was accepted by both Committees.

Your Committee believing that much good would arise, by adding fifty thousand dollars to the Trust Fund, recommend the adoption of the following Resolution.

## REPORT OF THE COMMITTEE ON SURVEYS AND REGULATIONS

*To the President and Members of Select  
and Common Councils of the City of Philadelphia.*

GENTLEMEN:—Your Committee on Surveys and Regu-

lations, to whom was recommitted the Report and Resolution presented by them to the Chambers of date October 20, 1859, asking for further information upon the question of the comparative durability of Cast Iron Bridges, with reference to bridges constructed with other materials, herewith hand a Report upon that subject from the head of the Survey Department, presenting the matter in such light as to meet the views of the Committee; and we, therefore, present it to the Chamber as such.

The Committee have had submitted to them drawings of the Wearmouth Bridge, built in 1796, as also the Southwark Bridge, of date 1818, both having spans 55 feet longer than that proposed for the Chestnut Street Bridge, (being 240 feet, instead of 185 feet, as now projected,) and thus see that the general Plan is no experiment, but is sustained by practical evidence, in localities where the amount of travel exceeds greatly that for which the Plan under consideration is designed.

DEPARTMENT OF SURVEYS, }  
November 14, 1859. }

S. W. CATTELL, ESQ., *Chairman of Com. of Surveys* :

DEAR SIR:—In compliance with a Resolution of your Committee, asking for information relative to the durability of Cast Iron Bridges, and the relative value of the same with bridges constructed of other materials, I beg leave to state—That the only materials that are used for the construction of bridges, of the span and for the purposes of that now proposed for this City, are *Wood, Stone, (or Brick)* and *Iron*; the latter both exclusively *Cast* or *Wrought*, and in combination.

As regards the relative value of a Wooden Bridge, with one constructed of Cast Iron, there are several points

wherein the latter material may be considered to have the advantage. A wooden bridge is, in its character, perishable, and even if guarded with the most jealous care, has a period of durability that rarely exceeds 45 years of safe usefulness; and if so cared for as to preserve its frame work from decay its full life, it is continually subject to destruction, either from accident or design, as the application of a torch would soon place such a structure in entire ruin. Again, a wooden bridge, whether built as a *Truss* or an *Arch Bridge*, cannot possess that stability which will permit its free and unrestricted use as a public highway, and instance, as a case in point, our own Market street bridge—an arched truss—than which there is no firmer wooden bridge in existence; upon it the speed of travel is confined to a walk by Ordinance, and whenever the law is transgressed, a motion is at once observed, which, being distributed through every joint and timber of its frame work, cannot but act injuriously to the whole. Thus it is difficult to control, and reduces the value of structures, that would, from the scientific arrangement of their framing, last so long as the material endured, had they that *rigidity* and *stability* necessary to resist motion imparted by the passing load. This applies to any truss bridge, whether wood or iron, the latter having the advantage of the wood in being indestructible by fire; but in its elasticity, as composed of cast and wrought iron, the same movement in its parts must result from *unrestricted ordinary travel*, with the same injurious effect.

As iron truss bridges have been introduced only within the last fifteen or twenty years, I cannot offer any remarks relative to their durability; they are most generally used for railroad purposes, where the direct weight is without doubt, much greater than they would be subjected to upon an ordinary highway; but, nevertheless, its application to the structure differs widely. The uniformity of motion, with the greater weight, having less injurious effect upon a structure sufficient in strength and in full adjustment, than lighter weights, with that irregularity and impact which belongs to the travel upon a thronged city thoroughfare.

A *Stone Arch* is the most permanent bridge that can be constructed, and possesses all the requisites for a perfect

highway ; it is also the most costly in its erection ; its durability depends upon the character of the material of which it is composed, supposing the work in all points to be perfect ; if of stone, that will absorb moisture, though sufficient in strength to resist the crushing force, its value will be greatly depreciated by the action of the weather ; it is, therefore, requisite and necessary that, in the selection of material for a bridge of the span now proposed, no material less durable than Quincy granite should be used. The difficulty that presents itself here to the adoption of stone for the arches is, that in the construction of a stone arch with the proposed span the rise of arch should not be less than 1·5 the span, which, taking high-water as the springing line, so as to give full capacity during freshets, would place our roadway 54 feet above ordinary high-water, or 19 feet above the level of proposed roadway, and require a grade on the approaches of 7 feet per hundred, nearly *double the grade* that is now used at the eastern end of the Market street bridge. This difficulty is caused by the danger of injury to the Water Works at Fairmount, if more than one pier was placed in the channel of the Schuylkill, by backing up the water upon the breast wheels now used for pumping. The cost of a stone bridge would exceed that of a cast iron bridge at least from \$150,000 to \$200,000.

As to the durability of cast iron arched bridges, it is impossible to fix a limit of time ; they have been used since the year 1779, and the material (cast iron) for arches and beams has been extensively adopted throughout the United Kingdom of Great Britain ; they are, in comparison with stone, less costly, lighter, more ornamental, sufficient, in stability and rigidity, and, with ordinary care, fully as durable. And for the better information of your Committee, will present a list of the largest cast iron bridges now built, with their locality and the dates of their erection, viz :

## APPENDIX No. 19.

COMMUNICATION FROM THE FIRE MARSHAL.

FIRE MARSHAL'S OFFICE, }  
*Philadelphia, November 16, 1859.* }

*Hon. Alexander Henry, Mayor.*

SIR:—I beg leave to respectfully call your attention to the subject of frame buildings. The records of my office show that most of the burnings which are ascertained by investigation to be the work of design, originate in wooden structures. These fabrics are more readily fired than any other kind of building, and when once involved in flames, often endanger more substantial edifices which they may happen to adjoin. Besides this, there is a constant liability, as I need hardly tell you, of fires occurring from accident in frame buildings.

I find that numbers of structures of different descriptions, composed entirely of wood, are being erected in all the built-up parts of the city, to the continual jeopardy of surrounding properties of value, and to the great annoyance and uneasiness of their owners and occupants. Some of them are serious eye-sores to improving neighborhoods, and they are a constant temptation to the incendiary. This thing is a subject of daily complaint at the Central Police Office, but under the present laws it is exceedingly difficult—nay almost impossible—to abate the nuisance.

The existing laws prohibiting the erection of frame buildings are the same that were in force prior to consolidation. They have undergone no change since the passage of that act, and on examining them thoroughly, I find them unsuited to our present enlarged and compact municipality. They lack uniformity, and are altogether very defective. The ordinances of the old city proper and those of the adjoining districts and boroughs of the county, differ in the mode of their enforcement, as well as in the amount of the penalties they impose. In some of the outer districts there never was any ordinance of the kind in operation at all. In others, wooden edifices were interdicted only in prescribed localities, and there was nothing to prevent them from going up beyond certain boundary lines. There is now an urgent necessity for the immediate enactment of an uniform ordinance, forbidding the construction, under a heavy penalty, in any part of the consolidated city, except the strictly rural portions, of all framed, brick paned or other buildings, the walls whereof are not wholly composed of incombustible materials. And I would therefore respectfully suggest prompt action on the part of the City Councils in regard to this important matter.

I have taken the liberty, with great respect, to append to this communication, for your consideration, the draft of an ordinance which, in my judgment, will accomplish the object I desire, and which I deem highly essential for the public welfare. Any alterations or modifications which your superior wisdom may suggest will meet my cordial approbation. By a careful perusal of this draft, and a patient examination of the map of the consolidated city, you will perceive that I have included within the boundaries designed for the immediate operation of the ordinance, only such portions of the city as are already built up, or to which improvements are now extending or are likely soon to extend, excluding all parts that are purely rural or semi-rural. Of course the operation of the law, by supplementary enactments, can hereafter be at any time extended, as the rapid march of building improvements in our growing metropolis may demand. I have named the Fire Marshal as the executive officer, in case of the passage of the ordinance, because I think the matter

should properly come under his notice, and that he ought to be held responsible for the enforcement of the law. If its execution should be left indiscriminately to the whole police department, it would not be long before there would be a verification of the truth of the old adage, "What's every body's business is no body's business."

I have fixed the amount of the penalties at less than one hundred dollars, so that the prosecution of offenders may be brought before any Alderman, and the suit, therefore, be peremptory and summary.

I have the honor to be, very respectfully, your obedient servant.

ALEXANDER W. BLACKBURN,  
*Fire Marshal.*

### REPORT OF SPECIAL COMMITTEE.

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—Your Committee, to whom was referred a Petition from sundry lot owners along the line of Ridge Avenue, remonstrating against the laying of Water Pipes from Columbia Avenue to Montgomery street, would respectfully Report the following Resolution, and ask its adoption.

L. H. CASE, *Chairman*,                      C. P. BOWER.  
*Nov. 25, 1859.*

### RESOLUTION,

Relative to laying Water Pipes on a part of Ridge Avenue.

*Resolved*, By the Select and Common Councils of the City of Philadelphia, That so much of the Resolution, authorizing the laying of Water Pipes along Ridge Avenue, as relates to that part of the said Avenue between Montgomery street and Columbia Avenue, be and the same is hereby repealed.

## MESSAGE OF THE MAYOR.

—  
OFFICE OF THE MAYOR, }  
*Philadelphia, Nov. 25, 1859.* }

*To the President and Members of Common Council  
of the City of Philadelphia.*

GENTLEMEN:—I have been unable to approve the Bill, entitled, “An Ordinance to exempt certain Trusts from the operation of an Ordinance passed the tenth day of May, one thousand eight hundred and fifty-nine, entitled, ‘An Ordinance to provide for the weighing of stone coal purchased for the use of the City,’” and have therefore returned it herewith, although I am not unmindful of the inconvenience which may thus temporarily ensue.

It is very questionable whether the coal purchased with the income of the several trust funds is included by the letter of the restrictive provisions of the Ordinance of May 10th, 1859, which designates “every contract entered into by any department of the City for the purchase of stone coal,” as there is no Department of Trusts indicated by the Act of Consolidation, or established by Councils.

The Superintendent of Trusts cannot be regarded as the head of a department, all appropriations being made to him personally in his official capacity. There is, however, abundant reason why the provisions referred to should embrace the purchase of coal with the trust funds of the City, especially in the instance of the legacy of Stephen Girard, the testator having directed that those managing the same should “with the interest and dividend arising therefrom, purchase fuel *between the months of March and August* in every year forever, and in the month of January in every year forever distribute the same,” &c.

The distribution of fuel to the poor of the City, whether from the proceeds of trust funds, or by direction of the Guardians of the Poor, is a charity which is dispensed according to the necessities of the case and the discretion

of the visitor, and there can be no occasion to ascertain with accuracy the measure of each dotation, if it can otherwise be shown that the full amount of coal purchased for distribution has been truly delivered. The purchase of stone coal for the use of the poor, and its delivery in conformity with the terms of the Ordinance at one or more depots, will admit of its subsequent distribution at such times and in such quantities as may best carry out the benevolent designs of those who have made the City the perpetual almoner of their bounty.

Respectfully,

ALEXANDER HENRY,  
*Mayor of Philadelphia.*

### MESSAGE OF THE MAYOR.

OFFICE OF THE MAYOR,      }  
*Philadelphia, November 25th, 1859.* }

*To the President and Members of Common Council  
of the City of Philadelphia.*

GENTLEMEN:—I have affixed my signature to the bill called, “An Ordinance supplementary to an Ordinance, approved April 15, 1859, entitled, ‘An Ordinance relating to the Public Square and Parade Ground, in the First Ward,’” although I deem the first Section thereof inoperative, being desirous that the provisions of its Second Section should not be unnecessarily delayed.

By the 39th Section of an Act of Assembly of April 16, 1838, the Inspectors of the Philadelphia County Prison, were “authorized and directed to have the part or parts of the vacant ground attached to said prison, prepared and kept for a parade ground for the volunteers and militia of the City and County of Philadelphia; the Major General and Brigadier Generals of the First Division of Pennsylv-

vania to ordain regulations for the government of said parade ground."

This legislation was at the instance of the Prison Inspectors, who thus sought to secure for the Institution those advantages of air and light which must be seriously affected by the construction of buildings in its immediate vicinity.

The authority and direction thus given to the Inspectors, were unaccompanied by any specific appropriation of the premises by metes and bounds, and consequently no action was had to fulfil the designs of the act.

Further legislation was asked, and by the 1st Section of an Act of April 18, 1853, it was enacted "that the square in the rear of the Philadelphia County Prison known as the "Parade Ground," be, and the same is hereby declared to be open as a public square, and it shall be the duty of the County Commissioners of said county, *to open streets around said square fifty feet wide,*" and also, that "the said County Commissioners are hereby authorized to exchange, sell, or buy certain portions of ground adjoining the parade ground, so as to place the public square *within the boundaries of Eleventh and Thirteenth Streets, east and west, and Wharton and Reed Streets, north and south.*"

If the appropriation of these premises for a public park by this Act of Assembly was complete and valid, as it unquestionably was, there appears no necessity for their re-appropriation by Ordinance, and so much of this Ordinance as conflicts with the Act of Assembly in the boundaries of the park, must be inoperative.

The Act directs that there shall be opened streets around said square fifty feet wide, whilst the Ordinance bounds the premises that it would appropriate "partly by the western wall of the Philadelphia County Prison on the east." The authority vested in Councils to obtain, lay out, and maintain public squares, is derived from the 39th Section of the Act of Consolidation, and the Act of May 13, 1857, only regulates the manner in which, "whenever they shall select any square or other area of ground to be laid out forever as an open public place," they shall proceed to obtain possession of the premises.

This appropriation of the "Parade Ground," as a public square must be made subject to the proviso of the before

mentioned Act of April 18, 1853, which by its 2nd Section enacts, "that nothing therein contained shall authorize the Commissioners of the District of Moyamensing, (now the City of Philadelphia,) to plant trees, or so lay out the ground as in any manner to interfere with the use of the same for a public parade ground, without the consent in writing being first had or obtained, of the general officers named in the Acts of 1838."

I would recommend that before the filing of the petition contemplated in the Second Section of the Ordinance, Councils should, by further action, cause the boundaries of the proposed park to conform to the enactments of the Legislature.

Respectfully,

ALEXANDER HENRY,

*Mayor of Philadelphia.*

*Whereas*, Joseph Fox and George G. Williams, both of the City of Philadelphia, have laid out and opened for public use, a street twenty-five feet wide called Elk Street, from Otter Street to Canal Street, at the distance of one hundred and ten feet westward from Front Street in the Sixteenth Ward of the said City, the right of soil in said Elk Street being now still vested in them. Now these presents witness, that they, the said Joseph Fox and George G. Williams hereby cede and relinquish the said Street, and dedicate the same to the City of Philadelphia, to be, and remain open for public use at all times hereafter forever as a public highway, and subject to the same regulations, and under the same control of the Councils of the said City as other public roads and highways of the City. In witness whereof, the said Joseph Fox and George G. Williams, have hereunto set their hands and seals, the twen-

ty-fifth day of November, Anno Domini, one thousand eight hundred and fifty-nine.

GEORGE G. WILLIAMS, [SEAL.]  
JOSEPH FOX, [SEAL.]

Sealed and delivered in the presence of  
JACOB YEAGER,

*City of Philadelphia, ss.*

Before me, the subscriber, an Alderman of the City of Philadelphia, came Jacob Yeager, subscribing witness to the above written deed poll, and on his solemn oath according to law, did depose and say, that he did see Joseph Fox and George G. Williams parties thereto seal, and as their act and deed deliver the said deed poll for the uses and purposes therein mentioned, that the above signatures of Joseph Fox and George G. Williams are in the respective handwriting of the said Joseph Fox and George G. Williams, and that the name of this deponent thereunto set and subscribed as a witness, is in his own proper handwriting.

Sworn and subscribed the twenty- fifth day of November, Anno Domini, 1859.	}	JACOB YEAGER.
WILLIAMS OGLE, <i>Alderman.</i>	}	

#### RESOLUTIONS

Accepting Elk Street, in the Sixteenth Ward, and declaring the same a public highway, and for other purposes.

1. *Resolved*, By the Select and Common Councils of the City of Philadelphia, that the ground over which Elk street passes, from Otter Street to Canal Street, in the Sixteenth Ward, as conveyed by deed, dated November 25, 1859, to the City by Joseph Fox and George G. Williams, be accepted and the same is hereby declared a public highway.

2. *Resolved*, That the Department of Surveys are hereby directed to have the deed of Elk Street, in the Sixteenth

Ward, placed on record, and file the original of the same in the archives of the City.

3. *Resolved*, That the owners of properties on the line of Elk Street, between Otter and Canal Streets, are hereby directed to grade and pave the side walks, and set the curb opposite their respective properties, in conformity with law.

## REPORT OF THE COMMITTEE ON FINANCE.

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Finance Committee, having had under consideration the rate of taxation for the year 1860, submit herewith a printed statement, which has also been laid upon the desks of the members, showing the estimated expenses of the City, from November 5th, 1859, to January 1st, 1861; the resources of the City up to the same date, and the amount required to be raised by taxation.

In view of the fact, that heretofore, the delay in fixing the tax rate has involved the City in a dependance upon Temporary Loans, to meet its current expenses, and in hope of avoiding it in future, the Committee on Finance would urge upon Councils to fix the rate of taxation for 1860 at once, so that the Receiver of Taxes may be prepared to receive the taxes of the coming year, so soon as the taxes of the current year shall become delinquent or registered. The Committee therefore present the following Ordinance, and respectfully ask its adoption.

## AN ORDINANCE

To levy and fix the rate of Taxes for the year 1860.

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, That the City Commissioners be, and they are hereby authorized and required forthwith to levy on the real estate, furniture, horses, cows and carriages, returned by the Assessors, at the assessment made in the year 1859, situate or assessed within the City of Philadelphia, (except property used for rural purposes as hereinafter provided,) a tax of one hundred and seventy-five cents in the hundred dollars, on the assessed value thereof; and upon every taxable inhabitant of said City returned by the Assessors aforesaid, the sum of twenty-five cents.

SECT. II. The said Tax is to be levied for the year 1860 as one City and County tax, and is hereby voted for the following objects for the same year, namely:

For the relief and employment of the Poor, the sum of fifteen cents in the hundred dollars on said assessed value of the said property.

For the Public Schools, the sum of twenty-eight cents in the hundred dollars on the said assessed value of the said property.

For lighting the City, the sum of nine cents in the hundred dollars on the said assessed value of the said property.

For the Loan Tax to pay the interest on the Funded Debt, and for the Sinking Funds, the sum of seventy-five cents in the hundred dollars on the said assessed value of the said property.

For the expenses of the Police, the sum of twenty-two cents in the hundred dollars of the said assessed value of the said property.

For the care of the Public Highways, the sum of twenty-two cents in the hundred dollars on the said assessed value of the said property.

For the expenses of the City Departments other than those mentioned, and for the City Ice Boat, the sum of four cents in the hundred dollars on the said assessed value of the said property. And the said amounts are hereby

declared to be appropriated for the said objects, but subject to the further directions of Councils.

SECT. III. On all such portions of said assessed property, as said Assessors have marked "rural," but two-thirds of the said rate of taxation in the hundred dollars shall be levied as aforesaid; and no part of the tax hereinbefore set apart for the relief and employment of the Poor, shall be levied on all such portions of the said assessed property as are situated in the districts within the Twenty-first, Twenty-second, and Twenty-third Wards, where houses for the accommodation of the poor are provided, and whereby the Eighteenth Section of the Act of 2nd of February, 1854, it is enacted that no change shall be made without the consent of the qualified voters of the said District.

SECT. IV. It shall be the duty of the Receiver of Taxes to cause to be printed on the tax bills, the rate of taxes voted for the objects hereinbefore mentioned.

## REPORT OF THE COMMITTEE ON RAILROADS.

---

*To the President and Members of the Select and  
Common Councils of the City of Philadelphia.*

GENTLEMEN:—The Committee on Railroads of this Chamber, to whom was committed the Bill, supplemental to an Ordinance, entitled, “An Ordinance authorizing the Hestonville, Mantua, and Fairmount Passenger Railroad Company to lay the rails of their Road over the Wire Bridge,” with instructions to Report an annual rental, or sum amounting to an annual charge, to be paid by the said Hestonville, Mantua, and Fairmount Passenger Railroad Company for the use of the Wire Bridge, Report, That they have considered the subject matter of an annual rental, or charge, for the use of the said Bridge, and take occasion to say, that from the small receipts of the Road, the Company are not able to be taxed to the extent that Councils first imposed; they felt that they were unable to do more than to keep the roadway of the Bridge in good travelling condition. Your Committee would, however, recommend to strike out that portion of the Bill that proposes to repeal the payment of twenty dollars toll for each car, believing that a greater charge than this would prevent the said Company from accepting the Ordinance; and to this end propose the following amendment.

J. H. PUGH, <i>Chairman.</i>	JOHN K. TYSON,
ALEX. MARTIN,	JOHN W. POMEROY,
JOS. S. RILEY, Jr.	

---

## AMENDMENT.

Strike out the words, “Also, that so much of the same Ordinance as provides for the charge of twenty dollars per annum for each car, be and the same is hereby repealed,” which leaves the said Company to pay twenty dollars toll for each car passing over the said Wire Bridge,

as provided in the Ordinance approved September 28, 1859, in addition to the regular license of thirty dollars, which the said Company are now required to pay.

## REPORT OF THE COMMITTEE ON SURVEYS AND REGULATIONS.

---

*To the President and Members of Select  
and Common Councils of the City of Philadelphia.*

GENTLEMEN :—Your Committee on Surveys and Regulations, to whom was referred the claim presented by Mr. Enoch Thorne, for the use by the City of his patent Culvert ventilator, have examined the subject and obtained a history of the matter from the Chief Engineer and Surveyor which they beg leave to append thereto, and being advised fully that the use of the ventilator has been of great benefit to the City, in cases where there would have been serious damage had they not been inverted, at dates prior to the introduction of the simple manhole ventilator now used, we present the accompanying Ordinance, asking its favourable consideration.

AN ORDINANCE

Providing for payment of claim presented by Enoch Thorne, Esq.

SECTION 1. The Select and Common Councils of the City of Philadelphia, do Ordain, that the Chief Commissioner of Highways be, and he is hereby authorized and directed to draw a warrant in favor of Enoch Thorne, for the sum of five hundred dollars, in full payment for the right to use a certain culvert ventilator, secured to him by letters patent of the United States, of date June 27, 1854.

SEC. II. That the sum of five hundred dollars be, and is hereby appropriated to the Highway Department for the

specific purpose above named, and that the Chief Commissioner of Highways prior to drawing a warrant therefor, shall receive a certificate from the City Solicitor, that a proper transfer of said right to use within the limits of the City of Philadelphia, has been made to the said City.

SURVEY DEPARTMENT, }  
*Philadelphia, October 18, 1859.* }

SAM'L. W. CATTELL, ESQ.,

*Chairman Committee of Surveys and Regulations.*

DEAR SIR:—As directed by your Committee, I beg leave to lay before you such information as I can obtain, bearing upon the matter of claim made by Mr. Thorn for the use of a culvert ventilator. The subject is not a new one, as in August 1856, it was brought to the attention of the Committee by a reference from Councils, and by them sent to the Board of Surveyors for examination, they passed the following Resolution as expressive of their opinion, viz: "That while we cannot recommend Mr. Thorn's patent ventilator for culverts, as the best that can be made, or one that should be universally adopted in the City; yet we believe that its insertion in various places has been judicious in the absence of a better plan." On the 18th of December 1856, the Committee reported an Ordinance, (see C. C. Journal, page 106 App.,) appropriating \$500 for the payment of the use of the said ventilator by the City, but it was not acted upon. Again, the Councils of 1857, were presented with the same Ordinance of date June 1857, (page 130, Appendix C. C.), but again was not acted upon. And once more it comes before the Committee for action, I trust finally.

There is no question but that the application of the ventilator of Mr. Thorn's invention has saved the City an amount of damages, more than sufficient to pay the sum specified in the Ordinance as a remuneration for him; as I am advised, that the injury done at the corner of Fourth and Market Streets, and also in Spruce between Tenth and Eleventh Streets, by overflows consequent upon a want of ventilation to the culverts, (and other localities may be

enumerated,) will exceed \$2000, all of which was prevented by inserting Mr. Thorn's arrangement. This was done in the year 1853, and prior to Consolidation, there had been *eighty-one* inserted, and for these Mr. Thorn asks to be paid.

The date of Mr. Thorn's patent is June 27, 1854, since which I am not advised that any of his patent have been constructed.

Respectfully submitted,  
STRICKLAND KNEASS,  
*Chief Engineer and Surveyor.*

### AN ORDINANCE

To authorize a Loan to redeem the Funded Debt of the City, maturing in 1860

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, that the Mayor of the City of Philadelphia be, and he is hereby authorized to borrow, at not less than par, on the credit of the City Corporation, from time to time, as may be required by the City Treasurer, such sums of money as may be necessary to pay claims against the City for the Funded Debt, maturing in the year one thousand eight hundred and sixty, not exceeding, in the whole, the sum of seven hundred thousand dollars, for which interest not to exceed the rate of six per centum per annum, shall be paid half yearly, on the first days of January and July, at the office of the City Treasurer; the principal of said Loan shall be payable and paid on the first day of January, A. D. 1891, and not before, without the consent of the holders thereof, and certificates therefor, in the usual form of certificates of City

Loans shall be issued in such amounts as the lenders may require, but not for any fractional part of one hundred dollars; and it shall be expressed in said certificates, that the said Loan therein mentioned, and the interest thereof, are payable free from all taxes.

SEC. II. Whenever any Loan shall be made by virtue thereof, there shall be by force of this Ordinance, annually appropriated out of the income of the corporate estate, and from the sum raised by taxation, a sum sufficient to pay the interest on said certificates, and the further sum of three tenths of one per centum on the par value of said Loan, shall be appropriated quarterly out of said income and taxes, to a Sinking Fund, which fund and its accumulations are hereby specially pledged for the redemption and payment of said certificates.

##### REPORT OF THE COMMITTEE ON FINANCE.

---

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Finance, to whom was

referred the claim of the Controllers Department for completing the register of Warrants, issued since consolidation, and making out a statement for the Department of Law of the Warrants twice paid, beg leave to Report, that the subject has received a careful examination. The work was ordered to be done, under the supervision of the Finance Committee, by a Joint Resolution of Councils, approved by the Mayor, September 10, 1858, and to be done at such times as not to conflict with the regular and stated duties of the office; the Resolution can be found on page 340 of Ordinances of 1858. The work has been well and faithfully performed, and to the satisfaction of the Committee on Finance, and they recommend the passage of the following Ordinance.

All of which is respectfully submitted,

## REPORT OF THE COMMITTEE ON SURVEYS AND REGULATIONS.

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—Your Committee on Surveys and Regulations, respectfully Report the following Resolution, to transfer certain items of appropriation made to the Department of Surveys, for the year 1859, and submit the following reasons therefor:

By Act of Assembly of April 3d, 1851, Commissioners were appointed to lay out streets in and for the Borough of West Philadelphia, and the Township of Blockley, and by further Act of Assembly of May 13th, 1856, the said Commissioners were directed to proceed with the survey "in manner provided by law," "before said Township of Blockley was embraced in the city of Philadelphia," and the said Commissioners did, on the 12th day of November, 1856, enter into a contract with Messrs. Lightfoot & Walton, for the work required on the survey of so much of said Township of Blockley as lies south of Market street, and west of Fisher's Lane, for the sum of \$6,400; and further, the Act of Assembly of May 13th, 1857, says that "the duties of said Commissioners shall forthwith cease and determine," and that any contracts made by them prior to January 1, 1857, shall remain in force. *And Whereas*, Messrs. Lightfoot & Walton have now filed in the Department of Surveys, duplicate Plans in sections, covering the area specified in said contract, duly executed and on file. And the amount of payments made by the city, leaves a balance of \$4010 due the said Messrs. Lightfoot & Walton, a portion of which can now be paid out of the appropriation made to the Department of Surveys for the year 1859, from items that will otherwise merge upon the 1st prox.

## AN ORDINANCE

Supplementary to an Ordinance, entitled, "An Ordinance re-organizing the Department of Surveys, &c.," approved October 25, 1855.

SECT. I. The Select and Common Councils of the City of Philadelphia, do ordain, That no building or buildings shall be erected within the limits of the City of Philadelphia, without a survey having been made within one year of the date of the erection thereof, of the ground to be occupied by, and connected with each and every building, and the proper lines and regulations thereof being furnished by the Surveyor and Regulator of the District in which the same may be located, a record of which shall be returned to, and filed in the Department of Surveys. And if any person or persons shall begin the foundation, or erect any building, or buildings, adjacent to or upon any street, road, lane, court or alley, as located upon a confirmed plan of the city, or the line of his, her, or their neighbor's ground, without first applying to, and having the line or lines thereof regulated, and marked by the Surveyor and Regulator of the district, aforesaid, or shall deviate therefrom by extending his, her, or their building or buildings, beyond either of the lines or boundaries marked as aforesaid, unless determined otherwise by appeal, every owner and master builder so encroaching, shall severally forfeit and pay the sum of fifty dollars, to be recovered in the same manner as debts of the same amount are now, or hereafter may be by law recoverable, and said fine (and all other fines under this ordinance, unless otherwise specified,) shall be paid into the City Treasury. *Provided*, the same shall not be recoverable, unless prosecuted within one year after the offence may have been committed. The provisions of this ordinance, shall not apply to the rural districts, unless the improvements to be erected, shall be upon a party line or line of public road or street. It shall be the duty of the said Surveyors and Regulators, to attend to all Surveys to be made with a view to the erection of new buildings or other work in their respective districts, within six working days after notice so to do, and upon failure thereof, the Surveyor and Regulator shall forfeit and pay to the party requiring the Survey, the sum of fifty dollars, to be

recovered as debts of same amount are or may be hereafter recoverable by law, and the Chief Engineer and Surveyor is, upon the application of parties interested, directed to delegate another Surveyor to perform that especial work, the Surveyor performing the service, to be entitled to the fee authorized in the schedule of rates, the amount thereof, (if paid the Surveyor in fault,) to be deducted from any amounts due him under any of the Ordinances of the City, upon notice from the Chief Engineer and Surveyor, and made payable to the Surveyor performing said work, and the Surveyors and Regulators shall file in the Department of Surveys, copies of all surveys and regulations by them made within ten days after the same are affected, under penalty of five dollars for every neglect of such duty, to be recovered before any tribunal having cognizance of the same, for the use of the City of Philadelphia.

SECT. II. That no curbing shall be set, nor highways or streets graded, unless in accordance with the regulations furnished by the Surveyor and Regulator of the district, under a penalty of twenty dollars for every hundred feet or less of curbing set or grading performed, to be paid by the curb-setter or contractor, and shall be recovered as debts of like amount are or may be by law recoverable, and all the Departments of the City Government that may require the services of the Surveyors and Regulators, shall send such requisition to the Department of Surveys, where a record thereof shall be kept, and returns of all city work performed by the Surveyors and Regulators, shall be made to the Chief Engineer and Surveyor, within ten days after the work shall have been performed, who shall examine all bills rendered by the Surveyors and Regulators of work done for the City, and if found correct, approve them prior to their being audited by the Controller.

SECT. III. That the Surveyors and Regulators shall each receive an annual salary of five hundred dollars, payable quarterly, as provided by Act of Assembly, for keeping the public records, preparing and furnishing duplicates thereof to the Chief Engineer and Surveyor, for the purpose of placing on record among the city archives,

and performing all services that may be required of him as a member of the Board of Surveyors, in addition to such fees as are or may be hereafter provided for by Ordinance.

SECT. IV. That the following schedule of rates, or charges for work, shall be allowed in advance to the District Surveyors, to be paid by those who may require the work to be performed.

For Surveying and Regulating lots of the following dimensions:

For lots of 20 feet width and under,	-	\$3 00
“ over 20 “ “ and not over 40 feet,		4 00
“ of 40 “ “ “ 60 “		5 00
“ of 60 “ “ “ 100 “		6 00
For each foot beyond 100 feet,	-	02
For each division line of buildings, given at the time of survey of lot,	-	1 00

Surveying and Regulating as above specified, is intended to comprise the furnishing such stakes as would be necessary for enclosing accurately each lot.

For each level required and given at the time of survey of lot,	-	\$1 00
“ furnishing grade and line for curbing, per 100 feet or under, owned by one individual, when ordered by owner thereof,		2 50
“ furnishing under one application, the grade and line for re-setting curb for 75 feet continuously, or under,	-	1 50
“ each additional foot in both cases,	-	02
“ furnishing grades and line for curbing ordered, and to be paid for by the City, per foot,	-	02
“ gutter or grading stakes, to be paid by the City per lineal foot,	-	01
“ measuring, making drawings and returns for water pipe, including all descriptions for liens that may be required, to be paid by the City, per lineal foot of property on each side,	-	02

“ furnishing lines and levels, preparing property plans and assessment bills, with general supervision of Culverts during construction, and certificate that they have been built in conformity with specifications, to be paid by the City, or branch drains built under Ordinance of November 11, 1858, to be paid by the contractor, per lineal foot	-	-	-	-	06
“ Surveys and duplicate sectional plans for line regulations, either new or revisions, per acre,	-	-	-	-	2 00
“ Surveys and duplicate sectional plans for grade regulations, either new or revisions, per acre,	-	-	-	-	1 50
“ duplicate sectional plans, comprising both line and grade regulations, per acre,	3	00			

All measurements for paving of intersections of streets, to be performed by the said District Surveyors, without charge to the City.

SECT. V. That each Surveyor and Regulator shall, prior to entering upon the discharge of his duties, present to the Committee on Surveys and Regulations, a bond, with two freehold sureties, in the sum of four thousand dollars, conditioned for the payment of any damages or expenses that may arise in consequence of any mistake or error made by him or either of them, in giving the lines or grades of any lot or lots, to be sued for and recovered by the person or persons aggrieved, as damages in other cases are now or may be hereafter recoverable, and the said bond and sureties shall be presented to, and receive the approval of Councils, before any Surveyor and Regulator hereafter to be elected, shall enter upon the discharge of his official duties, and the said bond shall be filed, after its approval by Councils, in the Law Department of the

City, and it shall be the duty of the Surveyors and Regulators now in office, to present, each, a bond as above specified, within thirty days after the approval of this Ordinance.

SECT. VI. That all persons who are desirous of dedicating streets to the public use, shall present a plan thereof to the Board of Surveyors, showing location and width, with the proposed name thereof, and said Board shall approve or reject the same, as may be deemed most advantageous to the interest of the City. If accepted, a deed therefor, shall be prepared, at the expense of the granter or granters, duly recorded in the office of the Recorder of Deeds, and deposited among the City archives in the Department of Surveys.

SECT. VII. That in all cases where there may be a question, or dispute, as to a party line, it shall be the duty of the Surveyor and Regulator to notify the parties interested in the adjoining properties, that he will regulate the line in question, at a specified time, and if after so doing, the parties do not, within thirty days, appeal therefrom, either to the Court, or the Board of Surveyors, as authorized by law, then, and in that case, or if appealed from, shall be finally sustained; the Survey made shall be fixed and determined. *Provided always,* That no person under age, *non compes mentis, feme covert,* imprisoned, or beyond the sea, or who shall have notice as aforesaid, shall be injured or effected by any proceeding, order, direction or award, until the expiration of three years after their coming of full age, return from beyond the sea, discovered, being at large, of sound memory, or if within the United States, until the expiration of one year after notice in writing, within which periods his, her or their appeal, may be entered and prosecuted as aforesaid.

SECT. VIII. That so much of any and all former Ordinances as are hereby altered or supplied by the provisions of this Ordinance, be, and the same is hereby repealed.

## REPORT OF THE COMMITTEE ON HIGHWAYS.

---

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—Your Committee on Highways, being desirous to have all bills due and to become due in this Department, settled before the first of January next, and believing that it will not be prudent to recommend any more work to be done on the streets at this time, except such as is necessary to finish the work already commenced, they have carefully examined the appropriation and balances unexpended; and that the balances unexpended of Items 1, 2, and 7, will not be sufficient to pay bills chargeable to these Items. They also find that the balances of Items 3, 4, 5, 8, and 14, will not be required to discharge bills chargeable to such Items. They therefor recommend the following Resolution, transferring certain Items, and ask its adoption.

## RESOLUTION

To transfer certain Items of Appropriation to the Highway Department.

*Resolved*, By the Select and Common Councils of the City of Philadelphia, That the sum of thirteen thousand seven hundred dollars be, and the same is hereby transferred from the several Items herein named, of an appropriation made to the Department of Highways, Bridges, Sewers, and Cleansing of the City, approved February 2, and October 4th, 1859. Three thousand four hundred

dollars from Item 3. Eighteen hundred dollars from Item 4. Three hundred dollars from Item 5. Nine hundred dollars from Item 9. Three thousand dollars from Item 14, and forty-three hundred dollars from Item 8,—as follows :

Five thousand six hundred dollars to Item 1, for paving intersections,

Six thousand five hundred dollars to Item 2, for repairing and re-paving streets,

Sixteen hundred dollars to Item 7, for repairs to culverts and inlets.

##### REPORT OF THE COMMITTEE ON FINANCE.

---

*To the Select and Common Councils  
of the City of Philadelphia :*

GENTLEMEN:—The Committee on Finance, to whom was referred the Communication from the City Commis-

sioners, asking that certain transfers may be made in the appropriation to their Department for the present year, respectfully Report, That such transfers have become necessary, as appears by the statement of the City Commissioners, and which the Committee deem satisfactory. The reasons assigned for these transfers are as follows :

The deficiency in Item 8 was caused by an order of the Court of Common Pleas, directing the Prothonotary to procure books necessary to the transaction of his business.

The deficiency in Item 9 was caused by the increase of the salaries of the Officers of the Supreme Court since February 25, 1859.

The deficiency of Item 12 was caused by the increase of the salary of James B. Dare, an officer in the Court of Quarter Sessions, &c.

The deficiency in Item 30 was caused by the insufficiency of the original appropriation, and the fact that many valuable books required rebinding immediately to preserve them from destruction.

The deficiency in Item 57 was caused by the Resolution of Councils, construing an Ordinance by which the City Commissioners were directed to draw warrants to pay the expenses of patients at the State Lunatic Hospital.

The Committee, therefore, submit the annexed Resolution, and ask that it may be adopted.

### REPORT OF THE COMMITTEE ON HIGHWAYS.

---

*To the Select and Common Councils  
of the City of Philadelphia,*

GENTLEMEN:—The Committee on Highways, &c., Report herewith “An Ordinance to provide for the construction of a bridge over the Reading Railroad, on the line of Front Street,” the passage of which they recommend.

The improvements are extending rapidly at Front street, and the grade of the streets in the locality are so arranged that Front street will cross the Reading Railroad at an elevation of about twenty feet.

Front street road in the vicinity has been vacated, whereby a bridge upon the Railroad on the line of that road has been rendered useless, and must be removed. In erecting the new bridge it is proposed to use some of the materials of the old one, whereby the cost of its construction will be reduced.

The estimate of the Chief Engineer and Surveyor, is that the whole cost of constructing the proposed bridge will be from three thousand to thirty-two hundred dollars. The Railroad Company can probably erect it for a less sum, because they have the materials of the old bridge. And the Ordinance provides for the payment of the sum of two thousand dollars to the Company, when the Chief Engineer and Surveyor shall certify that the said bridge has been finished and completed, according to the terms and conditions of the contract.

The Committee consider the arrangement an advantageous

one for the City, and recommend the passage of the Ordinance.

#### AN ORDINANCE

For the construction of a Bridge over the Reading Railroad.

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, That the City Solicitor be, and is hereby authorized and directed to draw a contract with the Philadelphia and Reading Railroad Company, for the construction of a bridge over the track of the said Company on the line of Front street, in the Twenty-third Ward. The said bridge to be of wood of the Howe Truss, with rubble-work stone abutements and wing-walls, to be at least fifty feet span at right angles to face of abutment, and fifty two feet in width, with thirty-six feet carriage-way and an eight feet footway upon each side, to have not less than sixteen feet clear headway between the surface of rails on Railroad and the under side of bridge.

SEC. II. That the plan and proportions of said bridge shall be approved by the Chief Engineer and Surveyor, and shall be constructed to his satisfaction and acceptance, and upon the completion of said work and a certificate of approval by the Chief Engineer and Surveyor being presented to the Chief Commissioner of Highways, he shall issue a warrant upon the City Treasurer to the Philadelphia and Reading Railroad Company, for the sum of two thousand dollars, as payment in full of said contract.

SEC. III. That the amount of two thousand dollars, as specified above, shall be paid out of the annual appropriation to the Department of Highways, for the year 1860.

MESSAGE OF THE MAYOR.

---

OFFICE OF THE MAYOR, }  
*Philadelphia, December 14th, 1859.* }

*To the President and Members of Common Council  
of the City of Philadelphia.*

GENTLEMEN:—I have withheld my approval from the accompanying Bill, entitled, “An Ordinance repealing An Ordinance regulating a Market in the Borough of Frankford, Twenty-third Ward,” because the repeal of the Second Section of the Act in question, by allowing the hawking and selling of butcher’s meat from wagons or carts, or upon footways, within the limits of the late Borough of Frankford, will cause the provisions of the Third Section of the same Ordinance, to descriminate against parties who sell within the Market limits, by prohibiting to them only, the use of certain kinds of weights and measures.

The stalls in the Market House having been rented under the reasonable supposition that the protection afforded them by the Section referred to, would be continued in force; those who now occupy such stalls, would have just cause of complaint of a legislation by Councils which would tend to impair the value of the privileges for which they have paid to the City Treasury the full consideration demanded.

Respectfully, &c.,

ALEXANDER HENRY,  
*Mayor of Philadelphia.*

GENTLEMEN:—The Committee on Finance, to whom was

referred the claim of D. M. McElroy, to the use of William Hicks, for indexing Assessors' Books, of the 24th Ward, for 1857, amounting to \$119 72.

Respectfully Report, that they have examined the claim and have ascertained that the work was performed, and that the charge therefor is the usual rate allowed for such labor. They also Report that other claims for similar work, performed at the same time, have been allowed and paid, and believe this to be the only claim of the kind remaining unpaid. They therefore submit the annexed Ordinance, making an appropriation to pay this claim, and ask that it may be passed.

#### AN ORDINANCE

To make an appropriation to the Law Department, for the year eighteen hundred and sixty.

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, That the sum of Twenty-seven thousand two hundred dollars be, and the same is hereby appropriated to the Law Department, for the expenses thereof, for the year eighteen hundred and sixty, as follows, to wit :

1. For salaries, six thousand five hundred dollars.
2. For advertising liens, four thousand five hundred dollars.
3. For Prothonotary's costs, six thousand dollars.
4. For Sheriff's costs, nine thousand dollars.
5. For blank books and stationery, five hundred dollars.
6. For printing blanks, notices, &c., five hundred and fifty dollars.
7. For service of subpoenas, one hundred and fifty dollars.
8. For witness fees and certified copies of papers and plans, and descriptions of the condition of properties to be furnished for Sheriff's sales, five hundred dollars.
9. For care of office, one hundred dollars.
10. For miscellaneous expenses, two hundred and fifty dollars.
11. For advertising and posting notices of plans and surveys, one hundred dollars.
12. For law books for the Department, fifty dollars.

SEC. II. That Warrants for the said appropriation shall be drawn in conformity with existing Ordinances.

CITY SOLICITOR'S OFFICE,  
*Philadelphia, Oct. 31, 1859.* }

GEORGE W. HUFTY, ESQ., *City Controller.*

*Dear Sir:*—In obedience to the 23d Section of the Act of 13th of May, 1856, entitled, "A further Supplement to the Act consolidating the City of Philadelphia," I Report to you the estimate of the appropriation that will be required for this Department, for the ensuing year, viz:

- Item No. 1. For salaries, six thousand five hundred dollars.  
 " 2. For advertising liens, four thousand five hundred dollars.  
 " 3. For Prothonotary's costs, six thousand dollars.  
 " 4. For Sheriff's costs, nine thousand dollars.  
 " 5. For blank books and stationery, five hundred dollars.  
 " 6. For printing blanks, notices, &c., five hundred and fifty dollars.  
 " 7. For service of subpoenas, one hundred and fifty dollars.  
 " 8. For witness fees and certified copies of papers and plans, and descriptions of the condition of properties to be furnished for Sheriff's sales, five hundred dollars.  
 " 9. For care of office, one hundred dollars.  
 " 10. For miscellaneous expenses, two hundred and fifty dollars.  
 " 11. For advertising and posting notices of plans, and surveys, one hundred dollars.  
 " 12. For law books for the Department, fifty dollars.

Making altogether, the sum of twenty-seven thousand two hundred dollars, (\$27,200.)

I send, as the amount of revenue which may be expected from this Department the ensuing year, the sum of thirty-five thousand dollars, (\$35,000.)

I estimate the revenue of this Department this year, at forty-three thousand dollars, (\$43,000.) We have collected up to this time, over forty thousand dollars.

These sums are what may be strictly termed the revenue of this Department, being derived from claims for which we file liens, and do not include the sums collected on mortgage, bonds of defaulting officers, tax on railway dividends, Girard Estates, and the like, which I do not consider the revenue of this Department. The revenue of this Department then, is derived from Water Pipe, Paving, Curbing, Culverting, and removal of Nuisances.

It will be perceived that I have fixed the estimated amount of revenue for next year, below the amount we have collected this year. Whether this amount will be collected, depends entirely upon the vigor with which the City's claims will be pressed. The amount I have given will not be voluntarily paid, perhaps not the one half of it.

My experience has taught me that it requires the writ which sells the property, in a majority of cases, to induce payment.

This Department will owe nothing on the first of January next.

Truly yours,

HENRY T. KING,

*City Solicitor.*

### REPORT OF THE COMMITTEE ON FINANCE.

*To the Select and Common Councils  
Of the City of Philadelphia.*

GENTLEMEN:—The Committee on Finance, to whom were referred the estimate of the Trustees of the City Ice Boat, for the year 1860, respectfully Report, that they have carefully examined the same, and, after reducing them, by striking the sum of \$2,000 from the first Item, "Repairs to and Equipments for Boat and Machinery," submit the

annexed Ordinance, and ask that the same may be passed. The Committee feel satisfied that these appropriations will be ample, unless extraordinary repairs should be rendered necessary by unforeseen accidents.

WM. NEAL,	THOMAS POTTER,
D. S. BEIDEMEN,	WM. B. THOMAS.
S. SNYDER LEIDY,	<i>Dec. 15, 1859.</i>

#### AN ORDINANCE

To make an appropriation to the Trustees of the City Ice Boat, for the year eighteen hundred and sixty.

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, That the sum of twelve thousand three hundred and fifty dollars be, and the same is hereby appropriated to the Trustees of the City Ice Boat, for the year eighteen hundred and sixty, for the following purposes, to-wit :

1. For repairs to and equipments for boat and machinery, three thousand dollars.
2. For fuel, five thousand dollars.
3. For wages, three thousand dollars.
4. For provisions, eight hundred and fifty dollars.
5. For insurance, wharfage, stationery, and incidentals, five hundred dollars.

*Provided*, That all the fuel, provisions, and other supplies provided for in this Section, shall be obtained by contract, the contract to be given to the lowest bidder.

SEC. II. That Warrants for the said appropriations shall be drawn in conformity with existing Ordinances.

---

OFFICE TRUSTEES OF CITY ICE BOAT, }  
*Philadelphia, Nov. 5, 1859.* }

To GEORGE W. HUFTY, Esq., *City Controller*.

*Sir* :—At a meeting of the Board of Trustees of the City

Ice Boat, held this day, the following estimate of appropriations that will be required for the support of the Ice Boat, during the the year 1860, was adopted, and I was required to transmit the same to you, to wit :

Item 1. Repairs to and equipments for boat and machinery,	-	-	-	\$5,000 00
“ 2. Fuel,	-	-	-	5,000 00
“ 3. Wages,	-	-	-	3,000 00
“ 4. Provisions,	-	-	-	850 00
“ 5. Insurance, wharfage, stationery, and incidentals,	-	-	-	500 00
				<hr/>
				\$14,350 00

This estimate is based upon the probable duration of the boat's term of actual service being ten weeks, and is, with the exception of "Item No. 1" the same as this year ; for this Item, the Trustees deem it prudent to estimate the cost of repairs and equipments at \$2,000 greater for the year 1860, as they think it more than probable she may need some heavy repairs after the winter's work, especially as no repairs of consequence have been made to either boat or machinery, for the last two years.

It is impossible to make any certain estimate of the amount of revenue which may be expected from the Ice Boat, during the ensuing year, as the only source from which revenue can be derived, is for services in towing and relieving vessels, the amount of which depends entirely upon the length and severity of the winter ; but taking a period of ten week's service, (as above,) as the basis on which to make an estimate, it is fair to suppose, judging from former years, that \$5,000 will be earned ; but both revenue and expenditure will depend almost entirely on the length of service.

There will be no debts due by the Trustees on the first day of January next, but on the contrary, a large amount of the appropriation for 1859, will remain unexpended and merge in the City Treasury at that time, this is occasioned simply by the fact, that her term of service was shorter than that for which the estimate was prepared.

Very respectfully,

JOHN DEVEREUX,  
*President of Board Trustees of City Boat.*

## REPORT OF THE COMMITTEE ON FINANCE.

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Finance, to whom were referred the estimates of the Department of the City Controller for the year 1860, respectfully Report, That they have carefully examined the same, and have reduced the estimates \$6,200, in the following items, to wit:

Item 3. "Books and Stationery" is reduced from \$700 to \$600, Item 4. "Printing and Advertising Annual Statement of 1859," is reduced from \$6,000 to \$1,500. Item 7. "Salaries of Four Clerks employed in the examination of the books of the Receiver of Taxes," is reduced from \$3,200. The Committee are satisfied that these reductions are necessary and proper. The publication of the Annual Statement, in pamphlet form, and in more than two newspapers, is unnecessary, and the duties of the "Four Clerks" will, in all probability, be fully ended within the ensuing six months.

The Committee, therefore, submit the annexed Ordinance, and ask that it may be passed.

### REPORT OF THE COMMITTEE ON FINANCE.

---

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Finance, to whom was referred the accompanying Ordinance, which provides for the acquisition of the wharves now separating the Park from Fairmount, make Report,

That they have considered the same and Report the same as committed, with an earnest request on their part, for its passage.

Negotiations for the purchase of these wharves have been pending for a period of over sixteen years. The Joint Committee of Councils of the old City, authorized to purchase the Lemon Hill Estate, (now forming part of Fairmount Park,) in a Report to Councils on the 23d of November 1843, after announcing the purchase of that beautiful tract of land, containing fifty-two acres, for the sum of \$75,000, make the following reference to the difficulty of getting the ground, occupied by the wharves, at a reasonable price :

"This lot is of small dimensions, when its proprietors shall become weary of ground, which, surrounded by the possessions of the City, must prove an unprofitable concern, they may be disposed to part with it for a fair and just equivalent." (See Report of Thos. P. Cope, and others, page 11 of the Appendix to Journal of Select Council, 1843-44.)

It can hardly be doubted, that could the City have obtained possession of this strip of ground in 1843, and thus have formed the connection between the grounds at Fairmount and Lemon Hill, steps would have been taken to lay out the grounds for the pleasure of the citizens, and a generation which has since passed away would have been in the full enjoyment of this beautiful place.

In September, 1854, Councils adopted a resolution instructing the Committee on City Property to inquire and report the price for which these wharves could be obtained. In the following month, petitions, signed by citizens representing every class and profession, and property to the amount of many millions, were presented to Councils, urging the purchase of these wharves, and the formation of a Park at and above the works at Fairmount. These petitions were referred to the same Committee. On the 31st of October, 1854, the Committee (after having personal interviews with one of the owners of the property on the subject,) addressed to him a formal note, requesting that he would name the price asked for the wharves. The following letter was received in reply:—

*Philadelphia, October 31, 1854.*

DEAR SIR:—I have your note of this date, requesting to know at what price the Schuylkill wharves, extending from Coates Street Public Landing to the Public Landing next to Lemon Hill Estate, could be obtained. The owners, in consequence of your verbal request, made some time since, have had a conference, and have come to the conclusion that sixty thousand dollars, in the city six per cent. bonds, would be a fair price for those wharves, and such bonds to that amount they would accept for them. The City Councils should, however, be apprised that Peter Kern and Charles E. Smith have the right to use the upper dock

for access to their mill and factory, and Henry Moliere had the right, while he lived, to take ice over the wharves to his ice house, in manner set forth in certain articles with him, but whether such right has descended to his heirs may be a question.

We desire this offer not to remain open longer than three months.

I am, very respectfully,

ELI K. PRICE.

TO MR. CHARLES MEGARGE,

*Chairman of Committee.*

The Committee, regarding the price named as excessive, Reported to Councils that they were unable to agree upon terms. The possession of these wharves by the City has for years been regarded as important to protect the water we drink, but now the speedy acquisition of the ground is a pressing necessity, for the completion of the new Park, in accordance with the plan adopted by Councils. It is very much to be regretted that the Committees which from time to time have had the question before them, have been unable to get the owners to agree upon a fair and just equivalent for the property, and the sum named by your Committee is as liberal, in their judgment, as is consistent with justice.

WM. P. HACKER, *Chairman*, EVAN RANDOLPH,  
S. SNYDER LEIDY, W. H. DRAYTON,  
WM. NEAL, W. B. THOMAS.

#### AN ORDINANCE

Selecting an area of ground to be laid out and maintained forever, as an open public place for the health and enjoyment of the people, and also to preserve the purity of the Schuylkill Water at Fairmount.

*Whereas*, The small strip of land lying between the present Fairmount Park and Fairmount Square, has been included in the design adopted for the improvement of the Park, thus making, (if owned by the City,) a continuous water front from the Wire Bridge to the north end of the Park above the Spring Garden Water Works. *And whereas*,

should this strip not be obtained by the City it may, and probably will, become a nuisance, by the erection of factories thereon, which will not only fill the water with impurities, and that immediately above the fore-bay, but also destroy the connection between Fairmount and the Park, and make the access much less convenient and imposing. Now, therefor,

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, That by virtue and in pursuance of the authority versed in them by the 4th Section of an Act of the General Assembly, approved May 13, 1857, they do select and appropriate the area of ground, which according to an accurate survey thereof, is bounded as follows:

“All that certain tract or piece of land situate on the north-westerly corner of Coates street and Landing Avenue, in the 15th Ward of the City of Philadelphia, containing in front or breadth, on said Landing Avenue, six hundred and thirty feet, more or less, to the line of the property of the City of Philadelphia, and extending in length or depth south-westerly on the north-westerly line thereof at right angles with said Landing Avenue, about three hundred and two feet, more or less, into the river Schuylkill, and on the south-easterly line thereof along the north-westerly side of said Coates street, about two hundred feet, more or less, into the river Schuylkill.” To be laid out and maintained forever as an open public place, for the health and enjoyment of the people.

SEC. II. That the Mayor of Philadelphia be, and he is hereby empowered to negotiate, on behalf of the City of Philadelphia, with the owner or owners of said ground by the 1st Section hereof, selected and appropriated, relative to the price thereof, and shall have the power to agree with said owner or owners on said price, and bind the City of Philadelphia therefor.

*Provided,* The same shall not exceed twenty-five thousand dollars.

SEC. III. That if the Mayor of Philadelphia cannot agree with the owner or owners thereof, or said owner or owners decline to receive in payment therefor the sum to which the power of the Mayor, in the 2d Section hereof, is limited,

then in that event, the Mayor shall inform the City Solicitor of such disagreement.

SEC. IV. That the City Solicitor, upon receiving the information provided for in the 3d Section hereof, be, and he is hereby directed to file, in the Court of Quarter Sessions, of the City and County of Philadelphia, on behalf of said City, a petition setting forth by proper metes and bounds, the ground by the 1st Section hereof selected and appropriated, praying said Court to appoint a Jury to assess the damages, as provided by law.

#### REPORT OF THE COMMITTEE ON CLAIMS.

---

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Claims, to whom were referred the claims of Dr. Harris and William Fennell, respectfully Report, That they have carefully examined the same and find them to be just and correct. The claim of Dr. Harris is for salary due to him, as a Vaccine Physician, in the year 1857. It appears that warrants to the amount of \$45 83 were drawn by the Board of Health in favor of Dr. Harris in October, November, and December, 1857, and were paid by the City Treasurer, March 13th, 1858. Dr. Harris never received these warrants, and the endorsements upon them were forged.

The claim of Mr. Fennell is the return of the price of water pipes laid in front of his property, in Washington or Market street, Lancaster Road and Crammond street, in the Twenty-fourth Ward. Satisfactory proof, of the most positive character, that the costs and charges of laying these pipes, were paid twice by the claimant.

The Committee, therefore, submit the annexed Ordinance to pay these claims, and ask that the same may be passed.

*Dec. 15, 1859.*

## AN ORDINANCE

To pay the Claims of Dr. R. P. Harris and William Fennell.

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, That the sum of two hundred and ninety-one dollars and seventy-six cents, be and the same is hereby appropriated to pay the following claims against the City, to wit:

Item 1. To pay Dr. Robert P. Harris, the sum of forty-five dollars and eighty three cents, for services rendered as Vaccine Physician, in 1857.

Item 2. To pay William Fennell, the sum of two hundred and forty-five dollars and ninety-three cents, for the cost and charges for laying water pipes in front of his property in Lancaster Road, Washington or Market street, and Crammond, which were paid by him a second time, in error.

SEC. II. That Warrants for the above appropriations shall be drawn as follows, Item 1, by the Mayor, and Item 2, by the City Solicitor.

## REPORT OF THE COMMITTEE ON CLAIMS.

---

*To the Select and Common Councils  
Of the City of Philadelphia.*

GENTLEMEN:—The Committee on Claims, respectfully Report, that they have carefully examined the following Claims, and have found them to be correct, to wit:

Win. H. Engard's claim for \$165, paid by him twice, for certain water pipes laid, and paving done, in front of his property, at Parrish and Sixteenth streets, the vouchers for which duplicate payments were exhibited by the claimant, to the Committee.

Field & Harris' claim, assigned to Sarah Clayton, for plumbing done by order of the City Commissioners, and certified to be correct, amounting to \$14 00.

The claim of J. G. Fell, assignee of Oliver Brownell, for \$69 17, being the amount of a warrant issued by the Highway Department, in 1855, in favor of Mr. Brownell, but never paid, or presented to the Treasurer.

The claim of Mrs. Amanda Neal, widow of Joseph B. Neal, for the use of his rooms for Juries, \$125 00

And the claim of Joseph Hufty, for stationery furnished to the Chief Engineer of the Fire Department, previous to February, 1857, \$63 07.

The two last cases were reported favorably upon in 1858, but were not finally disposed of by Councils.

#### AN ORDINANCE

To pay the Claims of William H. Engard. and others.

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, That the sum of four hundred and thirty-six dollars and twenty-four cents, be, and the same is hereby appropriated, to pay the following claims, to wit:

1. To pay William H. Engard, for amounts paid by him on liens, filed by the last District of Spring Garden, for water pipes laid, and paving done, in front of his property at Parrish and Sixteenth streets, one hundred and sixty-five dollars.

2. To pay Sarah Clayton, assignee of Field & Francis, for plumbing work done by the latter, by order of the City Commissioners, fourteen dollars.

3. To pay J. G. Fell, assignee of Oliver Brownell, the amount of a warrant drawn in favor of the said Brownell,

by the Highway Department, in 1855, sixty-nine dollars and seventeen cents.

4. To pay Mrs. Amanda Neal, widow of Joseph B. Neal, for the use of rooms for Juries, in full of said claim, the sum of one hundred and twenty-five dollars.

5. To pay Joseph Hufty, for stationery furnished to the Chief Engineer of the Fire Department, previous to February, 1857, the sum of sixty-three dollars and seven cents.

SECT. II. That Warrants for the above appropriations shall be drawn as follows: Item 1, by the City Solicitor; Item 2 and 4, by the City Commissioners; Item 3, by the Chief Commissioner of Highways; and Item 5, by the Chief Engineer of the Fire Department.

## AN ORDINANCE

Fixing the Salaries of certain Clerks of Markets.

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, That on and after the first day of January, eighteen hundred and sixty, the Salaries of the Clerks of the Markets, herein named, shall be as follows :

Clerk of Eleventh street Market, Four hundred dollars per annum.

Clerk of South Second street Market, Four hundred dollars per annum.

Clerk of Markets in Sixth Ward, Four hundred dollars per annum.

Clerks of Markets in Ninth and Fourth Wards, Four hundred dollars, each, per annum.

SECTION II. That all Ordinances, or Sections of Ordinances, conflicting with this Ordinance, be and the same is hereby repealed.

### REPORT OF COMMITTEE ON SURVEYS AND REGULATIONS.

---

*To the President and Members of Select and  
Common Councils of the City of Philadelphia.*

GENTLEMEN: Your Committee on Surveys and Regulations, for the purpose and intent of reducing to the lowest limit the appropriation for the year 1860, that will be required for the Department under their supervision, now ask for another transfer of small amount (\$265) to close up an account, and thus use money that has already been appropriated, instead of burthening the coming year therewith. Item 16 of appropriation of 1859, gives \$650 for grade regulations in 9th section of Blockley; only \$250 worth of work has been done, leaving \$400 of a balance to merge, Then item 22 appropriates \$300 for grade regulations on on the 6 section of Blockley, which has now been com-

pleted and is on record, and has cost \$565, leaving a balance due the Surveyor of \$265. This we desire to have paid and closed up by this transfer, and offer the following Resolution.

#### RESOLUTION

To transfer a certain Item in Appropriation to the Department of Surveys for the year 1859.

*Resolved*, By the Select and Common Councils of the City of Philadelphia, That the City Controller be and is hereby directed to transfer from Item 16 of appropriation made to the Department of Surveys for the year 1859, to Item 22 of the same appropriation, the sum of Two Hundred and sixty-five dollars.

REPORT OF JOINT SPECIAL COMMITTEE.

---

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—Your Committee, to whom was referred the communication of the Chief Commissioner of Highways, relative to what had become of the surplus paving stones removed from the streets upon which rails had been laid by Passenger Railway Companies, make the following Report, with Resolution attached.

*Whereas*, It appears by the Journal of Common Council of May 10th, 1858, to November 3th, 1859, page 287, August 12th, that a Resolution was offered and passed, enquiring of the Chief Commissioner of Highways "under what pretence or right the Passenger Railway Companies claim to be the owners of the paving stones and cubical blocks displaced by them from the streets," &c., &c.

In Appendix to Common Council Journal, May 10th, 1858, to November 4th, 1858, page 237, under date of September 9th, 1858, will be found the communication of the Chief Commissioner of Highways to Common Council, in answer thereto, together with replies of the Frankford and Southwark, Fairmount, and Citizens Passenger Railway Companies, who for reasons therein set forth, claim the ownership of the cobble stones.

By a special request of your Committee, the Chief Commissioner of Highways addressed a note to the various Passenger Railway Companies, under date of November 29th, 1859, enquiring by what authority they claim the cobble stones and cubical blocks displaced by their rails, to which he received replies from thirteen Companies, who therein claim the same for reasons which will appear fully in the answers annexed.

From the remaining Companies, no replies have been received.

In answer to a note of your Committee, addressed to the Chief Engineer and Surveyor, which is hereunto annexed, it will appear that the therein named Companies have used or have in their possession the amounts of cobble stones and cubical blocks respectively attached to their names.

From inquiries made of various parties, who have from time to time, furnished the City with paving stones, your Committee find that 33 cubical feet is called a load, and is sold to the City at from \$2 25 to \$2 75, at the wharf, being an average of \$2 50 per load, and that a load of 33 cubical feet will pave about 6 square yards, which would require 5,216 loads to cover the 31,900 square yards displaced by them, and which, at \$2 50 per load, would amount to \$13,040; in addition to which there is 1500 square yards of cubical blocks, at \$4 25 per square yard, amounting to \$6,375, being a total of \$19,415.

The Committee submit the annexed Resolution, and recommend its adoption.

C. B. F. O'NEILL, <i>Chairman</i> ,	A. L. HODGDON,
HENRY DAVIS,	WM. NEAL,
J. D. NINESTEEL,	JNO. K. LOUGHLIN.

## RESOLUTION

To direct legal proceedings against certain Passenger Railway Companies.

*Resolved*, By the Select and Common Councils of the City of Philadelphia, That the City Solicitor be, and he is hereby directed to take such action in law as may be necessary to recover from the various Passenger Railway Companies, the value of the cobble stones and cubical blocks removed and taken away by them from the streets on which their rails are laid.

OFFICE OF THE CHIEF ENGINEER AND SURVEYOR, }  
*Philadelphia, December 22, 1859,* }

Messrs. DAVIS and O'NEILL,  
*of Special Committee, &c.*

GENTLEMEN:—Your Resolution, directing the Chief Engineer and Surveyor to furnish you the amount of cobble stones and cubical blocks removed by each Passenger Railroad Company, has been received; the press of business in the office has prevented an earlier investigation and reply. I herewith hand you a statement of the exhibit in detail, which may be considered only approximate, yet as accurate as it is possible to lay before you, as the amount of excess of stone depends much upon the character of the paving in which the track was laid, as well as the quality of the stones, for it was to the interest of each Company, (as the street is in their charge after the tracks are laid,) to lay the stone as compactly as possible, and in some instances they have had but little excess. The lines not enumerated in the list, have used their excess in extending their paved surface.

	<i>Cubical Blocks.</i>	<i>Cobble Stones.</i>
Second and Third Streets, - 900 sq. yds.	6,800 sq. yds.	
Chestnut and Walnut Streets, 600 "	1,900 "	
10th and 11th Streets,	4,000 "	
17th and 19th Streets,	3,800 "	
Richmond and Schuylkill,	1,800 "	
Green and Coates Streets,	2,500 "	
Race and Vine Streets,	900 "	
Arch Street and Fairmount,	2,200 "

Gray's Ferry,	2,300 "	
North Branch,	700 "	
	<hr/>	<hr/>
	1,500 "	31,300 "

The Chestnut and Walnut, I return from calculation, but I am nevertheless under the impression that they used the entire amount of cubical blocks taken up to lay alongside the rail.

*Sir:*—In reply to your note of the 29th inst., inquiring by what authority this Company “claims the pebble stones displaced by the road on the streets through which it passes,” I have to say that we hold, that we have an equitable as well as a legal right.

An equitable right, because we place another material in the room of that removed, and also for the reason that we restore the material taken, in making the necessary repairs required of us by the City Ordinances.

And a legal right, under the provisions of the Fourth Section of the Act of 5th May, 1832. (See Pamphlet Laws, page 502.)

I may add, that we never supposed that our right to use and apply these materials for repairs, could be questioned, after the apparent acquiescence of the City authorities, in the similar course pursued in relation to this matter, by the companies whose roads were constructed and in operation long before the road on Tenth and Eleventh streets was commenced.

APPENDIX TO JOURNAL OF COMMON COUNCIL.

The cubical blocks removed from Third street from Market to Vine, were placed along the outside of our railway track in Third street from Vine street to Noble, and in Second from Vine to Poplar streets, except a few cart loads that were used by the West Philadelphia Railway in Market street, alongside of the Western Market House. Those removed from Second street, were first placed in Dock street and then laid down in the same manner as the former, from Pine street to German in Second street.

The cobble stones were hauled, a part of them, to Fifth and Brown, and sold to Hathaway & Lewis, for about one hundred and fifty dollars, and the money since taken to buy cubical blocks, that were placed in Second street inside of the rail. Those removed from the streets south of Walnut street, were hauled on lots down town, where they either are or ought to be now.

In laying said track the cubical blocks were all used in the street along the line of said railway; the pebble stones were used in the repaving of the streets, except such as were broken or unfit for use, which were removed as rubbish; and such of them as were of use were carefully removed and preserved for repairing the streets, which duty devolves upon the Company.

## REPORT OF THE SPECIAL COMMITTEE.

*To the Common Council of the City of Philadelphia :*

GENTLEMEN :—The Special Committee appointed Thursday, December 22d, 1859, to consider and report upon the Resolution and the several Amendments made thereto, authorizing the Mayor to vote the stock held by the City of Philadelphia in the Pennsylvania Railroad Company, at the annual meeting of the Stockholders of said Company, on the 6th day of February, and against any terminus for said Railroad upon the Delaware river, south of Dock street, respectfully Report, That the Committee gave immediate attention to the subject, and met on December 24th, the whole Committee being present. After a free exchange of views on the subject, it was resolved to invite H. C. Wood and Joseph M. Thomas the Directors, who represent the City of Philadelphia in the Board of Directors of the Pennsylvania Railroad Company, together with the President and Vice-President of said Company to meet the Committee on Tuesday, December 27, at 3 o'clock, P. M.

Your Committee met on the day and hour specified—J. Edgar Thompson and W. B. Foster, Jr., President and Vice-President, and H. C. Wood, Director of said Company, being present. They severally responded to the various interrogatories asked by the various members of the Committee, regarding the *terminus*, and other matters appertaining to the subject.

On the following day, December 28th, the Committee met at the office of R. K. Hoxsie, Esq., together with several members of City Councils. Mr. Hoxsie entered into a detailed and most elaborate explanation of his *plans and models* for a proposed Railroad and Tunnel on Callowhill street, with a terminus on the Delaware, at the point where said street touches the river, unfolding, at great length, a *plan* for restoring to Philadelphia the *trade* and commerce that belong to her by right of *location*, but that has, in a great measure, forsaken her.

On the next day, Thursday, 29th, the Committee were informed by means of a communication from W. B. Foster, Jr., Vice-President of Pennsylvania Railroad Company, that on Wednesday, the 28th of December, a stated meeting of the Board of Directors was held, and the question of a choice of terminus being under consideration, they had approved of Washington street, on the Delaware, as the proposed terminus, in conformity with the Resolutions of instructions on that subject, passed by the Stockholders at the annual meeting of said Company, held in the City of Philadelphia, February 7th, 1859.

This action on the part of the Board of Directors consequently bring the labors of your Committee to a close.

In view of this state of things, the Committee beg leave to be discharged from the further consideration of the subject, and ask the adoption of the following Resolution.

#### REPORT OF THE COMMITTEE ON FINANCE.

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Finance, at the instance of the Receiver of Taxes, respectfully present the annexed Ordinance, providing for the employment of Canvassers, to ascertain what taxes have been received by for-

mer Collectors and not paid over to the City, and recommend its immediate passage. The Receiver of Taxes is about to institute suits upon the bonds of several collectors, who appear to be defaulters, but is unable to ascertain the exact amounts due by them, without employing at least six persons to canvass the Wards in which these Collectors were employed, and to ascertain from the tax payers, who appear by the Register of Taxes to be delinquents, what amounts they have paid which have not been accounted for. The Committee consider the measures are of importance, and are satisfied that a large sum of money will be saved by it to the City.

*To the Select and Common Councils  
of the City of Philadelphia :*

GENTLEMEN:—The Committee on Gas Works, to whom was referred the annexed Ordinance, Report that they have carefully examined the same, and find that it is provided in the Ordinance of May 10, 1858, that the Northern Liberties Gas Company are to receive the sum of \$360,000 for their Works, together “with such additions as will fairly represent the proper cost of any pipes or other apparatus that may have been added to said Works, since the 1st day of January, A. D. 1857,” which sum is greater than the amount of the capital stock. The 11th Section of the Act incorporating said Company, provides “that it shall and may be lawful for the city, at any time after the 1st day of July, 1865, to take possession of the Works of the Northern Liberties Gas Company, upon the payment for the same.” In view of these facts, the Committee recommend the adoption of the following Ordinance.

## REPORT OF THE COMMITTEE ON HIGHWAYS.

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Highways, &c., Report herewith an Ordinance, to authorize the opening of Moore street, in the First Ward,”

More than a year ago a culvert was authorized to be constructed along Moore street from the Delaware westward to Ninth street, and along Ninth northward to Morris street, and it was finished some two or three months since, to a point a short distance west of Seventh street.

From this point to Ninth street Moore street is not opened, and the owner of the land through which it will pass, refuses to open it. Three months ago, notice was given that the street would be opened for public use, and the Committee recommend to Councils the passage of the annexed Ordinance for that purpose.

Respectfully submitted by

ANDREW MILLER, <i>Ch'n pro tem.</i>	WM. BRADFORD,
J. D. NINESTEEL,	S. SNYDER LEIDY,
STEPHEN BENTON,	JOHN DYER.
W. W. SMEDLEY,	<i>Dec. 28, 1859.</i>

---

AN ORDINANCE

To authorize the opening of Moore street, in the First Ward.

*Whereas*, Under the authority of a Resolution of Councils, entitled, “Resoulution relative to the opening of certain streets,” approved the 14th day of September, A. D. 1859, notice was duly given by the Highway Department, on the 24th day of September last, to the owners of property through and over which Moore street, from Seventh to Ninth street, in the First Ward, will pass, that at the ex-

piration of three months from the day of the service of the said notice the said Moore street, within the space aforesaid would be opened for public use.

*And Whereas,* The proper drainage of the locality in which the said Moore street is situate, creates a pressing necessity for the finishing of the culvert heretofore authorized to be constructed along the same, which cannot be done while the said street remains unopened. And therefore, Councils deem the public exigency to demand the opening of the said street, which is laid upon one of the public Plans of the city. Therefor,

SECT. I. The Select and Common Councils of the City of Philadelphia, do Ordain, That pursuant to the power conferred upon Councils by the Seventh Section of the Act of Assembly, of the Commonwealth of Pennsylvania, approved the twenty-first day of April, A. D, 1855, entitled, "A Supplement to the Act Consolidating the City of Philadelphia," Moore street, from Seventh street to Ninth street, is hereby directed to be opened for public use, as a street or highway, and the Department of Highways is hereby authorized and directed to cause all obstructions on the line of the said street, within the space specified, to be removed, and the same to be thrown open as a highway.

SECT. II. If the opening of the said street be resisted by any owner or owners of the property over which it will pass, the Chief Commissioner of Highways is hereby authorized to procure a sufficient number of proper and competent persons to become sureties to any such owner or owners, in such sum as the Court of Quarter Sessions of the county of Philadelphia, may direct, conditioned for the payment of any damage that may be assessed and awarded to any such owner or owners, for the ground taken by the opening of the said street. And the Mayor of the City is hereby authorized to pledge the faith of the City of Philadelphia, to indemnify the person entering such security.

## REPORT OF THE COMMITTEE ON HIGHWAYS.

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Highways, Report that the contracts for cleansing the streets and removing coal ashes expired on the 1st inst., that in consequence thereof, from numerous complaints made to the Highway Department, it is essentially necessary that some immediate action be had by Councils, in the matter of delegating authority to proper parties to have the same removed until contracts shall be awarded :—to the end therefore that proposals be published for cleansing the streets &c., and that authority may be temporarily given to remove ashes &c.; they present the following resolution.

## RESOLUTION

Relative to Cleansing the Streets of the City.

*Resolved*, By the Select and Common Councils of the City of Philadelphia, That the Chief Commissioner of Highways is hereby authorized to give public notice that proposals will be received at his office until 12 o'clock M. of Monday, the 30th day of January inst., for cleansing the streets of the City of Philadelphia, said proposals to be made upon the basis of certain specifications to be furnished by the Highway Department, and to be made for the period of eleven months, commencing February 1st, 1860.

*Resolved*, That, until the contracts shall have been awarded, the Department of Highways direct the several Supervisors of the several Districts to have the street cleansed, coal ashes removed, and obstructions to inlets attended to, the cost thereof not to exceed four thousand dollars per month.

## APPENDIX No. 70.

## REPORT OF THE COMMITTEE ON HIGHWAYS.

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—Your Committee on Highways, to whom was referred the petition of Henry St. John O'Neill, asking to be compensated for work done in cleansing the streets of the 7th, 10th, 11th, 12th, and 13th Districts, Report, That it appears from the petition of Mr. O'Neill, as well as from the public records, that the contracts for cleansing the streets were to commence on the first of January, 1859, and continue until the first of January, 1860.

Mr. O'Neill states that his horses and carts were ready to go to work with, on the first day of January, 1859, but owing to the backwardness of Councils in giving the necessary authority to the Highway Department, the contracts were not finally entered into until about the first of March. And he complains that no dirt was removed during the months of January and February, and when he began, he had to remove all the dirt which had accumulated during those two months, for which he has not received any remuneration.

His whole compensation for the year, for the five districts would have been ten thousand six hundred dollars; he claims one sixth of this, \$1,776 66, but in this he does not make any deduction for the cost of removing coal ashes, which was done by persons employed and paid by the City, during those two months.

The Committee therefor, estimate the cost of removing coal ashes, at one half the contract of cleansing the streets, and they therefore recommend the passage of the Bill annexed, entitled, "An Ordinance to make an appropriation to pay Henry St. John O'Neill, for purposes therein mentioned."

JNO. BULLOCK, <i>Chairman</i> ,	ANDREW MILLER,
S. SNYDER LEIDY,	J. D. NINESTEEL,
W. W. SMEDLEY,	ALFRED C. HARMER,
JOHN DYER,	D. C. ENOS.

## AN ORDINANCE

To make an appropriation to pay Henry St. John O'Neill, for purposes therein mentioned.

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, that the sum of nine hundred dollars be, and the same is hereby appropriated to Henry St. John O'Neill, for services rendered in performing extra work, in cleansing the streets of the dirt accumulated in the several districts contracted for by him, during the first two months of 1859.

SEC. II. That Warrants for the said appropriations shall be drawn in conformity with existing Ordinances, by the Chief Commissioner of Highways.

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Trusts and Fire Department, to whom was referred the communication of the Chief Engineer of the Fire Department, informing Councils of the suspension of the Southwark Engine Company, upon complaint made by the Weccacoe Engine Company, for making an attack upon them while returning from an alarm of fire on Friday evening, the 2d day of December; also, for running into their apparatus while proceeding to said alarm—beg leave most respectfully to Report, That they have examined into the merits of the case, and, after a thorough examination of the witnesses as presented by both parties, are convinced that the charges have not been sustained.

They, therefore, present the accompanying Resolution, and ask its immediate adoption.

*To the Select and Common Councils:*

GENTLEMEN:—In accordance with the 8th Section of the Ordinance, entitled, “An Ordinance to re-organize the Fire Department of the City of Philadelphia, approved January 30, 1855,” I herewith transmit to your honorable bodies my Quarterly Report of Fires which have occurred during the quarter ending December 31, 1859, together with the loss, and the loss over insurance.

Respectfully yours,

SAMUEL P. FEARON,

## APPENDIX No. 73.

## A MINORITY REPORT.

*To the Common Council of the  
City of Philadelphia.*

GENTLEMEN:—The undersigned, one of the Special Committee, to whom was referred the Resolution “Requesting the Mayor to attend the annual meeting of the Stockholders of the Pennsylvania Railroad Company and vote the Stock of the City against any terminus south of Dock street,” “together with the amendments thereto,” would respectfully Report, That the Resolution suggests two important questions: First, Is it important to the commercial and manufacturing interests of the City of Philadelphia that the terminus of this road should be at any particular place? And if so, where should it be? The commercial and manufacturing interests of any City are inseparable, for where the one is there will the other be found also, and in as close proximity as they can well get. No City can expect to continue an entire manufacturing one, and have great prosperity, for manufacturers are of necessity drawn to the commercial centre, and, per force, the products of manufacturers. It must have its corresponding commerce, or else its more fortunate rival, possessing the combination, will very soon strip it of its trade by superior inducements.

Philadelphia once boasted of a much greater commerce than she now has, and this was accommodated between Race and Walnut streets, the very same place where the little that is left us is now done. And from here radiates our largest mercantile interests, keeping as close as circumstances will permit. It was to regain this lost commerce and to sustain our large manufacturing interests and increase our business prosperity that our City subscribed so liberally and built this road. I say built this road, for I firmly believe that had she not subscribed a farthing the Pennsylvania Railroad would have been a project yet talked about and not consummated. Fully impressed with the

warning of her commerce and its disastrous results, her intelligent Rulers and shrewd Merchants, knowing we could take the imports, also knew and foresaw that we must have the means of placing the produce of the teeming West upon our wharves, thereby furnishing a corresponding export trade. For the former cannot exist by itself except to blight and impoverish. Is it not for this purpose, then, that Philadelphia subscribed to this railroad? That she might have a direct connection with the West. That her Merchants might have the facility by a speedy and cheap route, to distribute their goods throughout the West, and to have the products of the West placed upon her wharves where they now are and where they were in the days of Girard, Ridgway, Peck, Pratt, and Simons, when our ships visited every sea, thus giving to them activity and industry, where there is now indolence and lethargy. Can it be said that it is not important to the interests of the City of Philadelphia where this terminus should be? and if it is important where should it be? To the solution of this question your Committee invited to their counsels the Directors elected to represent the City in the Pennsylvania Railroad, together with the President and Vice President of said road. At our meeting on Tuesday, December 29th, 1859, there were present with the Committee, Mr. J. Edgar Thompson, President of the road, Mr. Wm. B. Foster, Jr., Vice President of the road, Mr. H. C. Wood, a City Director, and Mr. S. K. Hoxie, a gentleman well versed in railroad matters in all its branches. In the desultory conversation which ensued, several points were named as suitable for the terminus, namely, League Island, Greenwich Point, Washington Dock, Market and Callowhill streets. To the question, Is there any good reason why Greenwich Point should have the preference over any of the other places named? It was stated, none, only that of economy, and there was plenty of room, and in this respect League Island possessed equal advantages. Also that it would require from twelve to fifteen acres, for through freight and coal purposes; and should either of these places be adopted it was not their intention to abandon the present depot at 13th and Market streets. The question of economy seemed to be the very great motive which largely influenced their determination, which doubtless is

a momentous one, when the interests of the City is concerned but of much less importance when their assistance is required by the Marietta and Cincinnati Railroad, the Steubenville and Indiana Railroad, the Pittsburg, Fort Wayne and Chicago Railroad, the very late purchase of the Cumberland Valley Railroad, and other roads, all of these roads have had large sums from this Company, the exact amount I have not been able to ascertain, but I believe it to be between two and three millions of dollars. Three of these roads, (out of the state,) have gone into the hands of receivers, viz: the Marietta and Cincinnati Railroad, a portion of the line of the Steubenville and Indiana Railroad, and the Pittsburg, Fort Wayne, and Chicago Railroad, and I am informed none have paid a dollar in dividend or interest. We further learned that about one hundred thousand tons of through freight, (the coal freight could not be given in the short time allotted,) arrived at the depot, 13th and Market streets, and about sixty thousand tons (through freight) sent from that point in 1858. Of the former, from one-half to two-thirds was consigned to merchants on Water and Front streets, and it is fair to infer that nearly the same proportion of the latter was sent from near the same localities, showing that heavy expense must be attached for drayage, &c., and furnishing a strong reason why this terminus should be near the business and commercial centre.

It was also stated that the question of terminus then under consideration, would in all probability, be determined by the Directors before the next meeting of the Stockholders, whether it would be the next day or not, was not stated. The President of the road gave it as his opinion, that it would be for the interest of the City of Philadelphia to have the terminus near the business centre.

On Wednesday, December 28th, 1859, your Committee were invited to view the plans and hear the explanations of Mr. Solomon K. Hoxie, for bringing the Pennsylvania Railroad under ground by way of Callowhill street, with three tracks, to Broad street, there to establish passenger depots, and from thence to the river Delaware, with two tracks, emerging from under-ground at Front street, on a level with the wharves as they now are. These plans and models have been shown to the public and explained. And

doubtless many of the members of this chamber have both seen them and heard the explanations. It would not be possible to give here a proper description of this project as was presented to your Committee, nor is it necessary as all of us have been furnished with a pamphlet containing a much more elaborate and correct description of the design and purpose than I could possibly give. It has been the work of years to perfect, and suffice it to say that its feasibility and practicability no one pretends to deny. It has received the congratulations and approbation of nearly all the newspaper press of the City. And the plans have been examined by nearly all of the most scientific Civil Engineers of this locality, and the very great interest manifested by Mr. J. Edgar Thompson, in obtaining the charter for this grand and magnificent project, is of itself a sufficient guarantee of its practicability. In a Report to the Board of Directors of Pennsylvania Railroad, made by Strickland Kneass, to whom was referred the various sites proposed for the terminus of this road, which were received in accordance with a Resolution passed at the last Annual Meeting of the Stockholders, he says: "The Callowhill street route is a project that has very great merit, peculiar in its design and entirely practicable." And again, "The plan is singularly adapted to our city, and one that in London would be perfected at a cost of millions sterling."

At the Stated Meeting of Councils, December 29th, 1859, a communication from the President of the Company, informed Councils of the action of the Board of Directors of the previous day. And in consequence of said action, your Committee relinquished the pursuit of further information.

When Councils, Stockholders, and Merchants of Philadelphia and Pittsburg, better understand the discriminations made against Philadelphia and Pittsburg, and in favor of points east and west of those places, then perhaps will be found the sequel to their action. With the result of this action I do not propose to deal; but is it not apparent, with the Camden and Amboy Railroad on the one side, and the Philadelphia, Wilmington, and Baltimore Railroad, and the Pennsylvania Railroad on the other, that Philadelphia will be but a way station, and the Pennsylvania Railroad a feeder to New York.

The following, taken from a prominent Journal, published

in New York, commenting on the late message of the Governor of that State, recommending a tax on Railroads, for the benefit of Canals, seems to me to have much force and a direct bearing at this point, it says: "In other words, the Governor wants to raise a revenue to pay the debts of the State, by taxing traffic to the exclusion of property of all kinds, real and personal. It need hardly be observed, that if there be an interest in the State which a wise legislation should foster and protect, it is precisely that traffic between the West and the seaboard which now flows through New York, fertilizing and enriching the State as it passes. It is the traffic between the seaboard and the interior, which has made New York what it is. It is that traffic which has built up a city of a million of inhabitants at the mouth of the Hudson, and sunk Philadelphia, Baltimore and Boston, to the rank of country towns. It is that traffic which has peopled the great valleys of the interior of the State, and studded that beautiful section with thriving and happy towns. Without that traffic, New York would be no richer, no more important, no more populous, than Jersey, Connecticut, or Massachusetts, it would depend in fact, solely on agriculture and manufactures, and the Empire State of the North would be found elsewhere." There are volumes in this extract. But what produced this precipitate action of the Board of Directors? Would the interests of the road have been entirely sacrificed to have delayed it another two weeks? Or was the Board of Directors fearful that the action of Councils would head them off, and that the interests of the City would be inimical to theirs? This, however, ought not to be, but should be, identical. It must be borne in mind, that the City, at the last Annual Meeting of the Stockholder, did not pass their judgment on the Resolutions under which this Board has acted, as the Mayor at that time had no instructions, and therefore it was perfectly proper that some expression of the City's interest in this matter should be given. And I hold, that at this particular juncture at least, while the question was under consideration, and not acted upon, it was due, that some deference should be paid to a stockholder of one hundred thousand shares.

This event convinces me of the necessity of the City, at all times, instructing her representatives to express her opinion on all questions of importance, that may be likely

to arise at the meetings of the Stockholders of this road, so long as she remains a stockholder, and I therefore recommend the adoption of the following Resolutions.

FRS. B. WARNER.

REPORT OF THE COMMITTEE ON CLAIMS.

---

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Claims, to whom was referred the claim of the executor of Joseph Cohen, deceased, late Prothonotary of the Supreme Court for the Eastern District of Pennsylvania, asking compensation for services rendered by the deceased, by order of the Court, in arranging the papers in his office, and renewing indices of old and worn records, respectfully Report, That they

have carefully examined the claim, and have ascertained, by their own inspection, as well as by testimony submitted to them, that the services claimed for were faithfully and diligently rendered, under the directions of the Court, and that some compensation is due therefor. The sum claimed was eight hundred dollars, but the Committee have reduced this amount to \$500, and believe that this will be satisfactory to the claimant. They, therefore, submit the annexed Ordinance, and ask that it may be passed.

APPENDIX No. 77.

REPORT OF THE CITY CONTROLLER.

OFFICE OF THE CITY CONTROLLER, }  
*Philadelphia, January, 1860.* }

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—By direction of the Act of Assembly, I have the honor to submit herewith the Annual Statement for the fiscal year 1859.

By reference to the accompanying Statement, it will be found that the expenditure for 1859, amounted to \$31,922 97, more than for 1858; but in the expenses of 1859, are two items of extraordinary expenditure, as follows: Expense of laying Water Main to Frankford, \$22,752 33, and cost of extension of the Police and Fire Alarm Telegraph, \$9,625, in all, 32,377 23, which more than counterbalances the increase, and clearly ought not to be counted in the ordinary annual cost of the City. Such an exhibition as this ought to be satisfactory to every citizen, for it clearly evinces that effort has been made to administer the government economically and with success, for in a City growing like Philadelphia, on every side, it would be folly not to expect an increase in her expenditure from year to year.

Great fear has been felt by some, that the tax rate of 1859 would leave the City, at the end of the fiscal, year in such a condition as to make a “permanent loan” indispensable to pay deficiencies. I give you the following exhibit of the indebtedness and resources of the City on the 1st day of January, 1860, from which even the most careless reader will see that such a fear is absurd.

Of the taxes of 1859 outstanding on January 1st, 1860, the sum of \$157,000 has been collected since that date, and it is believed that by the 1st of April, sufficient will be collected to pay all demands against the City prior to January 1st.

I am happy to bear testimony to the energy and zeal evinced in the past year, in every department contributing to the revenue of the City. In the Department of the Receiver of Taxes, there has been no effort spared to collect the revenue from the delinquent taxes. By reference to the Report, it will be seen that the sum of the delinquent taxes collected in 1859, was \$663,717 18, against \$511,037 06, collected in 1858. The Department of Law has also made a marked improvement, increasing its returns to the Treasury from \$28,664 11, to \$53,758 25. While by the wise measure of a re-assessment of Water Rents, the revenue of the City from the Department of Water, has been increased over \$100,000. All these are the results of the introduction of more system into the management of the several Departments. The experience of another year has but served to confirm my confidence in the recommen-

dations made in the introduction to my Report of the last year, 1858, and I would commend those suggestions again to Councils—not because I am wedded to my own opinions, but because my official connection with the several Departments gives me great experience of what is required to make them work more smoothly, than can possibly be obtained by any one from a partial examination. To those suggestions I can but add, that in my opinion there should be legislation demanded upon the subject of taxation for City purposes. The Fire Department is a large expense to the City, while the advantage and profit of it inure to the benefit of the various Insurance Companies which pay nothing to the City by way of taxation upon their privileges. I would suggest the creation of a Committee to inquire into the subject of increasing the revenue of the City, in order to relieve real estate of the excessive burden of taxation.

The system pursued in the Water Department, of charging a penalty upon rents not paid at a given time, might be applied with good effect to the collection of taxes. The taxes should be made due in July or September of the years for which they are levied, a discount allowed for payment before maturity, and a heavy penalty charged upon delinquents—by this means it seems to me that a much heavier amount of taxes would be collected, and the City saved from the necessity of temporary loans.

Entering, as we are now, upon a new year, and with a low tax rate, it will not be deemed presumptuous in me to urge upon Councils the strictest economy in appropriating the public funds—and to guard by the strictest system of itemizing the expenditures of each and every Department. Such a course on the part of the legislative branch of the government, will prevent the executives from exceeding the provisions made for 1860.

Very respectfully, yours,

GEORGE W. HUFTY,

*City Controller.*

\* I cannot find any trace of these items being outstanding, and will therefore close the accounts. I deem it due to my Department to make the remark, that the errors which are made so apparent in the statements of Outstanding Warrants of 1855 and 1856, are in no way chargeable to my administration, but are the result of the careless manner in which the City accounts were kept heretofore. A true and correct statement of Warrants outstanding for 1854, 1855, and 1856 never was given, and it seems almost impossible to arrive at it from the books which I found in the Department. The utmost that can be done is to guard against Warrants for those years being twice paid.

A comparison of this statement, with the statement of the same item on page 66 of the Controller's Report of January 1, 1859, will show a marked difference. The item of "Unclaimed Interest," \$51,119 40 being an error, was taken from the books. There was reported of "Highway Warrants" as outstanding, \$20 888 23; but such was not the fact, for the sum of \$23,609 of Highway Warrants of 1856 reported outstanding Jan 1, 1857, were drawn upon Road Damage Loan and paid within the year 1856; hence they could not have been outstanding. These errors are now corrected.

\*Every effort has been made to trace these Warrants, but without finding anything to lead to the belief that they are outstanding. They will be carried forward upon the books of 1860, and if none of them come in, they should be taken out of the statements as part of the indebtedness of the City.

## APPENDIX No. 82.

## REPORT OF THE TRUSTEES OF THE PHILADELPHIA GAS WORKS.

---

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN :—The Trustees of the Philadelphia Gas Works, in presenting their Twenty-fifth Annual Report, beg leave to congratulate Councils and their fellow-citizens on the flourishing condition of the department of the City Government under their immediate control.

On the 1st of April last, the Trustees concluded with the Manayunk Gas Company for the purchase of their Works, Mains, Services, and Meters, and paid for the same as directed in the Ordinance of May 10, 1858, entitled, "An Ordinance for the further extension of the Philadelphia Gas Works."

The original intention of abolishing the manufacturing department at that station, has been postponed for the present, the Engineer not believing it prudent in the face of so great an increase in the consumption of gas, to abolish it, at least until the new additions to the Works at Point Breeze, now in course of construction, shall have been completed. In anticipation, however, of that event, a main has been laid, commencing at Nineteenth and Hamilton streets, in the Fifteenth Ward, and extending along Nineteenth street to the Ridge Turnpike, and thence along said Turnpike until it found a connection with the pipes of the Manayunk Gas Works, in the Twenty-first Ward.

By this means a large number of the inhabitants of the upper part of Germantown and Chestnut Hill, besides a large and growing district, lying between Chestnut Hill and Manayunk, have received an additional supply of gas, for the want of which many complaints had been made for the last year. The distributive capacity of the mains in that direction is now considered sufficient to supply the demand for gas in that large and flourishing portion of the City, for several years to come.

Under authority of a Special Ordinance, passed by Councils on the 22d day of October, 1859, the Trustees have purchased from the Kensington Gas Company, all their Works, which consisted entirely of Mains, Services, and Meters, they having no apparatus for manufacturing gas, no gas holder, nor even a Station Meter, but receiving their supply of gas directly from the Works of the Northern Liberties Gas Company, who collected all the bills from the customers of the Kensington Company, and paying over to the latter the amount, after deducting a stipulated price per one thousand cubic feet, for the quantity of gas consumed, and have paid for the same in cash, agreeably to the terms and conditions of the aforesaid Ordinance.

After the purchase of the above named Works, it became necessary to connect them with the City Works by a main, commencing at Broad street, south of Girard Avenue, and connecting at several points with the mains of the Kensington Company. This proceeding, the Northern Liberties Company at first threatened to resist, but afterwards abandoned their position. Their objection was that the above main passed through a portion of the old District of Northern Liberties, over which they alleged, as a Gas Company, they had exclusive control.

During the last summer, there has been erected at Point Breeze, a new Retort House of nearly similar dimensions and capacity to the one already in use there, under the authority granted to the Trustees by the Ordinance of Councils, dated March 26, 1859. And there also have been erected, an additional Purifying House, a Blacksmith and Carpenter Shop; the whole built of stone, with iron and slate roofs, and in the most substantial manner.

The construction of these buildings has been principally under the superintendence and direction of Dr. Charles M. Cresson, the first Assistant Engineer of the Works, who has attended most faithfully to the purchase and delivery of the materials on the ground, and has carefully guarded against all extravagance or waste in their use; besides making all the architectural plans and drawings with but very little additional expense to the Trust. His labors during the whole time of the building, will average from fourteen to sixteen hours per day. It may be proper to

add, that he has been ably assisted by Mr. George S. Gay, the second Assistant Engineer.

The buildings are now nearly finished, and a part of the new retort is in full operation. The remainder will be in readiness as soon as they are required.

The additions made to the Department of Distribution during the present year, are without parallel in the annals of Gas Lighting in this, or perhaps any other country. The length of mains added since the passage of the Ordinance authorizing Loan No. 10, in March last, is something over eighty-three miles. Of this amount, over sixty miles have been laid by the Trust, and the balance, by the purchase of the Manayunk and Kensington Works; which being added to the length previously in use, will make a total of three hundred and thirty-nine miles now belonging to the City and under the control of the Trustees. The number of services and meters set during the year, has been 4,380, and the whole number now in use is 36,277.

The whole number of cubic feet of gas made during the year, has been over 562,000,000. The largest amount made in any twenty-four consecutive hours, occurred on the 24th of December, and the largest consumption in the same period of time, was on the same day, and amounted to over 2,700,000 cubic feet.

A full and detailed account of these and all other matters connected with the Works, will be found in the Report of the Engineer, herewith submitted, under whose direction and guidance Philadelphia can now boast of the most complete Gas Establishment on this continent.

The subject of public lighting having occupied the attention of the Trustees for some time, a Committee of the Board, in December last, had a conference with a Special Committee of the Gas Committee of Councils, which resulted in an agreement, that the price of lighting the public lamps should be reduced from \$38 42 to \$36, which includes, besides the gas consumed, the lighting, extinguishing, cleansing, and repairing. This reduction the Trustees were enabled to make owing to the fact, that they are not now obliged to purchase the gas for the public lamps, except in the Northern Liberties, from the different Gas Companies, as heretofore.

The whole number of public lamps now in use, is six thousand one hundred and three.

The saving to the City for this present year will be about \$15,000, and will be always increasing in proportion as other public lamps become necessary. This result is one of the evidences of the wise policy of consolidating the different Gas Companies.

As it has now been finally determined by the Directors of the Pennsylvania Railroad Company that their eastern terminus shall be at Prime Street Landing, on the Delaware river, it may not be amiss for Councils to take into consideration the propriety of having a lateral railroad built from a point east of Gray's Ferry Bridge to the Point Breeze Works. By this means the Works will be enabled to receive their coals direct from the cars of the Pennsylvania Railroad, at a saving of some 25 to 30 cents per ton.

The estimated amount of coal that will be required at that station for the next season, will be about 30,000 tons and will be every year increasing; and when it is taken into consideration, that the whole length of the road required to be made, would be about the half of a mile, the necessity of having it in readiness as soon as the Pennsylvania Railroad Company have made the connection with that of the Baltimore and Prime Street, will be apparent to Councils. The saving in expense will be sufficient, in about two years, to cover the whole cost.

All the proper additions to the Sinking Fund have been made, up to the 1st instant. The whole amount now is \$1,109,865 80, and is composed entirely of City and Gas Loans. A full and detailed statement of this and all other financial matters relative to the Trust, will be found in the Report of the Cashier, hereunto annexed.

ANDREW C. CRAIG,

*President.*

Attest—JOHN P. MURTA, *Register.*

## ENGINEER'S REPORT.

*To the Trustees of the Philadelphia Gas Works :*

The undersigned has the honor to lay before the Board of Trustees his Twenty-fourth Annual Report of the condition of the Works confided to his care, and the results of their operations during the year just closed.

The several factories belonging to the Trust have produced, in the year 1859, 562,110,000 cubic feet of gas, of which 202,313,000 cubic feet were made at the works in the First Ward ; 230,054,000 in Ninth Ward : 126,020,000 in Fifteenth Ward, and 3,723,000 at the works in Twenty-first Ward.

The whole quantity that has been made under the Trust, from its commencement, is over forty-two hundred million cubic feet, or, in exact figures, 4,240,406,000 cubic feet.

The largest consumption in twenty-four hours was 2,700,000 cubic feet, on the 24th of December, on which day the quantity made reached an equal amount.

The materials used in making gas are, as shown in the annexed tabular statement :

			<i>Tons.</i>

			<hr/>
			2,026,928
			<hr/>

There has also been used 112,909 bushels of lime in purifiers, and 671 cords of wood.

The maximum number of retorts continuously in use at the works in First Ward was 144; in Ninth Ward, 207; in Fifteenth Ward, 108; and in Twenty-first Ward, 9. The average being in the First Ward 93; in the Ninth Ward, 133; in the Fifteenth Ward, 79; and in the Twenty-first Ward, 6. The greatest number at work at one and the same time, in all these works, being 468.

The largest daily average yield of each retort in the year was 7,715.

The largest quantity from each pound of coal respectively made, for any full day's work, was 4.74 feet.

The number of meters and service pipes put in at new places has been:

In the Wards comprising the old City,	-	-	1,004

In all,	-	-	4,510
			<hr/>

Making a total of meters and services set, during the year 1859, 4,510. Adding those reported last year, and those transferred to the Trust by the Manayunk and Kensington Gas Companies, makes the whole number of meters now in use 36,311, and 36,426 services.

The number of applications registered during the year, including all those on the books of the private Gas Companies transferred to Trust, has been :

At Seventh street Office,	-	-	-	9,184
" Spring Garden Gas Office,	-	-	-	3,316
" Twenty-first Ward "	-	-	-	601
" Twenty-second Ward Office,	-	-	-	360
" Twenty-third " "	-	-	-	184
" Twenty-fourth " "	-	-	-	363
				<hr/>
				14,008
				<hr/>

Deducting from these the removals and discontinuances, amounting to 6,381, and adding the number of previous consumers, shows the whole number of gas consumers at the present time on the books of the Trust to be 37,580.

The lights added during the year, including those transferred by private Gas Companies, are as follows :

Old City,	-	-	-	-	15,244
Spring Garden and Penn,	-	-	-	-	12,967
Southwark,	-	-	-	-	4,450
Moyamensing,	-	-	-	-	4,387

Previously in use,	-	-	-	-	374,446
					<hr/>
Total,	-	-	-	-	436,227
					<hr/>

The public lamps now in use amount, in all the Wards supplied from these works, to 4,962.

The length of street mains laid during the year has been 314,003 feet; received from Gas Companies 128,419 feet—making the entire length of mains belonging to the Trust 1,790,865 feet, or 339 miles.

In every department great activity has prevailed since the passage of the Ordinance of March 26th, 1859.

The extension of street mains had been most urgently desired by a large body of citizens resident in every quarter, and it was deemed only just to those who had been long waiting, that the utmost despatch should be given to the fulfilment of their reasonable wishes. As rapidly, therefore, as the pipes could be obtained from the manufacturers they were laid down, and brought into use, with such an equitable distribution of the work over the different localities as appeared most likely to give general satisfaction.

With such energy was this work carried on, that as much as 45,000 feet of main pipe was laid down in a single month, and the aggregate result of the operations of the season in laying new mains, and making connections with those purchased from the Manayunk and Kensington Gas Companies, has been the addition of 82 miles of street mains, over 20 miles of service pipes, and nearly 7,000 new customers to the establishment.

This unprecedented increase of the means of distributing gas to consumers confirmed the expectation previously entertained of the necessity for making considerable additions to the means of supply.

The preparations for this part of the work necessarily consumed much more time than those for distribution; and it was not until past midsummer that the principal castings needed for the erection of the requisite buildings were delivered on the ground. After the receipt of these, the work was prosecuted with all possible dispatch, and before the close of the year gas was manufactured in the new retort house.

The buildings erected comprise a retort house 250 feet long, 57 feet wide, and 57 feet in height from the foundations.

A purifying house 111 feet by 58; a boiler house 46½ feet by 25 feet, and a range of workshops for the smiths, fitters, and carpenters, 350 feet in length by 28 in width, all built of durable sandstone, and roofed with slate or iron. A substantial bulk head of timber, secured by heavy piling, driven by steam power, has been constructed along the entire river front of the Gas Works Estate, south of the wharf, for securing effectually this valuable front of more than eight hundred feet from the encroachments

which the river has been making upon it during every successive flood.

There has also been constructed a large tar cistern, 40 feet in diameter and 20 feet deep; a number of small cisterns to serve as lime traps, to remove this sedimentary deposit from the drain culverts; a second hoisting tower at the wharf, working with hydraulic machinery; and additional railway tracks, 2,300 feet in length, for the conveyance of the large amount of heavy materials that have to be moved to and from various points on the premises.

The propriety of carrying on these enlargements promptly has been made evident by the fact that before the close of the year, and prior to the connection with the Kensington mains the consumption of gas reached the amount of 2,700,000 cubic feet in twenty-four hours, which is the quantity estimated as the maximum of the daily capacity of all the Works heretofore in use.

The increase of gas manufactured over that of the previous year is 82,000,000 cubic feet, which, by a curious coincidence, is just one million feet for each mile of main pipes added in the same time.

A part of this increase was needed to meet the additional waste of gas incident to blowing out and filling the large extent of new mains and making numerous connections, and a still greater portion from the waste caused by numerous breakages of mains by the giving way of the ground adjacent to culverts in course of construction; the latter cause having produced more serious loss of gas than has ever before been experienced.

It is quite evident that the large amount of new work in the various departments, carried on simultaneously at numerous remote points, must have required diligent and unremitting attention by the agents to whom it was entrusted, and it gives me pleasure to report the general good conduct and faithfulness of the officers and employees of the trust in the discharge of their various duties.

A sense of justice demands a more special notice of two of these officers, upon whom has devolved the principal share of executive responsibility. These are the Superintendent of Distribution, Mr. John A. Miskey, and the First Assistant Engineer, Dr. Charles M. Cresson. By the former, the numerous and widely distributed extensions of

the street mains has been conducted in conjunction with the superintendence of the public lighting, with a degree of diligence, perseverance, and skill meriting the highest praise.

He has, without reserve, devoted his attention and energies to these duties at all hours, both by day and night, as the work required; and it may be confidently asserted that no similar series of gas mains has ever been laid down with more complete freedom from the defects to which such work is liable.

A remarkable proof of the perfection attainable in making the joints of gas mains has been afforded during the year, on the introduction of gas lights into Logan Square. The cast iron pipes for this purpose were laid by the Gas Department nearly eight years ago, but the connection with the street pipes was not made until the last summer, when the placing of the lamps was ordered by Councils.

Upon testing the pipes by means of the Prover's pump, before introducing gas, they were found to be completely air-tight, notwithstanding the fact that during the time since they were laid, the grounds had been filled up with earth, so as to bring the pipes, in some places, eight or ten feet below the present surface.

Upon the second named officer have devolved duties no less important and arduous. He has been charged with the superintendence of the manufacture of gas in the First and Fifteenth Wards; the direction and supervision of all the new structures at both these stations; the daily arrangement of the storage and distribution of gas at all the stations—six in number; and the management of the entire system of telegraphic communication between the various offices of the entire establishment. In the performance of some of these duties, he has been efficiently aided by the Second Assistant Engineer, Mr. George L. Gay, but a large share of them are of a nature not to be delegated, but must necessarily devolve upon the officer directly responsible, who has been obliged to devote to them his personal attention during more than one hundred hours of each week, and not seldom for twenty hours continuously.

The example of a public officer giving his whole time and energies to the duties of his station with the same zeal and devotedness as marks the administration of private

affairs, is always entitled to public commendation, and I therefore esteem a social duty to present this official testimonial to these two instances of conscientious and complete fulfilment of every official function.

There yet remains to be completed some parts of the purifying apparatus, another coal store, and some additions to the capacity of gas storage, which has no longer sufficient surplus, beyond the daily working in the winter months, for the required security and economy in these operations.

In making the latter improvements they may be so arranged at suitable stations as to promote very much the equal and regular supply of gas to all parts of our widely extended system of distribution. Proper sites for these distributing stations may be obtained without much, if any outlay of money, by the sale of real estate received from private Gas Companies, and investing the proceeds in other ground more eligibly located, if Councils authorize such sale or exchange.

Among the many subjects of a practical character that engage the attention of the Gas Engineer, none has given rise to more solicitude than the choice and management of gas meters; upon the accuracy and unvarying action of which the interests of both consumer and producer are in a great degree dependant; the former for his fair and uninterrupted supply of the commodity he pays for, and the latter for securing the due returns for his outlay of material and labor.

All these desirable results are obtained in great perfection from the instrument ordinarily known as the wet meter, so long as it is duly protected from frost and evaporative heat.

Various contrivances have been suggested and tried for securing the instrument from these injurious influences.

The most general practice is the substitution in part, or wholly, of alcohol for water as the hydraulic seal: but while this guards against freezing it gives rise to much inconvenience by reason of its rapid evaporation and want of sufficient specific gravity, which oftentimes cause a sudden obstruction of the flow of gas at the moment when the stoppage is most inconvenient to the consumer.

A liquid, free from these objections, has long been de-

sired, and after numerous experiments, I had reason to suppose I had discovered it in the solution of neutral chloride of calcium.

Accordingly, in the year 1843, I introduced this liquid into several hundred meters for the purpose of giving it a fair practical test. It did not freeze at the lowest natural temperature of our climate, and the strong affinity of the salt for water prevented rapid evaporation; while its specific gravity being greater than that of water, gave full support to the valve float and effectiveness to the hydraulic sealing. The results of the first year of trial were entirely satisfactory, and the liquid was then used in all the exposed meters with equally good results. But the expectations encouraged by two years of trial were dissipated at the end of the third year, by which time the metals of the meter showed such unmistakable evidences of the destructive action of the solution as lead to its immediate abandonment. More recently I have been giving trial to another liquid with encouraging prospect of success. It is the inert substance obtained from fatty bodies, and known by the name of glycerine: it is capable of resisting our lowest natural temperature, maintains its fluidity very pertinaciously, and is considerably heavier than water. Should it manifest no injurious action on the meter, metals, or other defects, it will completely meet the wants of the instrument. A more direct method of escaping these liquid imperfections has been attempted in the use of the so-called dry meter, working on the principle of the ordinary bellows with diaphragms connected by flexible joints. A trial of these on a large scale, during the years 1847-'48, revealed imperfections which impaired their trustworthiness so greatly as to require their entire disuse. Within a few years sundry improvements have been made in the construction of the dry meter, intended to remove the imperfections before mentioned, which seem to have sufficient merit to justify another trial. This has been in progress for nearly three years, with results, thus far, quite favorable; and if these shall be confirmed by large and more extensive trial, the annoyances that have so long attended this part of gas machinery may be happily terminated.

The experiments reported last year as being in progress upon various methods, and materials proposed for the pro-

duction of illuminating gas, have been continued during most of the year. The difficulties alluded to in my former report have since been found constantly incidental to the peculiar process in which they occurred, and whenever the mode of working has been varied in such way as to remove them the diminution of useful products has reduced the economy below that of other processes previously in use. It is not intended to abandon these experiments, but it is thought best to continue them upon a moderate scale, making such variations from time to time as may be suggested by farther experience either in our own or other factories.

In conclusion, I beg permission to express my grateful sense of the uniform confidence and courtesy it has been my good fortune to experience at the hands of the Board of Trustees during the whole term of our official connection; and farther, to bear testimony to the disinterested zeal, devotedness and intelligence with which this important public trust has been administered by them during nearly a quarter of a century.

Very respectfully,

JNO. C. CRESSON,  
*Engineer.*

The Trustees respectfully take this occasion to remark that the works under their charge continue to be managed in the most approved and economical manner, consistent with the preservation of a permanent condition of buildings and general machinery, and with the production of a pure and highly illuminating quality of gas; and that agreeably to the requisition of its charter, the Company furnishes gas to the public lamps within its district at the extremely low rate of one dollar and twenty-five cents per thousand cubic feet. The value of the extensive real estate belonging to the Company, has greatly enhanced since the establishment of the works in 1838, and as by a provision of the Act of Incorporation, they may be purchased in the year 1865 by the City of Philadelphia, it cannot be doubted that they will then prove to be a very desirable institution, continuing their efficiency in supplying the cheapest and best artificial light yet discovered.

#### APPENDIX No. 84.

OFFICE OF THE MAYOR, }  
*January 26th, 1860.* }

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The communication of an annual statement of the condition of the city in relation to its government, finances, and improvements, is obligatory upon the Mayor, and with the fulfilment of that duty he may opportunely present such measures as he deems expedient for its welfare, and recur to events belonging to the history of its past year.

The administration of the municipal ordinances remains embarrassed from their frequent inconsistencies, and the

irregularity of their jurisdiction ; few changes having been made in their provisions since the consolidation of the city. This perplexity will be remedied when the codification of those laws shall be completed by the experienced and able Commissioners to whom it is entrusted.

The system of the municipal government of Philadelphia fails to centre in the Mayor, the general powers needed for its prompt and efficient administration. If the several departments could be placed in such relation to his office that he might regulate their functions, not by interference with the subordinate officials, but through the respective chiefs, he might assume the responsibility with which he is now improperly charged. Except so far as relates to the immediate supervision and direction of the police force, a duty which might advantageously be devolved upon a chief acting under his control, the Mayor of Philadelphia is without authority to remedy any mal-administration which in his general care of municipal affairs he may discover, or to redress the grievances forced upon his attention. The Act of Consolidation in requiring the Mayor "to be vigilant and active in causing the laws and ordinances of the city to be duly executed," did not design that he should exercise the mere functions of a Superintendent of Police, and yet it has omitted to invest him with the power essential to a full discharge of the duty which it thus enjoins. The machinery of government, like that of physical forces, requires one regulating power; without which, however nicely its various parts may be adjusted, there will be neither unity nor efficiency of action.

A prosperous condition of the city finances through the earlier months of 1859, was towards its close succeeded by the usual embarrassment that has marked the end of each fiscal year, where not averted by any special relief.

The influx of revenue from the payment of overdue taxes, and from other sources at the beginning of each year, after discharging previous liabilities, may with current receipts for a while defray the municipal expenses. As the receipts of the treasury gradually diminish, without any corresponding decrease in its disbursements, recourse is naturally had to temporary loans, in the futile hope that the contributions of tax payers will afford means to refund those advances and to discharge the demands of its other

creditors. But the account for each year, since consolidation, shows that at least twenty per cent. of its assessed taxes have remained unsettled at its termination—and such must continue to be the case until some system shall be adopted for their collection, that will induce payment in the earlier part of the year by judicious premiums, and afterwards compel it through sufficient penalties.

The aggregate receipts of the Treasury during 1859, were \$5,230,185 55, comprising besides ordinary revenue, the proceeds of temporary loans, and also of portions of specific permanent loans.

The balance, January 1, 1859, was \$197,383 31, making the total amount with which the Treasurer was chargeable \$5,427,568 76. The payments thereout, including return of temporary loan and due appropriation of the proceeds of the permanent loans, were \$4,666,131 28, leaving in the Treasury, January 2, 1860, \$761,430 48, to provide for the semi-annual interest on the funded debt, and towards the payment of that part thereof which has just matured.

By the Annual Report of the City Controller, it appears that the funded debt of the City of Philadelphia amounted to \$21,010,486 56; of this debt \$939,547 94 mature during the present year, and for its repayment a loan of \$700,000 was authorized by Ordinance of December 10, 1859, which with the available proceeds of investments of the Sinking Fund of ten millions, will be ample for the purpose.

The Commissioners of the Sinking Fund have now under their care, twelve distinct funds, provided for the redemption of the City debt, to which will be added a new Sinking Fund for the recently authorized loan of \$700,000.

The credit to the account of each of these different funds on the 2d of January, 1860, was as follows:

Sinking Fund of		LOANS.	CASH.
Loan of	\$10,000,000	\$171,096 26	\$444 95

The Sinking Fund of ten millions has, during the past year, provided for the redemption of \$76,875 99 of the loans maturing within that period—being the entire amount of such loans presented for payment—leaving \$40,377 27 of the debt supposed to have fallen due in 1859, yet uncalled for.

From the same source, \$38,295 22 of the debt due prior to 1859 was also redeemed, making a total of \$115,171 21 paid during the past year from the proceeds of its investments.

That the amount and time of maturity of the several municipal loans, most of which were created before the consolidation of the City, may be definitely ascertained, a system of registration has been adopted, under which no interest can be paid until the presentation of the certificates of debt for endorsement, or, if that be impracticable, until their accurate description be filed with the Treasurer.

The Statement of the Controller exhibits an indebtedness of the City on the 1st of January, 1860, for ordinary liabilities, of \$926,696 43, and assets for their liquidation \$591,194 56 in cash, besides \$623,301 77 of the unpaid taxes of 1859, leaving an apparent credit of \$287,799 90.

This nominal balance must, however, be largely diminished for allowances to tax payers and errors in assessment, the amount of which cannot yet be accurately determined.

The Receiver of Taxes, in addition to the usual duties of his Department, has, under the direction of Councils, been engaged in a condensation of the registry of taxes antecedent to 1859.

After a careful revision of the records of the years 1854-5-6-7-8, the outstanding taxes for which upon the books of the Controller have been estimated as \$831,291 84, it appears that the aggregate balances of those years only

amount to \$318,945 00, of which, from various causes. \$90,000 00 are but nominal—thus reducing to \$228,945 00 the sum to be realized from such claims.

The variance in the exhibits of these two departments, is occasioned by a want of cognizance on the part of the Controller, of the allowances annually granted to tax payers, and of the errors admitted by the City Commissioners for duplicate assessments, the books of his department presenting as the outstanding amount for each year the difference between the sum of the gross duplicates and of their cash receipts.

A change in the mode of assessing taxes is, in my estimation, not only desirable but essential to the financial necessities of the city.

Few of those elected Assessors have the requisite information to qualify them for the appraisement of real estate, but usually rely for their returns upon the valuation made by their predecessors in office. It not unfrequently happens that properties having a like recognized market value, if located in different wards, vary largely in their assessment, and thus, from the incompetency or partiality of Assessors, the citizen is liable to improper exactions, or may be unduly exempted from his just proportion of the public burden. Nor is the present system faulty in its appraisement only, but also in its great uncertainty of the location and dimension of the premises subject to taxation, and is even chargeable with frequent omissions of property from any assessment whatever.

The establishment of a Board of Assessment, in lieu both of the present Board of Revision and of the ward Assessors, to be composed of at least five citizens whose experience in the value of real estate might enable them to adjust its fair appraisement throughout the city, would it is believed, to a great degree, prevent the uncertainty and inequality that now exist and afford but too valid causes of complaint.

The rate of taxes to be levied for the current year, by an Ordinance of Dec. 14, 1859, was fixed at \$1 75 on each hundred dollars of assessed valuation. The annual rate of taxation has never before been determined by Councils until after the general appropriations for the year have been granted—except in the year 1854, immediately upon

consolidation, when such course was justified by the peculiar circumstances of the city.

The Mayor cannot assume that the rate fixed by Ordinance will not suffice for expenditures yet unspecified, but if the supplies to the several municipal departments were definitely ascertained, he would be enabled to decide whether the revenue to be derived from the tax levy will, with the other income of the city, prove adequate to the estimated demand upon the treasury. Having been thus precluded from the exercise of judgment upon the sufficiency of the tax rate, and yet without the opportunity of assigning any legitimate objections to its approval, I have assented to the Ordinance; but I cannot refrain from again urging upon the City Councils the necessity for their utmost economy of appropriation, if the credit and solvency of the city are to be maintained.

From the report of the City Solicitor it will appear that the appropriations to his department amounted to \$34,200 00, of which \$27,363 23 have been expended.

By his assiduous efforts, and those of his assistants, \$50,757 25 have been collected from municipal claims, which in 1857 yielded only \$32,750 66, and in 1858, \$38,893 66.

The costs incident to the complete legal process on each claim amount to \$35 50, and are regarded by the owners of property subjected to municipal lien, as undue exactions. In many cases where default in the payment of municipal claims is to be attributed to inability rather than to wilful neglect, the imposition of these costs to their full extent is oppression. The subject merits the consideration of Councils, although the remedy must proceed from the legislative power of the State.

Since the Act of April 12, 1859, the collection of registered taxes has been transferred from the Solicitor's department to that of the Receiver of Taxes, occasioning a modification in the arrangements of each of these departments.

The practice by owners of suffering liens of registered taxes, and of municipal assessments for water pipes, paving, &c., to be entered against their property, and of repurchasing such property at sheriff's sale discharged of those liens, frequently for a sum less than the accrued

legal costs, has become so prevalent as to demand special legislation. The annual loss thus occasioned to the revenue of the city cannot be definitely stated, but unquestionably is of large amount.

The liens of prior ground-rents and mortgages are protected from discharge upon sales for taxes or municipal claims, and when, as is frequently the case, such previous incumbrances equal the market value of the property, the city is debarred from the receipt of its revenue and upon judicial sale of the estate parts with its supposed security therefor, although its expenditure in improvements may have enhanced the value of the incumbrances by which its claim is defeated. If, without affecting the validity of the prior incumbrances, the city might purchase all property sold by the sheriff, whenever its claim for taxes or assessments will not thus be realized, and might retain the title, without liability for accruing rent or interest, thus preventing its further alienation until such municipal charges shall be paid, no loss of revenue could be apprehended. There appears no just reason why the injudicious or fraudulent incumbrance of real estate should, by absorbing the value thereof, be permitted to avoid the collection of municipal revenue; but in all such cases whatever inconvenience or loss is to be suffered should fall upon those who have caused it, and should not be shared by the whole community.

The supervision of the Department of Surveys has been given to the construction of the four main culverts under contracts authorized by the Ordinance of February 27, 1858. Of these, the culvert in Vine, west of Nineteenth street, has been completed, and the others known as the Moore street, the Cobocksink, and the Twenty-fifth street culverts have been advanced to as great extent as the peculiar difficulties of each work and the unusual rains of the past season have permitted. The expense of their construction has been provided for by a permanent loan of \$200,000, under the Ordinance of October 1, 1858. Of this loan, or its available proceeds, the sum of \$105,883 05 remains unpaid, inclusive of \$24,633 03, the percentage reserved until the fulfilment of the respective contracts.

The sanitary importance of these culverts can hardly be over-estimated, and their benefit in a financial view is

worthy of consideration. The impurities from manufactories and public institutions which hitherto have been poured into the Schuylkill, above the source whence the city is supplied with water, will be diverted to a lower point of egress—the filth and noxious matter deposited on the banks of the Cohocksink and other creeks will pass away harmlessly with their current, thus withdrawing from populous districts the prolific causes of disease, while numerous sites, previously unfit for habitations, will be susceptible of improvement, affording an increase of value for the purposes of taxation.

In addition to the progress of these main lines, numerous branch culverts or drains have been constructed, in accordance with the provisions of the Ordinance of November 11, 1858, entirely at the cost of the owners of adjacent property, which to an extent of 22,632 feet have been reported to this department. The new drainage of various kinds provided for the city during the past year amounts to 8  $\frac{1}{2}$ -10 miles in length. The sectional surveys during the same period have extended over an area of 6,200 acres, comprising 220 miles of streets. The dedication of new streets to public use as the interest of property owners may dictate without regard to the adopted official surveys, will, unless regulated by Ordinance, prove the source of much future inconvenience. No such dedication should be accepted by Councils until the Board of Surveys report upon its expediency and its pertinency to the general plan of municipal improvements.

An iron draw-bridge over Frankford Creek has been substituted for the old structure, affording greater security to travel, and enlarged facilities for the passage of vessels.

The Market street, Suspension, and Girard Avenue bridges, whilst believed to be perfectly secure, will require for their better preservation the repairs suggested by the Chief Engineer in his annexed report.

No effectual measures have yet been adopted for the erection of the contemplated bridge over the Schuylkill at Chestnut street, although it has been long demanded for the public convenience.

The appropriation to the Department of Surveys in 1859 was \$25,400, of which \$23,767 87 have been expended.

The disbursements of the Highway Department for the current expenses of 1859, have been \$422,649 98, in addition to which \$28,382 86 have been paid for the indebtedness of former years. Its receipts have been \$21,277 80, or nearly \$4,000 less than the anticipated amount. The communication of the Chief Commissioner affords abundant evidence of the propriety of making the official term of every disbursing officer commence with the fiscal year. If, as has frequently been the case, an undue proportion of the annual appropriation be expended by a retiring official, his successor must either restrict the operations of his department during the remainder of the year, or apply for an additional amount. The expenses of the Highway Department have, ever since the consolidation of the city, been the source of complaint. The apportionment of the annual appropriation among the several Wards, according to their relative necessities, and the further limitation of expenditures to periodical amounts, would, in a great degree, prevent the unnecessary or extravagant employment of funds.

The attempt to cleanse the streets of this city, under the existing system of contracts, continues to be a palpable failure, which is the only result that reasonably can be expected. The law requires that all contracts shall be awarded to the lowest bidders, and the benefit to be received by the city will consequently be adjusted by the paucity of the sums for which the awards are made. The indefinite demands of the cleansing contract, and the convenient labor that may suffice for its nominal fulfilment, will always afford a recompense, however small may be the consideration to be paid by the city ; and the profits of the contractor will increase just as he relies upon the rains to accomplish his work, or upon the cold to render it impracticable.

The cleansing of the streets may readily be performed during the night, after the hours of continuous travel, and by arrangement with the numerous passenger railway companies, the dirt could be carried in suitable cars over their roadways to the rural districts, where, for purposes of fertilization, it would find a sale, by which the cost of its removal could be defrayed.

Notwithstanding the large number of streets now oc-

cupied by passenger railways, but little advantage has accrued to the city from the repairs to such highways by the several companies.

The appointment of a Superintendent of Passenger Railways, whose duty should be to enforce the prompt fulfilment of their covenants with the city, is deemed advisable. Payment of the annual license, which has been imposed by ordinance upon each car, has recently been refused by some of the companies, and application has been made by them for a judicial decision of the right of the city to demand such charge.

The revenue of the Department of City Property, from rentals, &c., during the year 1859, was \$27,239 45; the appropriations for its various purposes amounted to \$84,502 94; and its disbursements to \$82,830 73. The improvements at Fairmount Park and Hunting Park have been carried forward as effectively as the limited appropriations to those objects have enabled, and continual care has been bestowed upon the protection and adornment of the several public squares. The lot of ground adjacent to the west end of the county prison has been re-dedicated as a public square and parade ground, and when its boundaries shall be determined in accordance with the Ordinance of November 21, 1859, it will require a suitable enclosure and proper arrangements for its double purpose.

The custom of using Independence Square for public meetings might, with great propriety, be abolished, as a serious interference with its preservation and culture.

Although the Hall of Independence should be freely accessible to visitors, it is suggested that no formal reception of military, firemen, or other associations, should be had there without the special permission of Councils.

The growth of the city may, in some degree, be computed from the annual statements of the Building Inspectors. The permits issued for the erection of new buildings numbered 2,270, or 578 more than for the year 1858, making the total number of 8,433 permits granted since the organization of the Department, June 5th, 1855.

The revenue of this office is only derived from permit fees, and amounted to \$6,844 81—whilst its disbursements were \$7,536 55. The deficit in its accounts of

\$691 74 is \$1,526 78 less than the deficit of the previous year—the expenditures of the two years being alike.

The expenditures by the Superintendent of City railroads, for the repair of the railway tracks owned by the city, amounted to \$5,081 54, or \$2,221 89 less than the outlay for such purpose in 1858; while the receipts have been \$14,706 85, showing an increase of \$1,839 73 over those of the previous year. The removal of the track on Market street, between Fifteenth and Seventeenth streets, from the sides of the street to the former site of the market houses in its centre, has been authorized by Councils, but not yet perfected, owing to the late period of the year when undertaken. The demolition of the market houses east of Eighth street, now admits of a similar re-arrangement of the track on that portion of Market street, which will tend to relieve the almost incessant passage of cars that incommode the neighboring stores and warehouses.

The statistics of the Water Department for the past year are unusually gratifying, and afford conclusive evidence of the skill and efficiency with which its affairs during that period have been managed.

The quantity of water supplied by the several works amounted to 7,168,031,648 gallons, giving a daily average of 19,638,442, and showing an excess over the supply in 1858 of 328,605,689 gallons, or in its daily quota of 900,289.

The increase of the average daily supply in 1859 over that of 1857, amounted to 2,329,124 gallons. The receipts of the department were \$548,128 19, being \$90,609 48 over the revenue of the previous year, whilst its total expenses were \$205,862 15, exclusive of the outlay upon the Frankford main.

A new main for the supply of the first four wards has been constructed at a cost, with its connections, of \$126,098 75, and has remedied the deficiency of water heretofore experienced in those districts, not only upon the emergency of a conflagration, but even in the usual demands of household use. The expense of this improvement has been defrayed out of the proceeds of the loan of \$221,500, authorized by Ordinance of March 17, 1859.

A main has also been completed to Frankford, the cost of which has been assessed upon owners of the property

along its line, but the payment deferred until the first day of January, 1864, or the previous avail of its benefits.

Water pipes have been laid extending 116,944 feet, or more than 22 miles in length.

The revenue for the current year has been estimated at \$575,000, which should afford a surplus of \$380,000, after payment of all expenses.

A consideration of the steady growth of the city, and of its expansion in opposite directions, naturally suggests the pertinent inquiry as to the adequacy of the existing water works to supply its future necessities. That the capability of those works may be much enlarged by the employment of greater mechanical power, or by other methods, is beyond dispute; but the mere probability that with all such improvements they may at no very distant time prove incompetent to their important purpose, should induce a seasonable forecasting of a plan by which such misfortune may be averted. The expenditure which may be required for such investigation should not be deemed unwise.

I cannot forbear repeating a recommendation of my former annual message, that the washing of pavements in the closely built portions of the city, should be restricted to the days and hours that may be specified therefor, a measure which must tend to the comfort and health of the community, and might check the prevalent waste of energy and of water.

If the quantity of water supplied to each dwelling or other place of consumption could be accurately ascertained by a method similar to that employed in the distribution of gas, greater care would be had in its proper use, and the expense would be more fairly adjusted than under the present system of annual rates.

The Commissioner of Markets has paid to the treasury for the rental of stalls and the sale of materials, \$68,341-25, and from leases of wharves and landings, \$50,498 28. The expenses of his department have been for markets, \$16,499 77, and for wharves, \$6,967 06.

The past year has witnessed the demolition of the market sheds, formerly the pride of the city; but which the costly improvements on Market street had rendered inconvenient and unsightly.

The commodious buildings which have been erected for

market use in various parts of the city, afford increased accommodation to the community. Although these new markets are the property of chartered owners, they should for the public good be subjected to the supervision of the clerks of the market, that illegal weights and measures may be detected, and the sale of unwholesome provisions be prevented. If it be desirable to extend the encumbrance of market sheds through the streets partly occupied by them, the loss of revenue consequent upon the recent removals will be fully supplied.

The improvement of private wharves has affected unfavorably those owned by the city, and judicious policy demands such extension as will restore their value. The projection of the sewers, which now empty in the city docks, to the extremity of wharves, so that their contents might more readily be carried off by the river, would lessen the expense of cleansing, and as vastly more important, would tend to the prevention of disease.

The appropriation for 1859 to the Trustees of the City Ice Boat, was \$12,400, of which \$5,134 24 remained unexpended. The earnings of the boat in towage were \$1,108 38, which, with \$526 97 received from sales of coal, have been returned to the treasury. The actual decrease of expenditures as compared with those of 1858, amounted to \$374 19, while the receipts from towage diminished \$438 40, showing but small difference of annual expense during the last two years. Whatever appropriation may be needed for the effective maintenance of the ice boat should be unhesitatingly afforded; its services having proven of incalculable advantage to the commerce of the port, and of great importance to the large industrial class who depend for a livelihood during a portion of the year, upon the unobstructed navigation of the river.

The Fire Department now comprises 19 steam fire engines, 51 hand engines, 116 hose carriages, with 67,938 feet of serviceable hose, 9 trucks, 1307 feet of ladder, and 64 hooks, besides other apparatus. Its active members number 3,284, with 8,394 honorary or contributing associates.

The sum expended for its maintenance in 1859 was \$56,979 50, being an increase of \$16,604 50 over the cost of the preceding year. Fifteen steam fire engines have

been added since the last annual statement of the Chief Engineer.

The efficiency of the department has been fully maintained, and its numerous companies, with but few exceptions, have promptly rendered their valuable services whenever needed, with as little disorder as can be expected in the excitement of rivalry.

The force of the department is greater than is needed for the public service; the appropriation demanded for its maintenance has become extravagant, and it is the duty of Councils to adopt some method by which, without injustice to any portion of the companies comprised therein, it may be reduced or entirely superseded.

The experience of many years has proven that the voluntary system is not suited to the circumstances of a dense and populous community. It had its origin before the date of engines, when leather buckets were provided in almost every dwelling, and "kept Ready at hand, and applied to no other use than for preserving our own and our fellow-citizens' houses, goods, and effects, in case of fire," in the words of the constitution of the earliest firemen's organization in this city still extant. It was the interest of the original associations to render the co-operation of neighbors certain and efficient on the few occasions when their services for the extinguishment of fire should be needed.

Upon the introduction of the hand engine and the hose carriage, or even of the bucket wagon, which preceded them, special organizations became necessary, and thus, with the progress of the city, numerous companies assumed the duties of firemen without any legal obligation for their performance. Stimulated by a generous zeal for the public safety, by the contests for superiority between rival associations, and by natural pride of personal activity and prowess, the voluntary system gradually increased in strength, until with the dissolution of some of the well-tried honored companies, and the accession of others unworthy of the name of firemen, it fell into disrepute, and too often accomplished its legitimate purposes only with the sacrifice of the peace of the community.

The last two years have witnessed the introduction of a new power into the fire department, one which can admit of no competition from human energy. The hand appara-

tus may struggle for a while to maintain its place, but must inevitably give way before the more effective working of the steam engine. The expense to be incurred for the maintenance of the latter must divert the customary appropriations from older companies who will thus be left to the resources of their members or be forced to leave the department.

The attempt to combine the two kinds of service, by arbitrarily rejecting a number of the hand-engines and hose carriages, can only be productive of jealousy and hard feeling toward the more fortunate companies, that will tend to renewed feuds and disturbance. The formation of a paid fire department, by selection from the existing companies, must have the like ill result.

After mature consideration, I suggest the expediency of entrusting the extinguishing of fires to the police department, and with that view would recommend that one steam fire-engine be located adjoining, or in the near vicinity of each district station, believing that ample protection would thus be afforded against all fires occurring in the closely built portions of the city. Each of these steam-engines could be managed by one engineer and one fireman, with the assistance of the police officers always in reserve at the several station houses.

The alarm of fire communicated through the station telegraph would obviate the use of bells, and while preserving the general quiet would avoid the concourse now attracted to the fire ground.

The annual cost of such a plan probably would not exceed \$30,000, and this expense might with great justice by legislative authority be imposed upon the several Fire Insurance Companies, in proportion to the amount of property assured by them respectively within the city limits.

Upon the adoption of such plan the city should purchase at fair valuation the apparatus belonging to the department from which the requisite engines and hose could be selected, and the remainder be disposed of as opportunities may offer.

The rural districts would necessarily retain at least a portion of their present fire apparatus. The energy and public spirit of the firemen as a body would not be lost to the community, but would in all probability seek their

development in military organizations, the best schools of discipline for the citizen, but which latterly have failed to receive the active and general support to which they are entitled.

The scheme thus suggested combines efficiency, readiness, quiet, and economy—qualities which should commend it to public favor.

Under the existing system, I would recommend that only the two steam fire engines first arriving upon the fire ground should be allowed to go into service without the express permission of the chief or other engineer in command, as probably the most desirable method of preventing the destruction of property by the undue use of water.

Other regulations for the discipline of the fire department than those heretofore in force have become essential through the introduction of the steam-engine, and should receive the early consideration of Councils.

The Trustees of the City Gas Works have now under their management the distribution of gas in every part of the city, excepting the former District of the Northern Liberties, having acquired possession of the Manayunk and Kensington Works.

The statement of the Chief Engineer exhibits the continued prosperity and enlarged operations of the trust during the past year. The number of customers is 36,277, or 7,380 more than were supplied in 1858, of whom, however, about 3000 were transferred with the purchase of the last named works. The public lamps number 6,303, of which 5,559 are provided with gas, and 744 with fluid. The total number of gas lights exceeds 428,000. The mains are 337 miles in length, 60 miles having been laid during 1859. The capacity of the works having become inadequate to the increased consumption, additional buildings and apparatus have recently been completed by which an ample supply of gas will be afforded.

The income of the estate left by Stephen Girard for the various trusts under his will has varied but little from its usual yearly amount.

The Girard College for Orphans, which, in augmenting usefulness, has just completed its twelfth year, received from the fund \$96,907 02 for its support. Towards the

improvement of the Delaware front of the city, a favorite scheme of the sagacious testator, \$12,004 54 have been appropriated. The extensive tracts of coal land in Schuylkill county, destined to prove the richest portion of Girard's devise, remain undeveloped; but with the return of prosperity to manufacturing interests, and the consequent increased demand for fuel, this property may, under prudent management, be made to yield an important revenue.

An Act of April 7, 1859, abolished the Board of Guardians of the Poor, and the Board of Health, as theretofore existing, and committed their respective functions to other organizations; the members of which are appointed by the Courts and Councils, instead of being elected by the people.

The statement of the Board of Health exhibits an expenditure of \$26,840 85 for 1859, besides \$419 75 paid for annual statements of former years.

The revenue amounted to \$15,447 57, showing an increase therein of \$3,337 00. The appropriations made to the department were \$32,791 92, including \$1,439 95 for the payment of claims of former years.

Nuisances to the number of 1,273 of various descriptions, have been abated under the direction of the Board. It is worthy of consideration whether the election of Vaccine Physicians should not be devolved upon the Board instead of the City Councils, and also whether an office of Collector of vaccine cases is not needed to promote a more general resort to the benefits of vaccination.

Under the provisions of an old City Ordinance, the salaries of the Vaccine Physicians are payable under warrants to be drawn by the Mayor, and are thus charged to the police department, with which they have no proper connection.

The number of deaths within the limits of the consolidated city during 1859, amounted to 9,745, of which 5,163 were males, and 4,582 females; being a decrease of 952 from those of the preceding year. Estimating the present population of Philadelphia at 650,000, the average mortality has been but 1 in 66, a sanitary condition probably unexcelled by any community of equal extent. It is to be regretted that the registration of births cannot be more

thoroughly enforced, and additional legislation is needed to that end.

The change effected in the management of the Department of Poor since the new board have entered upon their duties, has answered the expectations of the community. From the accompanying statement, it will appear that the net expense of this department to the city from Jan'y 1, 1859, to July 4, was \$163,986 10, inclusive of \$33,013 00 furnished in out door relief, and the maintenance of an average population at the Almshouse of 2,617 persons.

From July 4, 1859, to Jan'y 1, 1860, the expense similarly computed, was \$91,475 28, inclusive of \$8,841 71 for out door relief, and an average number of 2,452 paupers. The several departments of the Almshouse on the 31st of Dec. 1859, contained 2,863 inmates. The steady annual increase of the number of the insane to be provided for at the public expense, demands early steps for the enlargement of their appropriate accommodations in that institution.

The expenditures of the Inspectors of the County Prison, including those for the debtor's apartment, have amounted to \$59,109 42, showing an increase of only \$2,289 00, when compared with the expenses of 1858, although the commitments in 1859, 19,846 in number, have been 4,933 in excess of those during the preceding year.

The establishment of a House of Correction needs no further commendation, but it is much to be deplored that an institution which promises incalculable benefits to the community, should be yet unprovided.

The appropriations to the Police Department amounted to \$489,552 00, comprising however several items in no way belonging thereto, such as \$78,000 for the purchase of Philosophical Hall, \$750 for refitting the apartment of the Law Library, \$725 for salaries for vaccine physicians, &c. The construction, repair, and removal of signal boxes in many of the engine and hose carriage houses, amounting to \$10,635, have also been included, although more immediately connected with the fire department.

The actual cost of the police service during 1859, was \$391,872 15, an increase of \$4,330 67 beyond the expense of the previous year, mainly to be attributed to the

introduction of substitutes and the new detective organization.

The employment of substitutes, who perform the duties of sick or otherwise absent officers, was recommended in my former message, and was authorized by Ordinance of April 29, 1859, and under its provisions 34 appointees are serving in that capacity, being distributed among the several police districts. All appointments to the force since the adoption of this system have come from those previously serving as substitutes.

In October last the detective department of the police was organized, and by the zeal and ability of its several officers has realized the anticipations of its extended usefulness.

The officers specially detailed for the suppression of street begging, have, since the commencement of their duty, Oct. 5, 1858, to the end of 1859, made 936 arrests. Of these arrests, there were 115 children committed to the House of Refuge, 37 to the Northern Home for Friendless Children, 46 to the Union School and Children's Home, 7 to the Industrial Home, and 270 adults were committed to prison for vagrancy.

From the accompanying report of the Chief of Police, it will appear that 32,225 arrests have been made within the consolidated city during the past year, being an increase of 9,858 over the number arrested in 1858.

The principal causes of arrest were :

Breach of peace and disorderly conduct,	-	15,582
Intoxication,	- - - - -	7,182
Assault and battery,	- - - - -	2,413
Vagrancy,	- - - - -	2,167
Larceny and suspicion of same,	- - - - -	1,689
Misdemeanors,	- - - - -	683
Corner lounging,	- - - - -	466
Riot and inciting thereto,	- - - - -	292
Interfering with officers,	- - - - -	171
Disorderly houses,	- - - - -	166
Passing counterfeit money,	- - - - -	152
Carrying concealed weapons,	- - - - -	106
Breach of ordinances,	- - - - -	100
Burglary,	- - - - -	81
Picking pockets,	- - - - -	62

Arson,	-	-	-	-	-	-	58
Murder,	-	-	-	-	-	-	54
Gambling,	-	-	-	-	-	-	33

The nativities of the persons arrested were :

Ireland,	-	-	-	-	-	-	15,003
United States,	-	-	-	-	-	-	12,385
Germany,	-	-	-	-	-	-	2,193
England,	-	-	-	-	-	-	1,733
Scotland,	-	-	-	-	-	-	574
France,	-	-	-	-	-	-	221
Other countries,	-	-	-	-	-	-	116

Although the arrests made during 1859 are apparently 44 per cent more numerous than those in the preceding year, such ratio will be greatly modified upon reference to the statistics of the two periods. In 1858 the arrests numbered 22,367, of which 16,381 took place after the 1st of June, when the present police force had been partly organized, being an average of 2,340 for each subsequent month, and of only 1,197 for those which preceded such date.

The former monthly average would have amounted, during 1859, to 28,080 arrests, or about 15 per cent. less than its actual returns.

This increase in the annual number of assets is not to be attributed solely to the extension of crime, although in all crowded cities offences against law steadily progress with the growth of population, but is mainly due to the greater efficiency of the police, resulting from their enlarged experience in the duties of their office.

Temporary shelter at night has been afforded by the several police stations for 44,476 lodgers, comprising 33,695 men, and 8,789 women.

The favorable report of the Fire Marshal is a renewed confirmation of the wise policy that dictated the establishment of such office by my immediate predecessor. The number of fires during 1859 was 363, or 70 less than those extinguished in the preceding year by the fire department or police.

The value of property destroyed was estimated at \$242,000, or \$44,000 below the losses in 1858. Of such valuation, the sum of \$122,000 was insured in the com-

panies of this city; \$75,000 in foreign agencies, and but \$45,000 unprotected.

Thirteen persons were convicted of arson, making a total of thirty-three convictions for that crime within the two years and seven months that the fire detective system has been in operation; whilst in the thirty-seven preceding years the average number was not one in each year.

The enactment of an ordinance, prohibiting the erection of frame buildings within the closely built portions of the city, although fully within the power of Councils, and urgently needed for the safety of the community, has not yet been accomplished.

The Superintendent of the Police and Fire Alarm Telegraph reports the continued efficiency of the invaluable system of municipal aid under his care. Its worth may, to some extent, be estimated by the results of its agency during the past year. It has transmitted 60,519 messages—has aided in the restoration to friends of 483 missing adults and 3,892 children—has enabled owners to recover 644 strayed animals, and has given to the trading community timely warning of the emission of 229 different counterfeit notes.

The apartments appropriated to its use at the Central Station are niggardly in the extreme—alike insufficient in accommodation and difficult of access—while it is always with a sense of mortification that strangers are permitted to witness its marvellous operations. The battery room is under ground, and hence requires the constant consumption of gas and fuel which might be dispensed with in a proper location.

I renew the recommendation, that suitable stations be constructed in the 1st, 9th, and 15th police districts—the buildings occupied for such use being without the essential conveniences, and those in the two former districts being unavoidably filthy and unhealthy.

In reviewing the services of the several branches of the Police Department, during the year just ended, I deem it just to record my acknowledgment of the efficiency, fidelity and uniform good conduct which, with very few exceptions, have characterized the officers and members of the force. Frequently called upon for duty of unwonted hardship or duration, more than once required to withstand the threat-

ened violence of popular commotions, in every instance and on every occasion they have proven capable and reliable and thus entitled to the confidence of the community.

The experience of another year has confirmed the views which I set forth at some length in my former annual message in relation to the establishment of a permanent police. After careful examination of the police systems of other cities I have prepared a bill embodying the features which appeared most desirable in their provisions, in many instances making use of their phraseology, and have also embraced therein the principles that I have heretofore advocated, which bill has recently been submitted to the Legislature, and a copy whereof is herewith transmitted. The necessity of placing the police force beyond the liability to constant political changes cannot be too frequently or too strenuously urged. No measure of a municipal nature is more essential to the welfare of Philadelphia, or is more generally desired by its citizens. If the appointments, whose only legitimate end is to promote the safety of person and property, are to be held out as the lures of partizanship, the expression of popular sentiment at the ballot box is necessarily debased—whilst the bestowal of office as a reward of party services, without regard to the fitness of the applicant, can only be esteemed as a fraud upon the community.

Among the local incidents of the past year, there were those which engaged public attention by their unwonted interest, and hence may be deemed worthy of particular notice.

In the month of April last, the case of an alleged fugitive slave was heard in this city, before a Commissioner of the United States. During the progress of such investigation, there was reason to suppose that a few individuals unmindful of their allegiance as citizens and incited by a criminal zeal, would attempt to interfere with the fulfilment of a duty that might be required of the Federal officers. Any such attempt must have occasioned a disturbance, and measures were therefore had to preserve the peace of the city, and in so doing, to avert the dishonor necessarily brought upon a community, in which any resistance is offered to the maintenance of constitutional rights. The decision rendered by the Com-

missioner took away all pretext for illegal proceedings, but I should esteem it a life long reproach and humiliation, if as chief magistrate of the city in which the constitution was framed, I had suffered any forcible violation of its compacts within that jurisdiction.

In the month of July certain of the Passenger Railway Companies gave notice of their design to make use of their cars on Sunday in the closely-built portions of the city. Believing that such course would be not only a violation of the statute prohibiting the performance of worldly employment upon the Sabbath, but also a breach of the peace by its infringement of the right of citizens to enjoy that day in unbroken quiet, I took the requisite means to prevent it. Upon amicable reference of the legal points in dispute to judicial determination, the measures which I had directed were sustained, and the Railway Companies, in a commendable spirit, refrained from pursuing their intended arrangements.

Towards the end of the last year, at a time when public feeling was greatly excited by a recent unparalleled and atrocious outrage upon the citizens of a neighboring State, several meetings were held in this city for the discussion of projects always odious to an intelligent, conservative people, but which were specially inopportune from a supposed relation to the occurrence which had justly aroused general indignation and abhorrence. Application was made for the protection of such meetings from threatened disturbance, and it was unhesitatingly afforded, under a clear recognition of the constitutional right of freedom of speech, as well as of the statutory provisions for the immunity of public assemblages from improper interruption.

If there be one guarantee of the constitution more sacred than others, it is that which in leaving the citizen amenable only to legal tribunals for the transgression of law, protects his individual rights from the capricious will of the multitude.

No denial of personal rights in one part of our country, will avail to secure the enjoyment of those equally valid in any other. In following the only course permitted by a sense of duty, I felt no apprehension that the good name of the City of Philadelphia for unvarying fidelity to every

federal obligation, could be sullied by the misguided acts of the few zealots in an unholy cause.

With a grateful acknowledgment of the mercy and kindness of the Almighty Being, whose providential care has been extended over our City during the past year, I would humbly commend its future welfare to His continued and gracious protection.

\$4,375 67

From the foregoing Statement it will be observed that the receipts of 1859 exceed those of 1858 \$485,222 11, while the payments for the same period are less by \$369,487 05; the first is owing to the large amount received in Temporary Loan authorized by Councils, \$880,000; Water Loan, \$186,500; Culvert Loan, \$117,400; New Loan of \$700,000; for the redemption of loans maturing, \$115,300; total amount, \$1,299,200. The decrease in the amount of payments is the result, in a great measure, of a want of funds in the Treasury to meet all demands against the same when the warrants are presented for payment. This loan office, in this Department of the City, is one of the most unpleasant duties to perform. I trust that ere long there will be sufficient money received to meet all demands at the time of presentation.

Yours, truly,

BENJAMIN H. BROWN,  
*City Treasurer.*

## DEPARTMENT OF CITY CONTROLLER.

OFFICE OF THE CITY CONTROLLER, }  
*Philadelphia, Jan. 21, 1860.* }

HON. ALEXANDER HENRY,

*Mayor of Philadelphia.*

DEAR SIR:—In accordance with your request, I herewith submit to you a Statement of the Financial condition of the City of Philadelphia on the first day of January, 1860.

For the expenses of the year 1859, the indebtedness of the City was as follows:

	Dr.	
Amount of Temporary Loan contracted, . . . . .		\$460,000 00
“      Warrants Outstanding for 1859, . . . . .		433,422 00
“      “      “      of 1855, '56, '57, '58, . . . . .		9,833 07
“      Due to Culvert Loan, . . . . .		23,441 36
		<hr/>
		\$926,696 43

	Cr.	
Cash balance in hands of Treasurer, . .	\$590,542 50	
Amount due the City from Water Loan, . .	152 06	
Am't due the City f'm R'd Damage Loan, . .	500 00	591,194 56
		<hr/>
Nett indebtedness of the City for 1859, . . . .		\$835,501 87
The amount of Taxes of 1859 uncollected, . . . .		623,301 77
		<hr/>
The margin in the Tax rate in excess of the expen- ditures of, . . . . .		\$287,799 90

Some parties may state the indebtedness of the City at this date, at a much higher figure. and to do so, add the interest on City Loans, due January 1, 1860, and the Loan to be redeemed on January 1, 1860; the latter of these Items, as you know, is paid out of funds provided by the Sinking Funds, and the former is to be met by the Tax rate of 1860, and hence though an indebtedness of the City on January 1, 1860, is in no way to be counted as a deficiency of 1859.

I give you below the estimated and actual receipts, and the estimated and actual expenditures for 1859.

# 304 APPENDIX TO JOURNAL OF COMMON COUNCIL.

The estimated receipts of the several Departments for the year 1860, are put down at . . . \$1,186,385 00

The Taxes outstanding Jan. 1, 1860, are as follows:

Taxes of 1854,	\$141,882 11
1855,	104,826 42
1856,	137,125 78
1857,	196,456 92
1858,	251,000 61
1859,	623,301 77

In all, . . . \$1,454,593 61

Estimated receipts from outstanding Taxes, . . . \$660,000 00

Taxes of 1860, upon valuation at \$1 75 allowances made, 2,574,709 20

Total, . . . \$4,361,094 20

## EXPENSES.

Estimated appropriations, . . . \$3,988,036 00

Deficiencies of 1859, . . . 335,501 87 4,323 537 87

Margin on the tax rate, . . . \$37,556 33

The expenditures of 1859 upon Items estimated in the Schedule, upon which the Tax was based, amounting to . . . \$4305,573 76

From these Items deduct amount of

Bills of 1858,	. . . \$64,000 00
Temporary Loan,	. . . 200,000 00
Warrants paid,	. . . 140,279 85
Extraordinary Expenses,	33,000 00
Amount paid on old Claims,	21 000 00

In all, . . . \$458,279 85

Leaves the amount of expenses 1859, \$3,847,293 91

Which is \$141,000 less than the estimated expenses of 1860, and would increase the margin on the tax rate to \$177,000.

In my opinion the returns from delinquent taxes will be greater than \$600,000, and there will be an increase from other Departments over the estimates, and I have confidence that strict economy will carry the City through the year 1860, with no greater embarrassment than was felt in 1859.

Very respectfully, yours,

GEROGE W. HURTY,

*City Controller.*

Balance in 6 per cent. City Loan, - \$36,700 00

And in Money, - 43 75

6th. The Sinking Fund for the Loan of one million and fifty thousand dollars, to pay for stock in the Sunbury and Erie Railroad Company, subscribed for by the City of Philadelphia before Consolidation, established by Ordinance, approved February 21, 1856.

Balance in 6 per cent. Loan, - \$50,300 00

And in Money, - 3 25

7th. The Sinking Fund for a Loan of one hundred thousand dollars, to pay for road damage, and to pay the contract price of the Fire Alarm and Police Telegraph, established by Ordinance, approved August 23, 1855.

Balance in 6 per cent. City Loans,	-	\$3,500	00
And in Money,	-	97	25

8th. The Sinking Fund for the Gas Works, established by Ordinance, approved March 20, 1855.

Balance in 6 per cent. City Loan,	-	\$49,900	00
And in Money,	-	4,543	75

9th. The Sinking Fund for a Loan of four hundred and fifty thousand dollars, to pay for claims against the Corporation, established by Ordinance, approved October 1, 1858.

And in Money,	-	84	25

10th. The Sinking Fund for a Loan of two hundred thousand dollars, to provide for the issue of certificates of debt for certain culverts, established by Ordinance, approved October 1, 1858.

Balance in 6 per cent. City Loan,	-	\$3,200	00
And in Money,	-	20	25

11th. The Sinking Fund for a Loan of two hundred and twenty-one thousand and five hundred dollars, to provide for the issue of certificates of debt in payment for the extension of the Water Works, established by Ordinance, approved March 17, 1859.

Balance in 6 per cent. City Loan,	-	\$4,900	00
And in Money,	-	732	50

12th. The Sinking Fund for the further extension of the Gas Works Loan, not to exceed five hundred thousand dollars, of which three hundred and eighty-four thousand and eight hundred dollars have been issued by certificates of debt, established by Ordinance, approved March 26, 1859.

Balance in Money,	-	\$3,848
-------------------	---	---------

It will be observed that a distinct Sinking Fund for each Loan was created by the Ordinance which authorized the Loan, and that an annual provision is required by each

Ordinance, (which forms a contract with the holder,) sufficient to secure the redemption of the Loan at maturity. This policy has been wisely observed in every Loan made since Consolidation.

ALEXANDER HENRY,  
GEORGE W. HUFTY,  
JNO. WELSH,

*Commissioners of the Sinking Funds.*

#### DEPARTMENT OF THE CITY SOLICITOR.

CITY SOLICITOR'S OFFICE, }  
*Philadelphia, Jan. 4, 1860.* }

HON. ALEXANDER HENRY,  
*Mayor of Philadelphia.*

DEAR SIR:--I comply with your request, by furnishing the following "detailed statement" of the general condition and affairs of this Department for the year 1859, and of all moneys received and disbursed thereby, together with all sources of revenue under my control, viz:--Amount of money received and paid over by this Department for municipal claims, exclusively during 1859, \$50,757 25.

(This sum is exclusive of mortgages, trust moneys, tax on Passenger Railroads, dividends and other matters not strictly municipal claims as within described, collected by this Department during said year.)

Appropriated for the expenses of said Department, for the year 1859, \$34,200 00.

Expended by said Department during said year, \$27,363 23.

The only sources of revenue of this Department, are municipal claims, which include water pipe, paving, curbing, culverts, and Board of Health liens.

The Act of April 12, 1859, relieved this Department from the collection of registered taxes, by authorizing the Receiver of Taxes to appoint counsel to perform that duty.

In accordance with the authority conferred upon the Receiver by said Act, he appointed such counsel; and the assistant and clerk, who were connected with this Department, for the collection of these taxes, resigned therefrom, and are now in the Receiver's Department.

Of the sum appropriated to this Department for advertising liens during 1859, \$3,000 was, with my consent, transferred to the Tax Department.

I estimated the revenue from said municipal claims of this Department, for the year 1859 at \$30,000. This estimate I based upon the collections of two preceding years, for during 1857, this Department collected, on municipal claims, \$32,750 66, during 1858, \$38,893 66.

The sources of revenue of this Department have been no greater, during 1859, than these preceding years, the causes of increased collections may be thus stated:

The beginning of this year found the dockets of the late Districts unsettled. Liens were there of various years and some too old to be recovered, and many others hastening to their statutory discharge. Three things were left for me to do, to allow these liens to be destroyed by the lapse of five years, to revive them, or to enforce their collection by sale of the property.

The first course I did not pursue, the second I did not follow, because it would but add to the costs, which the property owner would eventually have to pay or the City to lose, the third I adopted.

It was an experiment, but it has proven successful. That it has benefited the City our receipts show, though a *Levari Facias* on one's property is not the most pleasant way of removing incumbrances, still property owners are and will be benefited by the discharge of these liens though it was done under an impending Sheriff's sale. These liens were seldom filed in the name of the real owner, therefore no search in this office against the owner

by name, would show whether or not the City had a lien on his property. Real estate was, therefore, upon which such liens existed, conveyed in the belief it was clear of incumbrances, after the lapse of three or four years then the City's lien would turn up, and an innocent purchaser be compelled to satisfy it, this will no longer occur.

The dockets of the late Districts are closed, as are also the Dockets of 1854, 1855, 1856, 1857, of the Consolidated City, save as to a few disputed claims. No one need fear a City lien of these years, unless it be one he is contesting.

At our sale in February, we will reach the liens of 1859; and when my term of office expires, I do not expect to have an undisputed judgment on the City's Docket. City claims should be collected with as much promptness as an attorney would collect the claim of a private individual.

So soon as the claim is sent to this office the lien should be filed, the advertisement, previous to issuing the *Seire Facias*, made, judgement taken, and the writ issued to sell the property.

If this course be pursued the City will lose but little, and the proper parties will pay the claim. When many of the writs have been issued for the sale of the property, receipts of payment have been produced, or evidence that our lien had been discharged by a Sheriff's sale on another incumbrance, thus the City loses the costs. This would not occur if the filing of the lien was followed by a sale of the property with as much rapidity as the law allows.

If this course was pursued, but few sales would occur, property owners would settle before it came to that.

Even on the stale liens, for which we have issued writs of sale, the great majority are settled before sale.

I have not been able, as yet, to follow the course here pointed out, for the reason that I have not yet overtaken our current liens, though I have been issuing over one hundred writs of *Levari Facias* for each month, and have been, to a great extent, monopolizing the Sheriff's sale. But the first of May next, will find our dockets in a condition that it may be done.

Many were disposed to censure this Department for

what was thought its harshness in pressing these claims, but I felt satisfied that I was right, and I understood the matter better than any one not connected with the Department was likely to understand it, and we went earnestly on, and I am satisfied with the result.

I also feel assured that any member of Council, or any citizen that may have felt himself aggrieved, who intelligently examines the matter, will be convinced I could, in the discharge of my duty to the City and her citizens, only have acted as I did.

A well founded cause of bitter and frequent complaints, has been on account of the oppressive costs attached to these claims in the progress of their collection.

The costs on a claim, however small, when a Levari Facias is issued, have been \$35 50, which are thus made up, viz :

Filing the lien,	\$0 63
Advertising,	5 00
Scire Facias,	1 25
Prothonotary of C. P.	4 12
“ when D. C.	5 12
Sheriff for posting,	5 25
Attorney fee,	3 00
Levari Facias,	1 25
Sheriff for posting Levari Facias,	15 00
	<hr/>
	\$35 50

The City, before issuing a Scire Facias, gives notice of each lien, by advertising once a week for three months, in two daily newspapers, for this is paid \$5 00.

This notice gives the name of the owner or reputed owner, the term and number of the lien, and a description of the property by metes.

This charge and the attorney fee of \$3 00, (which has been paid into the City Treasury,) are all of the above costs for which the City is responsible, the balance of the costs the City but collects to pay the officers of the court.

Seeing the burden, I may say the wrong, of these costs, and having my attention called to so many cases of the greatest hardship, where their payment, wrung as it was by the process of the law, from the owners of a little

house whose all was invested therein, I have done my utmost to reduce them.

With the Prothonotaries I have succeeded, and hereafter the record costs will be but \$2 00, instead of \$4 12 and \$5 12, as above stated.

In the Sheriff's costs, thus far I have failed to make any reduction. In serving the Scire Facias, the Sheriff publishes a brief description of the property, twice a week for two weeks in one newspaper, for this he charges about \$4 00.

In executing the writ of Levari Facias, he gives notice of sale once a week for three weeks in two newspapers, for this there is charged \$13 00, in addition there is a brief notice published twice in the "Legal Intelligencer," for which is charged \$1 50.

My failure, thus far, to reduce the Sheriff's cost, comes from the provision of the Act of April 13, 1840, which allows him to charge parties the amount he actually pays for such advertising, he produces me the bills of the newspaper publishers, which sum, when the full advertised rates are charged to the amount, he charges the City.

These costs deserve the attention of the Legislature.

A day or two spent in this office, after our month's writs of Levari Facias have issued, would make any disinterested man an advocate for their reduction, when he saw the effort of the poor to pay them, and heard their pleadings to "throw something off." All of us connected with this office, have painfully witnessed this oppression, and would have relieved the subjects of it, if it were in our power.

I will most cheerfully and heartily co-operate with Councils, to have them reduced.

Without burdening your message with the number of our suits, the number of writs we have issued, plans of streets confirmed, or other matters of no general interest. I can but say that in all the suits which have been brought against the City, I have ground for dissatisfaction with but one verdict, and that was in a suit for damages, arising from the alleged negligence of the officers of the Ice Boat. But in that case we have since obtained a new trial, and the parties have abandoned the suit in the District Court, and brought it in the Court of Nisi Prius.

Several cases involving considerable amounts, one of which was an appeal from an award of arbitrators of \$18,000, we have defeated.

I have made it a rule to try all cases, if it possibly can be done, and the result has been that the number of the suits have diminished each term, till the present period, we have down for trial, but three suits against the City in the District Court, two in the Common Pleas, and three in the Nisi Prius, and those in the Nisi Prius were commenced before my term. We have opened a number of new dockets, and all the details of the business of the office are completely docketed, so that future Solicitors may at a glance, see what we have done, and how the business of the Department stands.

During the year I have been called on for many opinions by the Heads of Departments, and Committees of Councils, and in all cases, with perhaps a single exception, the Departments have been guided by those opinions in their action.

My assistants have been faithful, industrious, and attentive to the fullest extent; and if public business has not been delayed in this office, it must be attributed in a great degree to the energy, industry, and ability, of those I have called around me.

Very respectfully yours,

HENRY T. KING,

*City Solicitor.*

## DEPARTMENT OF SURVEYS.

DEPARTMENT OF SURVEYS, }  
*Philadelphia, January 2, 1860.* }

ALEXANDER HENRY,

*Mayor of Philadelphia.*

SIR:—In reply to your circular of 8th ult., I take pleasure in laying before you an exhibit of the operations of this Department during the past year. But before entering into the detail of works in progress of construction,

or those completed, will state, that the amount of appropriation made to the Department of Surveys for the year 1859, was \$25,400 00  
 Amount expended, . . . . . 23,767 87

Leaving balance to merge, . . . . . \$1,632 13

For the construction of the four large Culverts, viz. the Cohocksink (main and branch,) 24th street, (main and branch,) Vine street, and Moore street, an appropriation was made, payable by the Department of Highways, by a Loan entitled The Culvert Loan of . . . \$200,000 00

The expenditures on which are as follows:

Cohocksink main, . . .	\$34,818 08
“ branch, . . .	18,141 39
Twenty-fourth street main, . .	37,793 01
“ “ branch, . . .	12,923 08
Vine street, . . .	15,187 75
Moore street, . . .	15,554 24

Total work done, . . .	\$134,417 55
Less assessment bills, . . .	15,637 58
	<u>118,779 97</u>

Unexpended balance, . . .	\$81,220 03
Retained per centage in hands of City, . . .	24,663 02
	<u>\$105,883 05</u>

Amount of Loan on hand, . . . . .

There have also been constructed during the year, 22,632 feet of branch culverts or drains, under the Ordinance of November 11, 1858, the aggregate cost of which has been not less than \$25,400. Those that have been built under contracts made with the Department of Highways, we have full knowledge of, and have the exact cost of each on record, but those that are constructed by, and at the cost of individuals, we get no accurate return of, in all cases. These culverts require no expenditure on the part of the City; as, by the Ordinance, the contractors receive for pay, upon estimates made out in this office, culvert assessment bills against the property lying upon the line thereof, at the rate of 75 cents per lineal foot of property fronting thereon—and as the cost of the culverts constructed sel-

dom reach that amount, a revenue is obtained for the City which, for the year 1859, will amount to \$3,650 72; of which \$2,934 42 in assessment bills have been sent to the Department of Highways. What amount of these, due the City, have been collected, we have no means of knowing, as they are placed by us in charge of the Department of Highways for that purpose, with the final estimate of culvert, when reported as complete by the District Surveyor.

The list of such branch drains constructed is as follows :

Three feet culverts,	4,871	feet in length.
Two and one-half feet culverts,	10,892	" "
Two feet	2,006	" "
Twenty inch	595	" "
Ten inch pipe drains, } vit'd clay,	4,214	" "
Eight " " }	54	" "

The sectional surveys have been progressing at a rate that will, in a course of years, place on file a thorough and accurate record of the entire area embraced within our city limits. Those that have been entered during 1859 cover 6200 acres, with 220 miles of streets, making nineteen separate and distinct plans, of which the following is a list

11th section of the late Township of Blockley.

12th " " " " "

13th " " " " "

3d " " " " of Bristol, 22d Ward.

2nd section of Chestnut Hill, 22d Ward.

6th " 21st Ward, grade regulations.

7th " " " "

8th " " " "

5th " Blockley " "

4th section of West Philadelphia, revision of grades.

Part of the 1st Ward, " "

6th section of Germantown, " "

7th " " " "

Portion of Blockley, South of Market street, lines and grades.

3d section of Chestnut Hill, " "

4th " Kingessing, " "

5th " " " "

4th " 21st Ward, (Manayunk,) " "

The larger portion of the above plans have been examined upon the ground, by the Board of Surveyors, and the entire

list will, in a short time, be presented to the Court for confirmation.

The meetings of the Board of Surveyors have been held more frequently than at the stated intervals, as much of their time has been consumed in the examination of petitions for branch culverts, each of which is placed in the hands of a committee, who report from personal examination, and thus far there have been but two applications that have not been sanctioned.

Much has been written relative to the want of proper drainage of our city, showing that but few are aware of the extended lines of drains that have been under construction during the past year—not only under the Ordinance of November 11, 1858, but by authority of special Ordinances. In compliance with the latter, exclusive of the four arterial culverts first noted, there have been constructed 5,698 feet of sewers, and inclusive of special Ordinances and applications granted under the general Ordinance, the length of culverting completed during 1859, has reached 41,377 feet, or 8 4-10 miles. There are yet several miles of arterial culverts to construct, to relieve the outer sections of our built district, some of which are essential to preserve the high standard of healthfulness which our city has enjoyed, notwithstanding our citizens have profited so largely by that most valuable Ordinance of November 11, 1858, and at their own expense extended so greatly and advantageously by lateral drains the ramification of our drainage system. For this we have great reason of congratulation, and trust that the coming year will show a still greater extension, as the value and advantage of our projects become more evident and better understood.

It has been stated that the charge for culverts, under contracts made with the City, as directed in said Ordinance, is unjust, as in many instances the cost of the culvert has been less than the amount collected on the assessment bills, which places the surplus of charge in the coffers of the City—but instead of any injustice being inflicted, it is the only way of equalizing the charges, unless a resort be had to taxation upon the entire drainage area, the City then to perform the work complete, placing a drain in every street, for the basis of charge is made as the cost of a culvert 3 feet in drain—and all culverts, whether above or below that

size, have the same charge—the justice of the charge then, is, that the circumstance of a person residing upon a line of drainage, that may require a culvert of large dimensions, should not inflict upon him an expenditure greater than would be made to a person whose property may accidentally lie upon a branch line—the larger one being, in fact, necessary to the operation of the smaller, the flow from the one passing through the other, and they each, in fact, being part of one general system. The 10 inch pipe drain is just as useful for private, and even surface drainage, in its particular locality as a lateral, as is the 10 feet culvert on its line as a main.

In the construction of these drains we should have more careful supervision than they heretofore have had, and most particularly necessary is it for the pipe drains, which, if properly laid, are greatly superior to drains of brick, both in economy of construction and efficiency for drainage—but if laid without a due regard to the line, level, and proper joints, they become very troublesome. A general specification for each has been prepared, which, if complied with, will insure effective working. But this Department cannot be responsible for the manner of their construction; the duties of the office preclude the possibility of a personal supervision by the Chief Engineer and Surveyor, and there is no law directing such duty to be performed by the District Surveyors, they being responsible only for the lines and levels. We therefore depend upon the Department of Highways, under whose supervision the Ordinance directs that they be built. This should be arranged so that some one officer of the City may have the especial charge of the construction of branch culverts, and the connections to be made with sewers, under permits issued by the Department of Highways. This should be not only for the materials used, but that the specifications therefor be complied with. It is now customary for any one to knock a hole into a culvert, and insert a pipe, upon the granting of a permit by the Highway Department, careless whether the debris from the hole made remains in the culvert or not, or whether the pipe protrudes into the culvert, or is flush with the inner surface, as it should be; either of the first alternatives is bad enough, but in most cases I feel assured that both exist seriously, interrupting the efficacy of the sewer.

These connections from manufactories are without any restrictions as to the matter delivered into the culvert, and in many instances it is such as to entirely interrupt the ordinary flow, creating pools, from which the most offensive effluvia emanates, and which requires the full force of the storm waters to carry off. This should be prevented by Ordinance, and no material insoluble in water should be allowed to pass into the culverts.

During the past year a greater attention has been given than heretofore to the introduction of inlets for surface drainage. This is an important matter, and money so expended will give a good return in increased cleanliness of roadway and side gutters. Those built of late have had more care given them than has been usual, and by a new device which I have placed in operation, they are much increased in capacity; there need be no fear of overflows by the filling up of the sump; and if the inlet connection is properly arranged it acts as a ventilator as well for the inlet as the culvert. Had they been introduced upon the line of Reed street the late break and overflow would not have occurred. We have strong hopes that still greater improvement may result in the adoption of a patented inlet, to be constructed of cast iron, and if we are successful, the annual expenditure for repairs of inlets will be greatly reduced.

It is with great pleasure, Sir, that I am enabled to report, that the work upon the large culverts under construction, directed by Ordinance of February 27, 1858, has progressed with all energy, notwithstanding the many difficulties that have been met with. They were commenced early in the present year, and prosecuted through the most unfavorable season for such work ever known in Philadelphia, with close attention and unwearied energy. I say the *most unfavorable* season, on account of the unprecedented amount of rain fall that has occurred this year. The usual measure of a year's fall is a trifle over 40 inches, while during 1859, up to the 28th of December, it had reached 57 inches or more than was ever known in our City.

On the culverts for Vine and Moore streets, this excess of rain has effected the work most seriously, not only in delaying the progress of construction, but burdening us with expenditures, no human agency could foresee. The excava-

tion upon these lines we found to be, for an extended distance, in material that with ordinary moisture became a lively quicksand so soon as disturbed, and the excess over the ordinary rain fall immeasurably augmented our troubles, and it has only been the determined energy of the contractors that has brought us safely through, *i. e.*, within any reasonable expenditure. This has not only increased the quantity and cost of material excavated, which could not be estimated by means of cubic yards taken out, but it has rendered necessary an enlargement in proportions of arch for culvert, to resist the different character of forces such material creates. On Vine street it forced us to abandon the ovi-form culvert with light arch, and substitute a circle with a corresponding increase of proportions—this was a matter of great regret, but deemed advisable for safety—it is now complete and in successful working order.

On Moore street the line was finished to a point 120 feet west of Seventh street, in August last, and would have been entirely finished several months since, had we not been compelled to cease operations from the circumstance of 627 feet of the line lying upon ground that had not been opened for public use. The slow course of law is in operation, and we hope now that at an early day we may be enabled to resume the work and hasten it to final completion.

This delay has been a matter of serious import, as one of the particular necessities of this culvert, is to relieve a locality from which this difficulty cuts us off.

Upon the Twenty-fourth street culvert a great amount of work has been done. The principal difficulty here, has been the long rock cut required upon a closely built and narrow street, yet it is with pleasure I state that it has been successfully completed without injury to either person or property. At the intersection of Twenty fourth street and Pennsylvania Avenue, we have our deepest excavation, and it became necessary for economy, and to prevent the liability of interrupting the passage of trains upon the Reading road, to resort to tunnelling, notwithstanding the material is a clean gravel; it has been carried on with care, and would have been finished had we not have been flooded by the breaking of a large water main overlaying the tunnel, which filled a large extent of completed culvert with surface material. It has now progressed sufficiently to be free from

danger, and a small heading driven to the line of open cut, has enabled us to commence work upon the Pennsylvania Avenue, west of Twenty-fourth street, as by this heading the water in the cut is permitted to flow off. The line on the Avenue is now completed to within 300 feet of Coates street, which when reached will divert the drainage now flowing into the forebay at Fairmount, into the new culvert line to be delivered into the Schuylkill at Wood street, some distance below the dam. North of Coates street, the rock excavation extends to Twenty-eighth street, and much work has been necessarily performed, to prepare for our culvert trench, which properly belongs to grading of highways, for we have taken out the easterly side of the Avenue to the confirmed grade. Immediately north of Coates street there is 250 feet of the culvert complete in the rock cut, and it will be pushed forward during the winter, so that a connection will be made with the line above Twenty-eighth street, now finished to Thirtieth street, early in the spring, and the branch running up to and draining the Girard College and the House of Refuge, now ready for use, will be brought into full operation. The extension on the line of the Avenue, north of Thirtieth street, will be of small dimensions, and is intended only to drain the Lager Beer establishments near the Spring Garden Water Works, this can be built in a few weeks after the connection on the main line is made. This line in working order, the entire eastern shore of the Dam from Fairmount to the Girard Avenue Bridge, will be protected from City drainage, and the system carried out as the built district extends, will protect the entire shore to South Laurel Hill Cemetery.

The branch alluded to, is not only a part of the system for the protection of Fairmount, but it occupies ground that could not be brought into use for building purposes without it, and its completion prepares the valley of the "Dark Woods Creek" for the opening and filling in of streets, which will, at an early day, be sought as valuable building sites, thus giving a return to the City in increased taxation more than the interest of the cost for construction.

The most difficult work that we have had to perform, and which has occasioned the greatest anxiety, was the culverting of the Cohocksink Creek. From Germantown Road to Front Street there was much to contend with in the re-

peated freshets, that invariably broke away the protecting dams and required several days to place the work in the same condition it was prior to the storm; yet, notwithstanding this was so very discouraging to the contractor, it was driven forward with all energy, and every difficulty, as it occurred, successfully surmounted, and now presents for public use a fine, wide avenue, all trace of the former disgusting channel for sewerage having been entirely removed. The contractor, Daniel Stone, Esq., deserves at my hands, all encomium for the manner in which he has carried on this work, as well as for the character of the work now completed; and it has been a matter of great regret that he, by a serious accident, should have been compelled to yield his work into other hands. The contractors now in charge—Messrs. G. & J. Clark—there is every reason to believe will prosecute the remaining portion of the work with the same energy and in an equally satisfactory manner; they are contractors of large experience, having constructed some of the heaviest work within our State, and in our own City have just finished the culvert on Vine street, built under the same authority as the work now in their charge. This culvert is now finished to a point 140 feet northward of Second street, with 2013 feet on Germantown road and Thompson street yet to build.

The branch culvert lying upon the line of the Cohocksink Creek, from Germantown road to Culvert street, is in charge of Messrs. D. & C. Kennedy, who have also the Twenty-fourth street main. This work has also suffered greatly from the frequent freshets, but it has progressed energetically, having received that attention and watchfulness which in this instance has been peculiarly requisite.

This work cannot be entirely finished until a connection is made upon the main line at Fifth and Thompson streets, thus enabling us to direct the drainage coming from Thompson and Mifflin streets to the channel projected for it on Thompson street and Germantown avenue. This is now carried in the old creek bed alongside of the new culvert, which is so guarded with piling as to protect it from injury, and at the same time give as much capacity as the creek had as an open channel, the flow in the culvert being more than equal that due the portion of original water course occupied.

Upon the completion of these lines we will ask for authority to complete the system by the construction of a four feet culvert on the creek from Culvert street to Apple street, the cost of which will not exceed \$11,000, and will be more than covered by the unexpended balance of the Culvert Loan. The amount of the culvert assessment will be \$2,015 00.

In connection with this branch culvert was a piece of work that deserves especial reference ; that is, the alteration of the sewer on Culvert street, from the creek to Fourth street.

The old sewer on this line fell at so rapid a rate as to throw the mouth about four feet below the level of the bottom of the creek, and the same distance below the level we would require in bringing the new culvert up the creek from Germantown Road. This so contracted the opening of the old culvert at the creek as to occasion the repeated overflows at Fifth and Poplar streets, which, in many instances, has resulted so disastrously to the stores and dwellings in that neighborhood. This culvert it became necessary for us to raise to correspond with the new construction, and although located upon a closely built alley, of only 16 feet in width, and subject to the confined flow of drainage coming from 248 acres, as also the unusually frequent storms that occurred during the progress of the work : yet it has been completed in a satisfactory manner, without any injury whatever to the adjacent houses, though in some instances the cellar walls were bared to the foundation. The ordinary drainage carried off by this sewer is of the most offensive character, and it became necessary to employ a double set of hands for the purpose of relief, and thus expediting the work. It was necessary here to exercise the most watchful care to guard against the effect of a sudden storm, as a few minutes would change the flow from that of a rivulet to a mountain torrent, and in such cases it was imperative that all the obstructions to the free flow should be removed to prevent accident. Thus was it required that trunks, dams, and centering a part of the work, and in constant use, should be frequently removed, to be replaced when the storm had passed off. It is now entirely complete, and has been tested with as heavy storms perhaps as have ever visited the locality, such as have heretofore in-

variably flooded the valley at Fifth and Poplar and Parrish streets; yet it has carried it off entire, with only two-thirds capacity in use.

What effect the completion of these culverts will have upon the assessed value of property, may be estimated by comparing the condition of Thompson street from Fifth to Sixth, and Canal street from Germantown road to Front street, with what it was prior to the commencement of our work. But, in point of hygiene, no estimate can be made of the suffering by disease and loss of life that these constructions will be the means of averting. Now, there need be no fear attached to that particular locality, should an epidemic again visit us, as was the case some years since, when the line of the Cohocksink was marked by its ravages. This is its great value, and its success in consummating this much-desired end is by no one deemed problematical. Thus, the value of property on the line of the culvert is not alone enhanced, but the entire area over which the polluted atmosphere floated will feel the advantageous influence; and I cannot give a better idea of this than by repeating what has been previously stated by me, that in a similar case of improved drainage in a portion of the city of Manchester, England, the bills of mortality were reduced one-fifth, thus showing tangibly that the benefits from these constructions are not confined to a very limited area.

There has been but little work done the past year upon bridges, the only renewal being the construction of a spring draw-bridge over Frankford Creek at Bridesburg. This is of iron, and has applied to it the patent anti-attribution box of Parry. It is a permanent and secure structure, with greater facilities for the passage of vessels than was offered by the old bridge.

The Market Street Bridge, though without doubt one of the best wooden bridges that has ever been built, both in general plan and the proportion of its parts, and although the material of which it is constructed was subjected to close inspection, yet it gives evidence of decay, and it has been requisite to replace a main brace and post. This has been caused, it is believed, by exposure from the want of outside boarding. I would therefore recommend that the entire structure be closed from the weather, by which further decay may be retarded.

The Girard Avenue Bridge, has been open for public use during the past year, and being upon the line that is used by drovers for large cattle, it has been severely tested and has proved to be as we have previously reported it to be.

The Wire Bridge at Fairmount, we believe to be in good order, but it is impossible to so assert unconditionally, as the parts are not so situated as to admit an examination. The western approach is in bad condition since the construction of the Passenger Railroad upon it. Great improvement might be made to this bridge, by re-arranging the bearing plates upon the towers, and closing in the shore cables, inside the anchor pits; this would prevent the continued vibration of the shore cables, and reduce that of the bridge proper.

The Surveys of the outer districts have been progressing during the past year, as rapidly as the amount appropriated therefor would warrant. Those that are conducted under contracts, made by the Commissioners of Districts appointed prior to Consolidation, are drawing to a close. One of them (the contract) is now completed with the plans on file, and covers that portion of the 24th Ward, north of Market street, and west of the line of Fisher's Avenue. The other, east of Fisher's Avenue, will be completed, it is supposed, during the year 1860. There is but one other section of the City that is in charge of Commissioners of Survey, Passyunk Township, comprising a portion of the First Ward, of this we can offer no report, having been unsuccessful in obtaining the information sought.

The current business of the Department is steadily on the increase, requiring the constant attention of its officers, to keep pace with the requirements. The operation of the Branch Culvert Ordinance, has occupied much time, in preparing the estimates and arranging the bills of assessment, all of which are recorded and on file. I would again call to your attention the necessity for an Ordinance specifying the course to be pursued, by parties who may desire to dedicate streets to public use, and guarding it, if possible, with such restrictions as will prevent the location of streets that may conflict with the proper planning of the City, there is now neither form nor law regulating this, and in some instances, the interest of the City suffers for the want of it. At present the filing of a recorded deed

of dedication in this office, is all that is called for, to make a public street, no one being clothed with the authority to either accept or reject. An Ordinance now before Councils may correct this, which confides this duty to the Board of Surveyors, who probably are the only officers of the City who can, from a knowledge of the general plan, from a correct judgment, as to the advantages or disadvantages that may result from an acceptance.

The sectional plans of the City on file in this office, are so far as they extend into the rural district complete, except that portion of the old City east of Fifth Street. For this area, which is one of the most valuable in the Consolidated City, we have no plans whatever on record, and it is very important for the interest of our citizens, that a correct map thereof should be prepared, including the 5th and 6th Wards. We shall lay the matter before Councils at an early day, and trust that it may meet your approval.

Respectfully submitted,  
STRICKLAND KNEASS,  
*Chief Engineer and Surveyor.*

## DEPARTMENT OF HIGHWAYS, BRIDGES, SEWERS, AND CLEANSING THE CITY.

*January 16th, 1860.*

Hon. ALEXANDER HENRY,  
*Mayor of the City of Philadelphia:*

DEAR SIR:—In reply to your communication of the 18th ult., it affords me much pleasure to communicate to you, and to the Councils of the City of Philadelphia, a statement of the operations of this Department.

With the exception of the Wire Bridge, at Fairmount, all the bridges, highways, sewers, city railroads, &c., are under the control of this Department, and in referring to the statements marked No. 1 and No. 2, you will find that the aggregate amounts of receipts have been \$21,277 80, and that the expenditure of this Department, for the year

1859, independently of road damages, has been \$422,-649 98.

## APPROPRIATIONS.

The appropriations made to this Department, during the year 1859, were as follows :

Feb. 2nd,	Annual appropriation, -	-	\$342,700 00
Feb. 8th,	To pay old claims, -	-	10 63
April 11th,	To pay Philip Quigley, -	-	3,530 00
" 13th,	To pay old claims of 1856, 1857, and 1858, -	-	5,585 00
" 20th,	To pay old claims of B. B. Thomas, -	-	14,905 50
" " "	Lafferty & McConnell, -	-	52 50
" 28th,	To complete the bridge at Mill Creek, 24th Ward, -	-	5,000 00
July 8th,	To pay interest on B. B. Thomas' claim for Huntingdon street cul- vert, -	-	124 20
" 13th,	Additional appropriation, -	-	10,000 00
" 16th,	For repairs to bridges, -	-	8,000 00
Oct'r 4th,	Additional appropriation, -	-	76,800 00
<hr/>			
Total,	-	-	\$466 707 83

It will thus be seen that the appropriations made to this Department have been, in the aggregate, \$466,707 83; which amount, however, must not be accounted as having been expended for the current expenses of the year, since there were paid out of the same old claims amounting to \$28,382 86, which, deducted from the total, will leave \$438,324 97. From this last amount must also be taken that which was unexpended and merged, viz: \$15,674 99, which will leave \$422,649 98, the actual expenditure made for current expenses during the year.

The actual amount of the expenditures by this Department having been stated, I wish to refer to its condition when I entered on my official duties.

The annual appropriation for 1859 was \$342,700. Of this amount warrants were countersigned up to the 19th day of July, 1859, when my duties commenced as Chief Commissioner of Highways, amounting to \$212,284 82. Besides this amount, bills were due and unpaid against the

Department before my official term, amounting to \$31,-283 14, which, added to the amount of countersigned warrants, makes the sum of \$245,567 96, leaving, for the remaining six months, the sum of \$97,132 04, an amount altogether inadequate for its operations. Several of the items in the annual appropriation being entirely exhausted, I was compelled to make application to Councils for an additional appropriation for the remaining portion of the year. It will, therefore, be seen that, although the expenses of this Department may be large, it was not within my jurisdiction and management that the whole sum was expended.

I desire to call the attention of Councils to the condition of Girard avenue—both on the east and west of the Girard avenue bridge. The condition of the avenue on the east is such as to be entirely impassable; while on the west side there are deep ravines, so as to make it equally impassable. It is believed that the expenditure to grade such avenue, and to put it in travelling condition from Ridge avenue to Lancaster avenue, will be at least \$8,000.

#### BRIDGES.

The expenditure for repairs to Bridges has been of large amount. It must, however, be borne in mind that there are many small bridges over creeks in the rural districts constantly needing repair; besides which many of the bridges, constructed by contract previous to consolidation, were built in a very careless and indifferent manner; one of which, over Gunners' Run, in the 19th Ward, has cost, during this year, about \$2,000; and many others are in like condition.

#### RECEIPTS.

The Estimated receipts of the Department were \$25,000, while only \$21,277 80 were collected—being, therefore, less the amount \$3,722 20.

#### PAVING INTERSECTIONS.

Here I must be permitted to say that no censure should attach to this Department in the matter of paving intersections. It is impossible for this Department to control this expenditure, and in saying thus I am borne out by its former communications. The reason is obvious. Property owners petition Councils for the paving of certain streets. Or-

dinances are then enacted, allowing them to employ parties to do the work ; whereupon it is made incumbent on this Department to pave the crossings or intersections, and hence the large expenditure for this item.

#### PAVING STREETS BY CONTRACT.

In this matter it is proper to state, that the plan of permitting property owners to contract to pave streets before their own property operates very prejudicially to the interest of the City. The work is not done in the manner it should be done, and certainly not with satisfaction to this Department. Much, indeed, of the paving done in the year 1857 has had to be repaired, and occasionally whole streets to be repaved, and hence one of the great causes of this expenditure. In a report made to Councils January, 1858, it is urged that Councils should adopt some plan by which the City can have the streets paved in a more substantial manner, and that while the Department is held responsible for the work, the selection of the contractors should devolve upon it. It is true that security for the character of the paving has to be given, requiring parties doing it to keep it in good repair for two years from its commencement, but with all the rigid attempts to enforce the same, the evil cannot be checked.

#### CLEANSING THE STEEETS.

Herein much complaint is made daily by citizens, and not without good reason in most cases. The complaint book kept in this office, to which all persons have access, gives a very lamentable account of the condition of dirty streets, gutters, &c., in all parts of the City. The present system of cleansing the streets by contract, and giving it to the lowest bidder, is certainly defective, and calls loudly for some remedy. It is believed that if it were done by the Supervisors of the several districts under the direction of this Department, it would give general satisfaction ; it would, however, cost a greater amount of money ; but, it is believed, the citizens would not complain, as they evidently prefer clean streets, &c.

#### CULVERTS.

Here, again, it may be safely stated that the system of

giving the construction of Culverts to the lowest bidder does not, and cannot, give satisfaction to this Department, since, upon the publication for proposals to construct a Culvert, whether 2 feet in diameter,  $2\frac{1}{2}$  feet, or 3 feet in diameter, a number of propositions are submitted, many of which can have no serious intent or meaning, made very frequently by persons having no mechanical skill for such work; and yet we are required to give it to the lowest bidder that will accept. The culvert is constructed, and in a short time thereafter this Department is called on to make repairs, thus creating a continued expenditure in the item for repairing culverts, and sometimes requiring re-construction. It is believed that a scale of prices should be fixed for constructing culverts, at a certain sum per running foot; that is to say, for culverts 2 feet in diameter,  $2\frac{1}{2}$  feet and 3 feet in diameter, in a good and substantial manner, and that the Department of Highways should employ competent and good mechanics to construct them at the regulated prices.

Very respectfully,

JOSEPH SHANTZ,  
*Chief Commissioner.*

## DEPARTMENT OF CITY PROPERTY.

OFFICE 2nd STORY GIRARD BANK N. SIDE. }  
*Philadelphia, Jan. 2, 1860.* }

HON. ALEXANDER HENRY,

*Mayor of the City of Philadelphia.*

SIR:—It affords me much pleasure to be enabled to transmit you, the information required in your communication of the 7th ultimo, touching the affairs and general con-

dition of this Department ; and while attempting to be explicit in this review of the past year, and no less so, in my allusions to the present, I shall endeavor to be as concise and comprehensive, as the nature and circumstances connected with either will permit.

The appropriations made to this Department for the year 1859, have been as follows :

General appropriations of February 26th, July			
15th, and transfer of December 30, 1859,	\$77,813	00	
Special appropriations of February 26th, June			
11th, and September 26th, 1859,	-	6,689	44
<hr/>			
Total,	-	\$84,502	94
Aggregate disbursements of 1859,	-	82,830	73
<hr/>			
Leaving balance unexpended, January 1, 1860,		\$1,672	21
<hr/>			
The receipts or revenue of the Department for			
the same period of time, has been,	\$27,239	45	
Thus exceeding by \$6,398 07, the revenue of			
1857, which was, -	-	20,841	38
And less the revenue by \$379 18 of 1858,			
which was, -	-	27,618	63
And more by \$3,009 45, than the average			
revenue of 1857 and 1858, which was,		24,230	00
<hr/>			

The small deficit above mentioned between the years of 1858 and 1859, may be fairly ascribed to the appropriation of late Lemon Hill to the uses of a park, and to the sale of a property in Bridesburg, and two frame tenements in Frankford, which before yielded a revenue of over \$800.

The receipts thus referred to, of 1859, have emanated solely from the same sources as those of 1858, save that the sum of \$100, results from the forfeited bids of two several lots of ground on Coates Street, and \$70 is the consideration money received for the right to the materials of the aforesaid two old frames, sold in Frankford.

That no misapprehensions in any quarter, might arise from an overestimate of the revenue of the present year, the actual estimate of the Department, has been fixed and reported at the low figure of \$26,120 53, a sum certainly less than may be realized, if the same degree of vigilance

and industry should be exercised, as has been hitherto practised.

On the 27th of April, 1859, a lot of ground (sub-divided into six lots) situated on Twenty-first street, between Market and Chestnut streets, was sold at the Exchange, (*so divided*), to Messrs. Allison & Brown, for the sum of \$11,353 33, to whom the title has been passed by the City, and one fourth of the purchase money, according to the terms of sale, paid over to the City Treasurer, and the balance secured by bond and mortgage, with interest payable in five years. This bond and mortgage (like others), will be found in the hands of the Treasurer, who collects the interest.

Another lot of ground, (known as the McCrea lot,) situate between Spruce and Pine, and between Twentieth and Twenty-first Streets, was sold at the Merchants Exchange, on the 25th of May last, to John McCrea for \$28,000, subject to the condition of one-fifth cash, and the balance to be secured, (as above,) by bond and mortgage, with interest payable in five years. As yet however, no payment thereon (except the usual guarantee of \$50,) has been made, though it is understood that the sale is to be consummated shortly.

The improvements at Fairmount Park, to say the least, are of the most flattering and encouraging character, and should receive, as they deserve, the unqualified commendation of every right-minded citizen; indeed thus far, this noble enterprize is but another instance, showing what great objects can be accomplished with small means, and hence the propriety of pushing the work forward to a speedy and successful termination. Within the year just ended, the grounds have been enclosed with a substantial fence, next Landing and Pennsylvania Avenue. The heaps of rubbish, old buildings, and other unsightly objects removed, 6,600 feet in length of drives have been graded, of which 3,700 feet, have been covered with a good foundation of broken stone and gravel, 2,384 feet in length 5 walks have been made, of which 1,872 feet, are likewise covered with broken stone and gravel, 5,780 lineal feet of stone culverts have been completed, and about 300 trees and shrubs planted. The greater portion of the lawns and slopes south of the mansion, have withal, been put

into shape and sodded. Also a large amount of work has been done, such as blowing out rocks, levelling and trimming up, which it would be impossible to specify here in detail. The money appropriated last year by Councils, to pay for plans and improvements, was \$10,000, a part of which, say \$1,500, has been expended for plans, tools, &c., and the balance, as above briefly narrated, (in accordance with the plan adopted.) The cost of all these, up to this time, falls considerably below the estimate made by Messrs. Sidney & Adams, who are entitled to great credit for the uniform and devoted attention they have given the whole matter. But while doing justice to others in this notice, it is not my purpose to lose sight of the very energetic, industrious, and efficient superintendent, Job Ridgway, whose unwearied services and unbending integrity, have mainly contributed to the prudent prosecution and present advanced stage of the work.

The deep pond, long existing at Norris Square, and for several years the subject of loud complaints by citizens of that neighborhood, has been filled up by contract for the sum of \$225, proving the propriety in this instance at least, of awarding the job to the lowest bidder, and putting an end to a further waste of public money on this score. The picket fence surrounding the square, has been repaired from time to time as occasion demanded; but judging from the frequent recurrence of such repairs, they will continue to be a source of expense to the City, until an iron fence shall be substituted for the present wooden one. Out of the appropriation set apart for this square, \$732 46, was used by direction of the Committee of City Property, to pay for curbing and paving Howard Street in front of the square, and \$450 transferred to another item.

The Hunting Park improvements, have consisted chiefly in draining the ground, and planting trees. Four thousand five hundred feet of main and lateral drains, have been constructed in the best manner, the pipes being laid to an average depth of three feet. The nature and situation of the ground, it should be remembered, renders draining an operation of paramount importance.

Nine hundred additional trees and shrubs have been purchased and planted, and holes prepared for several

hundred more. The trees and shrubs previously planted have been cultivated by digging and stirring the soil, for some distance around each plant, and top-dressing over their roots with prepared compost.

The latter have made considerable progress, the ever-greens especially, and particularly so on that part of the ground which has been thoroughly underdrained. The completion of the draining and planting are matters requiring special early attention, in order to insure a uniform growth and the more certainly to develop the features contemplated in the plan of the Park.

Notwithstanding the care and economy exercised; the small appropriation of \$2000, embraced in item 16, "for repairs to City Property," in 1859, has been found insufficient for the purposes it was designed. Many judicious repairs to halls, tenements, &c., might have been profitably made to arrest premature dilapidation and decay, but the limited means afforded me not warranting the outlay, I have confined myself to these alone, which were actually indispensable. New roofs should be added, and material repairs of a durable kind made in early spring, too much of the City Property, which for the reason already stated, have been sadly neglected.

The same remark of insufficiency may be truthfully applied to item 19, or appropriation of \$2,000, (same date) "for expenses and supplies to Court Houses and Law Buildings," it having been found infinitely less than was compatible with its requirements. But resolved to ask for no additional appropriations, I was often obliged to resist the importunities of officials, by prompt refusal to comply with their wants and wishes however reasonable. In fact so much compulsory pinching and patching, has been hitherto practised in these matters, where more substantial repairs and supplies would have been better and cheaper in the end, that little or no room is left for this kind of economy.

To fit up the various Court Houses, Jury Rooms, Law Buildings, &c., by carpeting, glazing, painting, mending old chairs, settees, blinds, and supplying new ones, repairing windows, furnaces, and the buildings generally, and furnishing ice, stoves and pipe, scuttles, zinc, poker, brooms, oil for the Halls, and outside lamps, cleansing,

scrubbing, and whitewashing throughout, paying a fireman some six months or more in a year, and to liquidate other incidental expenses impossible to foresee in detail, it is hoped Councils will not hesitate in fixing a wider margin, this, than they did last year, to meet the exigencies thus briefly alluded to.

Among other of her advantages, Philadelphia has abundant cause to be proud of her Public Squares. Counting, therefore, upon the wisdom of her Legislators, her citizens will expect that these grounds, (their common property, and consecrated to health and enjoyment, under the patriotic names of Washington, Jefferson, Franklin, Penn, Rittenhouse, and Independence Squares,) will receive a due share of legislative regard, and that provision for their improvements will not be meted out with a parsimonious hand, but in a manner commensurate with the magnitude of their importance. The sum of \$5,500 was appropriated last year to advance these laudable objects, and in conformity therewith has been quite expended. It should be borne in mind, too, that for several years these Squares were egregiously neglected, owing, probably, to the narrow means afforded, and therefore to place them again in a proper condition, must not only be the work of time, but a liberal outlay (*annually*) should be cheerfully conceded, until it be accomplished. The herd of deer, and armies of squirrels, (*themselves*.) absorb, yearly, about \$1,000 for food; and the current expenses for pruning, planting, and rooting out dead trees, for supplying gravel, spreading and rolling it down to an even grade, with iron rollers, sodding the naked borders of the walks, repairing seats, and constructing new ones, painting them, and for doing more or less brick work, and plumbing, repairing gates, carting off rubbish, purchasing grass seeds, for furnishing help for Superintendents, for cutting three crops of grass, and curing it, (the proceeds whereof being always promptly paid over to the Treasurer,) for collecting and removing the dead leaves in the Fall, for the exigencies of unexpected, though destructive, storms and tornadoes, and for clearing away snows from the footways surrounding the Squares and before City Property. Add to all the foregoing expenses, and a host of others not enumerated, the Square and Parade Ground, in rear of the County Prison, requiring a man constantly

to guard the fence from being stolen by piecemeal, as well as to spread and grade the dirt daily deposited there. I repeat, that to defray the foregoing current expenses for 1860, \$6,000 has been asked for from Councils, and calculating from the experience of the past, nothing short of this sum will supply the emergency.

Within the previous year an additional number of lamps have been introduced into Jefferson Square, and iron pipes and lamps into Logan, and as far as the appropriation would warrant, pipes also were laid in Rittenhouse Square. The work in each case was given to the lowest bidder, and it is gratifying to know the same has been executed faithfully, and to the entire satisfaction of this Department. The appropriation having been insufficient in itself to complete the work of laying pipes in Rittenhouse Square, and furnishing lamps for it, the further action of Councils will be necessary to complete the job.

In the same period of time a strong board fence has been erected around the burial ground on Hart's Lane, and the Lamb Tavern Road. A frame building, formerly located on Landing Avenue, near the Schuylkill, has been removed at a trifling cost, and placed upon the ground above mentioned, to be used as a Green House. A new shingled roof has been put on the farm house, on the other side of said road, now occupied by a tenant of the City. In the middle of the Avenue, in Spring Garden street, between Twelfth and Thirteenth streets, where trees were missing, others have been planted in their stead, and these, together with nearly forty others, (without protection,) have been surrounded with substantial tree boxes, which were afterwards painted. The clock, originally occupying a place in the end of the old Market House, at Front and Market streets, has been taken down, and cleaned, a case prepared for it, and both removed to the Manayunk Station House, where, according to the direction of Councils, they are permanently located.

Having, in the foregoing synopsis of the affairs and general condition of this Department, laid before you a few of the principal, though incomplete details thereof, and lest the annexed schedules of A, B and C might swell this Report (already long) to an inexcusable extent, were I to

proceed further, will therefore content myself, in conclusion, by simply subscribing myself,

Very respectfully, your obedient servant,

J. M. CHRISTOPHER,

*Commissioner of City Property.*

## B.

Amount of Revenue derived from the property de-

scribed in the foregoing Schedule, during the year eighteen hundred and fifty-nine.

* For City Rental, -	-	-	-	-	\$10,896 41
* For Ground Rents, -	-	-	-	-	11,911 11
For Mortgages, -	-	-	-	-	375 50
For Incidentals, -	-	-	-	-	3,199 36
For Guardians of the Poor, (ground rents,)					757 07
					<hr/>
					\$27,239 45
					<hr/>

\* It will be seen that the amount of City Rental for the year 1859, is less than that of 1858, whilst the ground rents are proportionately increased. These discrepancies arise from changing certain receipts, heretofore credited to City Rental, and placing them where they properly belong, under the head of Ground Rents.

## SUPERINTENDENT OF CITY RAILROADS.

OFFICE SUPERINTENDENT OF CITY RAILROADS, }  
*Philadelphia*, January 5th, 1860. }

Honorable ALEXANDER HENRY, Mayor :

SIR:—In reply to your communication of the 10th ult., it affords me pleasure to submit to you the following general statement of the affairs, &c., of this Department.

The receipts of this Department, for the year 1859, have been \$14,706 85, (which amount, I am pleased to say, exceeds that of the previous year \$1,839 73,) making an increased revenue to the City of \$6,906 85.

There was appropriated for this Department the past year (1859) \$6,000, out of which I have expended for the necessary repairs, &c., viz :

For 18 tons railroad iron, - - -	\$990 00
For lumber, - - -	500 00
For 4 tons spikes, - - -	400 00
Labor, blacksmith's work, tools, &c., - -	3,931 54
	\$5,081 54

Leaving, as a balance of the original appropriation, to the credit of the City, \$918 46, of which balance, together with \$1,800 special appropriation, made by Ordinance of October 4th, 1859, for the purpose of re-laying and paving that portion of the City Railroad on Market street, between Twenty-first street and Market Street Bridge, I have expended \$2,663 96, leaving a balance now to the credit of this Department, \$54 50, which amount, added to the excess of tolls over the expenditures, will leave to the credit of the City \$6,961 35.

For re-laying the railroad track, as per Resolution of Councils, approved November 9, 1859, between Fifteenth and Seventeenth streets, on the site of the old western market houses, the expenses to the City will be materially increased in consequence of the lateness of the season, and of the frost having taken effect before I was able to make the necessary connection of the rails, as estimated by myself, to at least \$500 beyond the amount of last years appropriation of \$7,800, which will be \$8,300.

Permit me to suggest to you, and through you to the Select and Common Councils of the City, the necessity of the additional appropriation required for the purpose above specified.

The general condition of the City Railroads is very good, and be assured that no effort upon my part shall be wanting, to fully discharge the duties incumbent upon this department.

Yours respectfully,

A. BARTHOLOMEW,  
*Superintendent of City Railroads.*

## WATER DEPARTMENT.

*Philadelphia, Jan. 10, 1860.*

HON. ALEXANDER HENRY,

*Mayor of the City of Philadelphia :*

DEAR SIR:—The past year has been one of unparalleled activity in this Department, in the extension of the

Works, the large amount of service mains laid, the great amount of water supplied, and the increased revenue collected.

The demands made upon the works were fully up to their capacity during the seasons of greatest consumption of water. An abundant supply of water is of such vital importance to the sanitary condition of the City, and large liberality in the use of it is so necessary in certain seasons of the year for flushing gutters, cleansing inlets, &c., that it was found almost impossible to meet the reasonable requirements of the citizens. The four plugmen, acting as special police officers under your appointment, having charge of the opening of the plugs, have not fully met the expectations had of them; but when it is recollected that they each had the charge of an average of six hundred and twenty-five plugs, scattered over an average of seventy-five miles of pipes, it will be seen that the fault laid more in their limited number, than in their want of efficiency. If the number were doubled during the four summer months, there is no doubt that they would be able to attend to all the complaints that might arise, if not entirely remove their cause. The plugmen employed during the past summer rendered valuable assistance in economizing the water, and keeping the plugs under their charge in repair. As the practice of discharging soil from water closets and refuse from factories into sewers increases, the demands upon the works for water for flushing becomes greater.

Our water supply should be so copious as not to require such careful economy as is now found necessary. The daily increasing demands made upon the works will require most rigid care to insure an adequate supply for the coming season. Should our new works be completed in time, they will render valuable assistance in the first ten Wards of the City, but without additional mains to and from the reservoir of the Delaware works, it will be impossible to supply the District furnished with water by them, as it has been necessary to assist frequently with water from the Schuylkill works.

The Twenty-fourth Ward works were worked up to their capacity during the past year, and there will be a deficiency the coming season; and without additional mains,

parts of the Fifteenth and Twentieth Wards cannot be properly supplied. The time has no doubt fully come when this City should look for a much more copious supply of water than we now have, or will have, with the additions now in progress, although they are being constructed on as large a scale as the power of the Schuylkill river will admit of. The next resource is to place turbine wheels in place of the breast wheels at Fairmount; after that, resort must be had to additional steam-pumping machinery. There is no doubt that there are sources adequate for the entire supply of the City which have not yet been examined, and which hold out sufficient inducements to make them worth a careful investigation. A small amount of money would make the preliminary surveys, and settle the question of practicability. As any general change in our water supply would require years to make, the subject cannot be too early attended to.

The new main to supply the first four Wards, laid during the year, has fully met the expectations had of it, and now the supply is as copious and constant as that of the most favored parts of the City. This main, with its connections, has cost \$126,098 75. The water-rents from the district supplied by it have been already increased to \$24,269 25 above what they were the year 1858, yielding already a profit of over 19 per cent. upon the whole cost, being enough to pay the interest and principal long before the bonds issued in payment for it mature. The Department feels assured that the same favorable results will be found from all the extensions now being made. Indeed, a large additional sum of money might be expended upon the works, to a very great advantage to the citizens, with a large profit to the City.

The amount of water supplied by all the works has been 7,168,031,648 gallons, an average of 19,638,442 gallons per day, as per annexed table. Through the warmer months the average per day has been about one hundred thousand tons of water pumped by nine water wheels and eight steam engines from 96 to 230 feet high.

The amount of pipe laid has been much greater than in any one previous year, being 116,944 feet or over 22 miles.

The revenue of the Department has been greatly increased, being \$548,128 19, or an increase of \$90,609 48

over 1858. The whole expenses were \$205,862 15, independent of the Frankford main, which should have been paid by a loan, being an extension.

The system of managing introduced into the works, so as to produce economy in the use of supplies, by making a monthly comparison of them, showing the contemplation of coal, oil, tallow, &c., to the million gallons of water raised one foot high, by the different works, has had the desired effect, and a consequent large saving of expense in running the works has been the result, the Engineers entering into the matter with spirit.

The Purveyors, or those having charge of pipe, plugs, stops, and the laying of them, have by their care and management, effected a large saving in the expenses of laying pipe, making attachments, &c.

The Inspectors have also by their diligence, made many discoveries, indeed much of the increased revenue is due to them. No officers of the Department are of more consequence than these, and none so poorly paid for the character of services rendered. The amount of experience necessary to make an efficient officer in this Department, would make it greatly to the interest of the City to have these offices more permanent and desirable. The revenue derived from it, as well as the comfort of the citizens depends as much upon the experience of the officer as their ability. Indeed, such regulations of the Department as would look to the permanency, and its separation from immediate political influence, would be greatly to the advantage of the City. The Department, as now organized, has had eighteen months experience in managing the works, and find they are just learning how to do so, to the greatest advantage and profit of the City.

The estimate for the current expenses of this year, is \$192,350, which is less than was expended last year, while the estimated work to be done, is ten per cent. greater than last year.

The amount expended of the loan of \$221,500, for the extension of the works, has been upon the Mains, \$126,098 75, upon the Reservoir, \$37,500, upon the Mill House, \$20,992 17. It will be seen, that the increased revenue derived from the first four Wards, supplied by the new main, is more than sufficient to pay the principal

and interest of the whole amount expended during the year on the extension of the Works, so that the indebtedness of the City, has not really been increased by the "loan," as it already yields profit enough to liquidate the debt before maturity, without taking into account the large prospective increase of revenue from the Wards referred to, and the large saving in running expense, that the new works will make when finished.

A loan of about the same amount will be required for the present year, to finish the work already commenced, construct a reservoir in Twenty-fourth Ward, and lay the mains required. The revenue of the Department for the present year, will most probably reach \$575,000, which will leave a profit, after paying all the expenses of the works, of about \$380,000.

The Department is greatly in need of better accommodations, as it now occupies three offices a great distance from each other, and none of them adapted to the business of the Department. One office is at Fairmount, one at 918 Cherry street, and the other corner of Fifth and Chestnut streets. Without having the business concentrated in one building, and the requisite room, it is impossible to manage the affairs with that system the magnitude of the business demands. Indeed the loss to the City is many times the amount that would procure ample accommodations in an eligible part of the City.

Yours, respectfully,

HENRY P. M. BIRKENBINE,

*Chief Engineer of the Water Department.*

HON. ALEXANDER HENRY,

*Mayor of Philadelphia.*

SIR.—In my report to you, Januray 8th, 1859, the receipts of this Department for the year 1859, were estimated at \$550,000.

I have the pleasure to report that the receipts of this office alone, were, as you will find by the enclosed statement marked "A," \$548,128 19, to which is to be added \$3,051 89, received and paid into the City Treasury by the Chief Engineer at his office in Cherry street, making the total receipts of the entire Department foot up nearly the sum of \$552,000.

The enclosed statement marked "B," gives the receipts of this Department for the last five years, with the expenses attending the same, and which shows a net profit to the City of \$1,231,109 09.

The receipts for water rents and penalties for the year 1859, was \$457,216, was about \$300 short of the whole receipts for water rent, iron pipe, &c., for the year 1858.

The receipts of 1859 exceed the year 1858 in the sum of \$90,609 71.

We estimate the total receipts of the Department for 1860, at \$580,000.

Respectfully submitted,

W. J. P. WHITE,

## DEPARTMENT OF MARKET HOUSES, WHARVES AND LANDINGS.

*Philadelphia, January 17, 1860.*

HON. ALEXANDER HENRY,

*Mayor of the City of Philadelphia.*

DEAR SIR:—In reply to your communication requesting a statement of the affairs of this Department, the following is respectfully submitted:

On account of the Department of Market Houses I have paid into the City Treasury, during the year 1859, \$68,341 25; the causes of this increase above the estimated revenue of the Department, were the postponement of the demolition of the Market Houses in Market street, and the sale of the materials contained therein.

The estimated revenue of the Department of Wharves and Landings, for the year 1859, was forty-eight thousand dollars, and I have paid into the City Treasury, on account of said Department, \$50,497 28; the difference between the estimate and the revenue being the amount received

from accounts long outstanding, and which could not, with any certainty, have been embraced in the estimated revenue of the year. The alteration in the mode of disposing of the leases of the public wharves has not resulted as satisfactorily as was anticipated, which is, doubtless, owing to the depressed value of such property at the present time.

The amount of appropriations made to the Department of Market Houses for the year 1859, was - \$17,812 90  
Amount expended, - - - 16,499 77

Balance,	-	-	-	\$1,313 13
----------	---	---	---	------------

The amount of appropriations made to the Department of Wharves and Landings for the year 1859, was - - - - \$7,179 17  
Amount expended, - - - - 6,967 06

Balance,	-	-	-	\$212 11
----------	---	---	---	----------

The estimate revenue of the Department of Market Houses for the present year, is, \$45,000 00.

The estimate revenue of the Department of Wharves and Landings for the present year, is, \$48,000 00.

During the last year two additional sections of Market Houses were erected in South Eleventh street, at a cost of six thousand five hundred dollars, which will yield a revenue of two thousand five hundred dollars per annum. There is a great demand for additional Market Houses in Girard Avenue, which, if acceded to by Councils, will increase the revenue of this Department sufficiently to overbalance the deficiency caused by the removal of the Market Houses from Market street.

The great necessity of a correct plan and description of all the Wharves and Landings belonging to the City cannot be too strongly urged, there is no record in this Department to the extent or number of these properties; many of the landings have lots of ground attached, the precise extent of which is a constant source of contention between the tenants of the City and the owners of the adjoining properties; the landings at the foot of several streets, are not upon the rent roll, and I have endeavored in vain to obtain satisfactory information respecting them.

I would call attention also to the necessity of extending the public wharves to the Warden's line, the owners of wharf property adjoining are improving their property in this respect, and unless the City keeps pace with such improvements its wharves will decrease in value; many of the City docks have sewers emptying into them, which is the cause of continual complaints from the Board of Health in the summer season, and entails considerable expense upon the City for cleansing; if these sewers were extended, either by carrying them through the adjacent wharves or by building new wharves, this difficulty could be entirely obviated, much sickness and disease prevented, and thousands of dollars annually saved to the City.

Annexed is a statement showing the amount of revenue derived from the various Market Houses belonging to the City, and the annexed rent of the Public Wharves and Landings for the year 1859.

Respectfully yours, &c.,

N. T. BARVOX.

## GAS WORKS.

OFFICE PHILADELPHIA GAS WORKS, }  
*January 2, 1860.* }

HON. ALEXANDER HENRY,  
*Mayor of Philadelphia.*

DEAR SIR:—I have the honor to transmit a brief summary of the condition of the City Gas Works, and of the operations, receipts, and expenditures of the Trust, for the year ending December 31, 1859.

Since the conveyance to the City of the works, mains, and other property belonging to the Manayunk and Kensington Gas Companies, all parts of the Consolidated City, except those Wards within the limits of the late District of Northern Liberties, receive their supply of gas from the works included in the Trust.

The Manayunk Works were conveyed in trust under the provisions of the Ordinance of May 10, 1858, and those of the Kensington Company, were bought for cash, in accordance with the Ordinance approved October 22, 1859, authorizing the Trustees to receive and pay for them, in pursuance of the terms of the Company's Charter. The price paid was \$90,717 79.

Inventories of the properties received from these Companies have been filed in obedience to the Ordinances of Councils.

Immediately after the approval of the Ordinance of March 26, 1859, authorizing a loan of \$500,000, for the extension of the street mains, works, &c., the proper steps were taken to carry it into effect, and the work was prosecuted with all possible activity. The necessity for the provision made by this Ordinance for supplying the wants of the citizens, is conspicuously shown by the results of the year's work.

The number of applicants supplied with main pipes, services, and meters, has been four thousand three hundred and eighty.

The number received from the two Gas Companies is over 3,000, making, with those before supplied, a total of 36,277 customers receiving gas from the Trust.

The number of lamps, under the Department of Public Lighting, is 6,303, of which 5,559 are supplied with gas, and 744 with fluid.

To supply the new customers, there have been laid down during the year, nearly 60 miles of main pipes in the streets, and 15 miles of service pipes. The entire length of street mains now belonging to the Trust, is a little over 337 miles. The whole number of lights supplied with gas, is over 428,000. The quantity of gas manufactured during the year is 562,162,000 cubic feet, being 82,000,000 feet more than was made in the previous year.

The maximum daily consumption of gas has reached 2,700,000 cubic feet, being the quantity named in my Report of last year as the limit of the capacity of the works for daily production.

The increased demand upon the works, increasing from the recent extensions of the pipes will be fully supplied by the new buildings and apparatus, which have just been constructed and are now in use, manufacturing gas.

The subjoined statement of the Cashier exhibits the financial operations of the Trust.

Very respectfully,

JNO. C. CRESSON,

*Engineer.*

Annexed hereto you will find a detailed Statement of all Appropriations made to the Board of Health during the year 1859, with the expenditures of each item of the same; of the revenues and sources of revenues received during the year; as well as a summary of the expenditures and revenues of the present Board, from the date of its organization.

For an account of the transactions of the Board up to July 4th, you are particularly referred to a Report made and presented to Councils by the former Board, at that time, and continued in Appendix No. 46 of the Journal of Select Council.

From these statements it will be seen that the actual expenses and revenues for 1859, were:

Expenses,	-	-	-	\$26,840 85
Revenues,	-	-	-	15,447 57
Net expenses for 1859,				\$11,393 28

Compared with those of 1858 they exhibit the following result:

Expenses for 1858,	-	-	\$28,014 90
“ “ 1859,	-	-	26,840 85
Excess of 1858 over 1859,			\$1,174 05

Revenues of 1859,	-	-	\$15,447 57
“ 1858,	-	-	12,110 57
Increase of 1859 over 1858,			\$3,337 00
			<hr/>
Net expenses of 1858,	-	-	\$15,904 33
“ “ 1859,	-	-	11,393 28
Saving of 1859 over 1858,			\$4,511 05

Not only have the appropriations made during 1859 been less than any year since the consolidation of the city, but the expenditures have also been much less than in former years, notwithstanding extraordinary expenditures have been recently made, with the consent of Councils, in refitting and repairing the various buildings and appurtenances connected with the Department. It is the belief of the Board that unless some unforeseen contingency arises, or an unexpected epidemic prevails, the expenses of the current year will rather fall short of those of the past.

Whilst the fact that the revenues of the Board for 1859 were increased over those of 1858, is gratifying to the Board, and must be more so to the tax payers of the city, it is to be regretted that they do not equal those of the Board as it existed prior to consolidation. This is attributable to the following causes:

1st. To the decrease in the number of foreign passengers arriving in vessels bound from foreign ports to the port of Philadelphia, from whom a fee of fifty cents is received for examination of baggage, as provided by the Act of Assembly of 25th of March, 1850.

2nd. To the decrease in the number of foreign or other vessels consigned to the port of Philadelphia from foreign ports, from which is derived health fees, varying from five to ten dollars each, as prescribed also by Act of Assembly of January 29th, 1819.

3d. From a decrease in the health fees received from vessels with a coasting license, as prescribed by an Act of Assembly of January 29th, 1819. Under the provisions of another and recent Act, passed June 11th, 1832, all vessels engaged in carrying coal from the port of Phila-

delphia are exempted from the payment of such fee or charge.

4th. From a decrease in the amount of fees charged for permits issued for the cleansing of privies, sinks and wells. Notwithstanding the great increase of dwellings and other buildings requiring such appendages for the reception of *debris*, filth, &c., it is remarkable that the number of such sinks, wells, &c., annually required to be cleansed, is smaller than formerly. Instead of having the contents thereof removed at night, in carts properly prepared for such purpose, and having the same used for agricultural purposes, the owners thereof avail themselves of a license to connect and drain said privies, &c., with and into the common sewers, issued by the Department of Highways, by virtue of an Ordinance of Councils, approved May 3d, 1855, entitled, "An Ordinance providing for the granting of permits to make openings into the common sewers."

5th. To the neglect or refusal of persons engaged in the cleansing of such sinks, wells, and privies, as are not connected with the sewers, to obtain from this office, as required by Act of Assembly of March 16, 1855, a license and permit to perform such work. The price of such permits vary, according to said Act, from fifty cents to five dollars, the saving of which, by parties interested, is an inducement to violate the law, and thereby defraud this Board and the city out of a considerable revenue. It had become notorious that numbers of persons were engaged in such unlawful practices, and that, too, at hours detrimental to the health and comfort of the community. To correct and prevent such illegalities and abuses, the present Board elected, in September last, an officer, styled Night Inspector, at a salary of forty-five dollars per month, whose duty it is to patrol the city at night, to serve the operations of all persons engaged in such occupations, and ascertain whether they are so engaged by and with the permission of the Board of Health. This officer has been clothed by your Honor with police powers whilst engaged on duty, and is respected accordingly. The labors of this Inspector have been crowned with great success, not only in preventing the violation of the Poudrette laws, and in the prevention of the creation of intolerable nui-

sances at an untimely hour of the night, but also in inducing such persons to perform their duties in a lawful manner, and also to pay into the Treasury the price of such permits as are required by law. To his vigilance, in a great measure, is the Board indebted for a portion of the increase of revenue of the past year.

By and with the approval of the Committee on Health, both the late and the present Board have been engaged, during the past year, in repairing and refitting the Hospitals and other buildings, and the grounds attached to the Lazaretto Station, which have been shockingly out of order for some years past, and though much has already been done, and that, too, judiciously and economically, there still remains much to be done to place it in that condition which humanity and a proper regard for the care and attention of the sick and the afflicted require, especially in infectious and contagious diseases. The sum asked for in the estimates for 1860 will be required to effect such results.

The number of vessels visited and foreign passengers examined at the Lazaretto, and in the port of Philadelphia, during the year, were, viz:

	<i>By Lazaretto Physician.</i>		<i>By Port Physician.</i>
Ships -	-	26	46
Barques, -	-	57	99
Brigs, -	-	93	130
Schooners,	-	190	60
<hr/>			
Total vessels, -	-	366	335
Foreign Passengers,	-	1,492	1,767

Of these vessels, 10 were detained for purification and ventilation, and 4 discharged their cargoes at the Lazaretto, by order of the Board, prior to coming up to the city.

The number of patients treated at the Lazaretto Hospital were but 2; one of whom recovered, and the other died shortly after his admission; the disease was yellow fever.

In connection with the subject of the Lazaretto, the Board are pleased to say that the Post Office Department have recently established a post office at that station, thereby conducing much to the convenience of this department, as well as to the inhabitants of Tinicum Island.

The number of patients treated at the City Hospital

were 7. Of these there were treated for small pox, 4; varioloid, 2, and measles, 1; 5 were discharged as cured, and 2 died.

Notwithstanding the energy and assiduity of our immediate predecessors, the Board of 1858 and 1859, in reformatting and correcting many of the abuses and negligences which had existed in the Department for a few years previous, the present Board have found a great deal to occupy their time and attention in that behalf. The annual statements of deaths and births for 1856, 1857, and 1858, which have been neglected, were carefully prepared and published, and that for 1859 is so far advanced as to be ready for publication early in February. The total number of deaths during 1859 was—viz:

Males,	-	-	.	-	5,163
Females,	-	-	-	-	4,582
					<hr/>
Total,	-	-	-	-	9,745

Being a decrease from those of 1858 of 952.

The number of births for the same period is not yet ascertained, owing to the neglect of those engaged in the practice of midwifery, in making proper and timely reports to the Board as required by law, which can only be remedied by additional legislation by the General Assembly. A new Registration Law approved by a former Board, was presented to the Legislature last winter, but no action was had thereon. This law was intended to supply many of the defects of the existing acts on the subject of births and deaths, and should demand the attention of the present Legislature.

A statement of the number of vaccinations reported by the vaccine physicians, during the year 1859, is also annexed, which, it is to be regretted, is defective in detail. This is owing to the imperfection of the Ordinance of March 8, 1855, providing for gratuitous vaccination, and the want of proper officers to collect the vaccine cases for the physicians elected under the Ordinance, as well as the neglect of the vaccine physicians in making the proper and timely Reports, as required by the Ordinance.

The Board, as the custodians of the health of the City, "to prevent the spread of," as well as to remedy, the existence of infectious and contagious diseases, should have the power of electing these officers, and of defining their duties. They have called the attention of Councils to the

subject, and, with the approbation of the Committee on Health, have prepared and presented an Ordinance, which, it is believed, will remedy the defects of the present Ordinance, and provide against the spread of such loathsome diseases as small pox and varioloid. The passage of this Ordinance is earnestly pressed by the Board.

There have been removed by order of the Board, during the past year, 1,273 nuisances, arising from various causes, such as full, foul, and leaky privies; ponds and cellars; filled with stagnant water; filthy houses, cow stables, pig pens, slaughter houses, horse and bone boiling and chemical manure establishments, filthy streets, alleys, gutters and sewers, &c., &c.; a great portion of which has been done voluntarily by parties interested, and the remainder by process of law, under the supervision and direction of the Health Officer—the total expense of which has been as set forth hereinafter, \$2,481 29; a portion of which sum has been repaid, and liens for the balance have either been, or will be, filed in due time, according to law.

The attention of Councils is again called to the filthy condition of the public docks, sewers, and inlets. Frequent complaints have been made to the Department of the improper use made of permits issued by the Highway Department to connect “drains from privy wells, subject to overflow of water,” under the provisions of an Ordinance, approved May 3d, 1855, already referred to, by means of which large quantities of filth, &c., are carried into the sewers. In some cases the privies attached to whole rows of houses are thoroughly emptied into the sewers, creating nuisances of the worst character, and particularly dangerous to health as well as to life. It is the opinion of the Board that this Ordinance should be so amended as to provide for the consent of the Board of Health to be had before the License Clerk of the Highway Department should issue permits. Prompt and early prevention of such evils is better than pounds of cure.

In conclusion, the Board and the Community have every reason to be thankful to a kind and merciful Providence for His manifold blessings bestowed upon the City of Philadelphia, in preserving it from all kinds of epidemics and contagious diseases, and enabling its long established reputation for cleanliness and healthiness to be truthfully maintained.

*Statement of Appropriations No. 6, approved January 28th, 1859, for \$30,325, and of No. 33, approved March 1, 1859, for \$1,018 64—in all for \$31,343 64, being for expenses and other purposes of that Department for the year 1859.*

#### THE STORE.

The Board conceived it necessary to elevate the position of storekeeper, and, in order to make the same more responsible than heretofore, increased the bonds of that officer commensurate with the more arduous duties, and elected a gentleman well known for his energetic business character,

whose whole time has been engrossed with its details. The business of the Store Department, and all the minute and intricate accounts connected therewith, being in his hands, the public, and especially the tax payers, may rely that this grand distributing agency of the Institution will be so managed as to challenge their approval.

The disposition of all the porter and liquors for medicinal purposes have, under the present Board, been transferred from the apothecary to the storekeeper, to be dispensed only under order from the attending physician of the Medical Board.

The flour consumed, also, since the commencement of the present year, (1860) has been transferred to the care and supervision of the storekeeper. All the coffee used in the house and distributed through the store has, since September last, been roasted on the premises, making a saving to the Institution in the item of "roasting coffee" alone of two hundred dollars per annum, besides the assurance of no deterioration in the quality of the article itself.

#### THE INSANE DEPARTMENT.

This branch of the Institution has received the attention of the Board, having heretofore been neglected. A Resident Physician has been elected for this Department, although on duty but a little more than two months, there has been a decrease of twenty-five in the number of patients. The classification heretofore so much neglected is apparent under the new management of the Department. This home of the insane should continue to receive the necessary aid and liberal support of our august municipality in all time to come.

The annual average increase during the last ten years has been twenty-one. As the capacity of this building is less than six hundred, and the present population is nearly five hundred, including attendants, and as the number of insane to a given population increases every year, it cannot, from the above showing, be long before there will be an absolute necessity of increasing the accommodations for this Department of the Alms House. Although in a report of a Committee of Councils, Boards of Guardian and Prison Inspectors decided against the expediency of

providing new accommodations for the insane, and using these buildings for other purposes, on account of the expense, in a few years the expense will no doubt *have* to be met.

The matter of out door relief also received the consideration of the Board. No very important changes could be made either in the number or arrangement of the districts, with any possibility or advantage to the Department. A small amount might be saved in the items of salaries, by diminishing the number of visitors and enlarging the districts, but in the judgment of the Board this could not be done without impairing the efficiency of the service, as it would involve the necessity of furnishing each visitor during the winter months with one or more assistants, who could not, within their short term of office, become well enough acquainted with their duties to discharge them in a proper manner, and is very questionable whether the sum saved in salaries would not be greatly exceeded by the loss occasioned by injudicious distribution of public alms, consequent upon the inexperience of officers, where they found it practicable and expedient to form a combination of the duties of visitor, apothecary and physician, or reduce or equalize the compensation without disadvantage, the same was done.

The Board has now under consideration a change in the pay and perquisites of a considerable portion of the officers of the house, which can be made with great advantage in an economical point of view, and without any disregard of adequate compensation for all services; the committee who have it in charge stated that they considered all perquisites in the shape of drawings from the store could be dispensed with, also the pay of servants, milk, cream, vegetables, dinners, &c., except in some few cases, where paramount reasons require their continuance.

In some instances an increase of salary is recommended, in lieu of the emoluments taken away. The reduction proposed in the number of officers can be carried out without in the least interfering with the efficiency of the administration of the Department. The office of farmer and gardener combined would not impose more than a proper amount of labor upon one officer, and the office of ferryman is considered a sinecure, devoid of all duties. It is

proposed that the house agent, apothecary and assistant be supplied with dwellings on the place, being regarded as very desirable, as the presence of one of them on the premises is necessary at all times, the saving that will be made by the proposed changes is estimated at two thousand dollars per annum, no drawings to be allowed to the agent's clerk and the practice of furnishing dinners to a number of officers to be discontinued.

All the milk, cream, vegetables and other articles, products of the farm or garden, to be charged to the officers at fair market prices.

The duties of the two offices of farmer and gardener to be performed by one person, to be known as the farmer and gardener, and the office of ferryman abolished.

#### THE MEDICAL BOARD.

Soon after the organization of the present Board, the office of Chief Resident Physician was abolished, and in place of which a Medical Board was formed of twelve able physicians and surgeons, to whom the care and responsibility of the health of the inmates are entrusted, under the regulations of the Board. After a brief interval, a code of rules and by-laws for the proper conduct of the Hospital were adopted, after the manner of the most approved hospitals in this country, together with such new regulations as the circumstances of the case demanded.

The Medical Board allotted to each of the members their terms of service, and made it obligatory upon them to visit the hospital four times a week, and as much oftener as there might be a necessity. These duties the medical officers on duty have fulfilled, and also have carried out to the letter the laws adopted for the government of the Hospital.

Many abuses in the waste of medicines, the enormous consumption of liquors, and the useless waste of leeches, has, as the report of the Board shows, been overcome, while, at the same time, the care of the sick by experienced nurses, and the use of good, wholesome diet, as a general rule, for the sick, has been carried out, to say nothing of those delicacies which the sick often need, which have not been withheld.

The number of patients in the wards of the Hospital have been as large, if not larger, than at any time previous,

and the diseases of almost every form, (excepting the most contagious, which are provided for elsewhere.) Many very difficult and dangerous operations have been performed in the surgical wards, with almost universal success.

In the medical wards, the cases of an acute character have been treated successfully, where the patient has been brought into the House sufficiently early to have any hope of success. The mortality in such an institution as the Hospital must necessarily be great, on account of the previous habits of most of the inmates, together with the sad inroads which diseases of the lungs and of the liver make upon such persons. The deaths, excepting in young children, have almost always been in those whose constitutions were entirely broken up by debauchery and excess of every kind.

Nothing has been spared by the present Board of Guardians to make the sick as comfortable as possible, and, if possible, to expedite their cure, although there has been a vast saving to the public in the present administration of the Hospital, yet everything necessary, in the way of diet and good medicines, have been amply supplied, and such articles as cream, fresh eggs, chickens, and other delicacies, have been procured at the mere suggestion of the attending physician or surgeon.

The Board of Guardians are anxious that the Medical Board shall be assisted in every way in the performance of their difficult duties, believing that the sooner the patients are cured and sent out of the House the cheaper it is in the end. The Medical Board believe that the present system of attendance upon the Hospital has been of vast benefit to the institution and a great saving to the public.

It will be observed that many essential reforms have been made in the management of the Almshouse, and from the accompanying report it will be seen that the present Board, in the short space of six months, have greatly reduced the expenditures and systematized matters throughout every department. With the sick under charge of a medical staff of the best reputation for medical science, &c., and the high character of the gentlemen of the Board of Guardians, is a sufficient guarantee of the good management and faithful administration of the affairs of the institution under their charge.

## COUNTY PRISON.

*Philadelphia, Jan. 11, 1860.*

TO THE HON. ALEX. HENRY,  
*Mayor of Philadelphia.*

SIR:—I beg leave to make the following statement:

Total number of commitments to the Prison			
for the year 1859, were,	-	-	19,846
Last year there were,	-	-	14,913
			<hr/>
Increase,	-	-	4,933

Expenses of the Prison, including Debtor's			
apartment, for the year 1859,	-		\$59,109 42
Expenses of the Prison, including Debtor's			
apartment, for the year 1858,	-		56,820 42
			<hr/>
Increase,	-	-	\$2,289 00

So you will perceive that the expenses only exceed this year over last \$2,289 00, with an increase of 4,933 prisoners. This increase can only be attributed to drunkenness.

Respectfully yours,

J. K. HOWELL, *Clerk.*

## REPORT OF THE CHIEF OF POLICE.

POLICE DEPARTMENT,        }  
                                   *January 14, 1860.* }

HON. ALEXANDER HENRY,  
*Mayor of the City of Philadelphia.*

SIR:—As Chief of the Police force, I take great pleasure in again presenting my Annual Report, That their condition is good, that they are under good discipline, and attention to duty, and, in my opinion, efficient in almost any emergency. The good order, peace, and quiet of the City is unprecedented. I have no new idea to suggest in regard to the police force. The Police Court have heard, during the year, one hundred and seventy-five cases, or charges, against police officers—four-fifths of which were of a trifling character.

In conclusion, I most respectfully submit the following Reports of Arrests made during the year 1859, together with their color, age, sex, nativity, and condition in life, and the various offences with which they were charged; also the number of persons, during the said year, that were lodged during the night in the different station houses; all of which are compiled from the reports of the several lieutenants,

All of which is most respectfully submitted.

SAML. G. RUGGLES,  
*Chief of Police.*

## REPORT OF CHIEF OF DETECTIVES.

HON. ALEXANDER HENRY,

*Mayor of the City of Philadelphia.*

SIR:—In compliance with your request, I cheerfully furnish you with a report of the transactions of the Detective Branch of the Police force of the City, since its re-organization under the recent Ordinance of the City Councils.

The brief period of time that I have exercised the functions of Chief of the Department, viz: since October 28, 1859, will limit the information communicated, and also the suggestions that a more extended experience might present.

It would have afforded me much pleasure to have furnished you with a report of the operations of the detective force for the past twelve months. There is much available data and statistical matter for such a purpose among the records of the office, but, for the want of the concentration of police business, a report cannot be made entirely reliable in most of its necessary details.

This branch of the police is now operating upon a plan, and code of laws, adopted at its re-organization, which with the continued fostering consideration of the Legislature and executive branches of the City Government, cannot fail to be more effective than heretofore, not only in the detection of criminals, but, what is perhaps a more pre-eminently wise police maximum and object, the *prevention of crime*.

The securing of an appropriate room and corresponding conveniencies, has greatly promoted the means of discharging the respective duties of the officers, which, with a private office for myself, affords facilities for the performance of the general and specific business of the department, with that privacy and dispatch, in most cases necessary, and often absolutely essential, to the success of detective police operations.

The office is now provided with the requisite books for keeping upon record the transactions of the department, viz: a "Blotter," in which the daily complaints, infor-

mation, and affidavits are entered. Another, in which are filed all handbills, advertisements, circulars, and telegraphic despatches, relating to police matters—another, “Register of offences, and property book,” the entries in which characterize the class of offences, describe the property stolen, its value, inventory of goods recovered, and receipts of the owners or claimants of the same, when restored to them. Another, containing a list and description of watches stolen and lost, and another for jewelry and silver ware.

We have also memoranda and statistics, seemingly of minor importance, but all tending to the information of the officers, and calculated to facilitate the discharge of their intricate and arduous duties.

Beside these, we are in possession of a registry of the names of notorious burglars, pickpockets, forgers and counterfeiters, &c., &c., known in the United States, embracing names and cases of special notoriety, from the year 1841 to the year 1858. At the latter date the centralization of police business ceased, from which time the detective department has experienced much embarrassment in its operations, the effect of which has been, doubtless, to prejudice both public and private interests. The registry of thieves, &c., contains nearly two thousand names, besides those of four thousand seven hundred and fifty depredations upon society, in the City of New York, committed to Blackwell’s Island, or to Sing Sing, during the period of time between the years 1831, and 1850. Our gallery of Rouges embraces over three hundred portraits, among which are some received in exchange from the police establishments of New York, Boston, Albany, Pittsburg, Cincinnati, and St. Louis.

In style and character, and in respect to its police importance, it is unquestionably superior to many, and certainly inferior to none in the United States.

Its advantages are made manifest daily, by the recognition of suspected or guilty persons, and resulting in the prevention of crime, or the arrest and conviction of criminals.

From Oct. 28th, 1859, to Jan. 1st, 1860, one hundred and thirty-five complaints have been recorded, prominent among which were, burglaries, 14; larcenies, 31; house

robberies, mostly by domestics and servants, 30; pockets picked, 5; shoplifting, 5; boarding house robberies, 6; hotel robberies, 5.

Fifty-seven warrants have been issued during the same time, and nearly all the parties charged have been arrested and are undergoing punishment or awaiting trial.

The estimated value of the property stolen was \$7,664, and of that recovered and returned to the owners \$6,913 13. In this estimate of losses, the amounts obtained from several banks by means of forged checks are not included. It is due, however, to the officers of the department to state that one individual, connected with the forgeries in October last, has been tried in our court, found guilty, and is awaiting sentence. With respect to the more recent forgeries, it is likewise due to the department to state that officers were despatched immediately to New York upon the trail of the perpetrators, who eluded their pursuits, as is believed, by going further east in hot haste, and leaving no clue to their whereabouts.

Forgeries upon banks and brokers, more numerous and more successful than in past years, may be accounted for by the increase of banking business, financial transactions and exchanges throughout the country. The success of forgers is promoted by the means of sudden and speedy transit from one place to another, and the aids they derive from confederate combinations of men and women located in different cities and towns, shielded from suspicion by carrying on an ostensibly legitimate business or profession, and from travelling parties, who under assumed names and false pretensions of character and business, put up at first class hotels, and pass off among citizens as reputable and honest individuals. The various means by which forgers obtain the signatures of individuals and firms are but indifferently known to the public. The *modus operandi* changing from old *dodges* to new, and new ones modified with old ones, go to make up strange histories of this class of roguish depredations, against which it seems almost impossible for the business community to be protected, even with the greatest caution and prudence.

The indisposition of bank officers and brokers to give information of such frauds, tends greatly to the immunity of offenders by lessening the chances of detection. The want

of promptness, or the neglect altogether to give information to the Detective Department, in recent instances of successful forgeries, I am satisfied, enabled the guilty parties to escape.

In reference to the subject of forgeries and counterfeiting, it is perhaps not out of the way for me to state, that action has been taken on the part of the banks of this city to constitute a fund, to be applied, as necessity may require, to the pursuit and prosecution of offenders in these two lines of roguery.

The counterfeiting of bank notes and the manufacturing of spurious coin is carried on to a surprising extent in various parts of the country, and with a success, too, that if actual data could be obtained, it would be questioned and doubted by those who pretend to be thoroughly posted on such matters.

Not unlike to forgers and forgeries, there are in numerous cities and towns combinations and organizations in this branch of villainy, comprising men and women, who, in the disguise of honest traders, mechanics, &c., &c., avoid the suspicions of their neighbors and acquaintances, and drive a brisk business in a counterfeit and spurious circulating medium.

No class of depredating rogues are more adroit in the secrecy of their operations, nor more so in the caution with which they trade with and supply their customers. The home supplies are furnished only to well known persons of criminal character, and the supplying of foreign customers is so guarded and protected by extreme prudence, that sellers and buyers seldom incur very serious consequences. The facilities of the United States mail furnishes reliable means to them for transmitting, in various amounts, large quantities of counterfeited paper, and also of coin, to wholesale dealers in every part of the country, while hundreds of small traders get their supplies through the same medium of transportation.

All this is known, and yet the detective police is denied any special advantage for active police measures, by and through the same agency that this class of rogues are enabled to depredate upon communities at large.

The right and privilege of search, and to pursue inquisitive enquiries and investigations, for the most part are for-

bidden by law or by popular sentiment, and hence the arts and designs of daring villains cannot be successfully met and defeated.

Nor is this all that the detective police have to contend against, and public justice to deplore. Those who circulate the base material are often turned upon society, after being arrested, by paying a consideration to some one in the guise of a police official. In many instances the ends of justice are defeated by the victim of the frauds withdrawing from the prosecution on account of the apprehended trouble and loss of time occasioned by attendance at court, or from, what is a much more censurable cause, a compromise conditional of being indemnified or reimbursed to the extent of their damage and loss.

Our banking institutions and brokers, and indeed all good citizens, should make common cause in a war upon counterfeiters, for it is evident that no class of rogues inflict a more wide-spread loss and damage to private interests than they do. The effect of their operations is experienced in the distrust and embarrassment of those engaged in mercantile, commercial, and financial transactions, and producing consequent prejudice against the genuine circulating medium.

More than nine-tenths of the smaller robberies and thefts would not be committed but for the facilities afforded for exchanging the stolen property for money, by reckless and dishonest pawnbrokers, established receivers of stolen goods, and purchasers of "odds and ends," located in different sections of the city. The products of larger robberies, (except of money), are likewise disposed of to pawnbrokers and receivers in the City, or in some of the large cities of the United States, so that, between the broker, the receiver, and the thief, a thriving business is carried on, our citizens despoiled of their property, the police thwarted in their efforts to detect them, and public justice defeated. To a very great extent this nefarious traffic or business is managed by parties in interest, established in different cities, who, in their respective localities, apparently pursue a legitimate and honest trade or calling. Generally, a business is adopted, and branch connections arranged, so that, in their establishments, they can dispose of the goods in the same character and condition as they are received, or, by

changing and altering these, get rid of them without suspicion and detection.

Without intending to disparage any portion of our police establishment, it cannot be denied that the Detective department is best qualified to execute the objects and purposes of its organization. With the knowledge possessed, by the officers, of men and women engaged in every species of crime, I am warranted in making the assertion, that if the earliest possible information of criminal acts was furnished, a much larger per centage of offenders would be arrested and punished. If the suspicions of citizens were confided to us, I believe a large amount of crime might be prevented, or detected in its incipient stages.

The means and facilities should be always at hand to enable officers to follow the pursuit of rogues beyond the limits of our city, for it is well known that most of those in the profession, after a bold and successful stroke of villainy, change their quarters and follow up their depredations with equal skill and dexterity elsewhere, or remain inactive for a time, until the public mind is no longer excited upon the subject.

It is proper for me to state to you that, upon my assumption of the duties of Chief, and the submission of the code of laws for the government of the force, I found a cheerful acquiescence on the part of every officer, in all the demands made upon his time, talents, patience, industry, and persevering energy, and it affords me additional pleasure to reiterate previous statements to you, that, during my brief official career, the several officers of the Department have worked with a highly commendable zeal and a determination favorable to an enlarged and more efficient public service. It is a matter for congratulation that our city is comparatively free from crime, and that peace reigns throughout our borders.

A sense of sincere gratification impels me to say that to the officers and members of the various branches of the Police establishment of the city, I am under many obligations for kind and generous counsel and aid in the discharge of my official duties. To many of my fellow citizens am I equally under obligations for favorable considerations; while to you, sir, I am deeply indebted for your uniform courtesy to me personally, and for the lively interest you

have manifested in the branch of the Police under my charge.

Very respectfully,

Your obedient servant,

JOS. WOOD,

*Chief of Detective Department.*

#### REPORT OF BEGGAR DETECTIVES.

Hon. ALEXANDER HENRY,

*Mayor of the City of Philadelphia :*

SIR:—We herewith present you a brief Report of all cases that have come under our notice since the fifth day of October, 1858, to the 31st day of December, 1859, both inclusive. We have the satisfaction in being able to Report the streets are comparatively clear of the class of vagrants to which you directed our special attention upon our appointment. Our business and office being now pretty well understood all over the city proper, a vast number are, from fear of arrest, kept from the public streets.

We have, during the time above stated, made nine hundred and thirty-six arrests, which have been disposed of as in the annexed Report.

We have found a great number of cases of parents being in a continued state of intemperance, the main support of whose dissipation has been by their young children being sent out to beg, all of whom we have remonstrated with, and assured them that if their children were permitted to follow such practices, they would be arrested and dealt with according to law; and from such persuasion and advice, we have known of seventy children who have been voluntarily given up, and sent to the various benevolent institutions open for the unfortunate.

In conclusion we beg to say, that from our past experience as Beggar Detectives, we are convinced that it is impracticable to keep our streets clear of adult vagrants whilst the Inspectors of the prison are obliged, from want

of room, to discharge them, thus thwarting our exertions to perform our duty, and we would respectfully recommend to your Honor to use your exertions to have a House of Correction established, where such cases might be properly disposed of.

All of which is respectfully submitted,

L. W. LAWRENCE.

#### REPORT OF FIRE MARSHAL.

FIRE MARSHAL'S OFFICE, }  
Philadelphia, January 20, 1860. }

HON. ALEXANDER HENRY,

*Mayor of the City of Philadelphia.*

SIR:—It affords me peculiar pleasure to be able to make to your Honor a most favorable report of the operations of the fire detective branch of the police for the year commencing January 1, and ending December 31, 1859. Our city has again been singularly blessed by a kind Providence in the immunity from the ravages of fire which it has enjoyed during the past year. No extraordinary or calamitous conflagration has occurred. During the whole year there were but two fires where the loss reached the sum of \$50,000. These were the burning of the hat manufactory in Lawrence street, and the destruction of the planing mill

of Mr. Sloat, in Kensington, both of which conflagrations were the result of accident.

The total number of fires for the year 1859 was 363, a large reduction of the number that took place in the course of the year 1858. The total amount of losses for the last year were only about \$242,000, being \$44,000 less than those of the previous year. Some \$45,000 of this loss was not covered by insurance, and at least \$75,000 of the amount was insured in foreign companies having agencies in Philadelphia, so that the sum of about \$122,000 was the whole loss our own underwriters sustained, a thing unprecedented in the history of fire insurance in this city.

As an evidence of how small was the loss that each company was called upon to pay, I may mention the fact that the entire amount paid by the Fire Association, which institution does a very extensive business in risks, principally on buildings, was \$3 043 68. The Association was consequently enabled to declare the largest dividends to the fire companies comprising it, ever made since its incorporation, each company receiving the handsome sum of \$738 03.

I am happy to report to your Honor a still further decrease of the crime of arson. Since the creation of the Fire Detective Police, there has been a diminution in the number of cases of incendiarism of at least fifty per cent. The number of convictions during the past year was *thirteen*, making the whole number of persons found guilty of arson since the fire detective department was organized THIRTY-THREE. The ages of these offenders ranged from eleven to sixty-five years. The highest sentence imposed upon any of them was ten years imprisonment, and the lowest six months. Two of the most important convictions were those of William Kraft and William Keating. The motive of the former was to defraud three prominent companies of underwriters, and that of the latter was the revenge of a bold bad man. The case of Kraft was one of the most extraordinary cases of arson ever brought to light in this country.

The Fire Detective Department has been in operation since June 1, 1857, now some two years and seven months. The statistics I have submitted tell their own story. No better proof can be furnished of the importance of maintaining such a branch of the police. Prior to its establish-

ment, from the year 1820 to the year 1857, a period of thirty-seven years, the convictions for arson in Philadelphia did not average one a year, and sometimes for a period of several years in succession, there was not a solitary conviction for this crime. These facts I have ascertained by a careful examination of the records of the criminal court.

I have no hesitation in saying that property is at this time better protected against fire, and life is more secure in Philadelphia, than in any other American city. Every fireman is constantly on the look out, and every policeman is a fire detective; the police and fire telegraph gives instant warning of danger at any point, and a score of steamers (some sixteen have been added to the fire department since my last annual report) are ever on the alert to dash, with lightning speed, to the scene of threatened conflagration.

A serious drawback to the orderly operations of the fire department, as well as a great annoyance to all well disposed firemen, is the tampering with the signal boxes of the fire alarm telegraph by mischievous and malicious parties. There is no legal enactment to correct the evil. I would most respectfully recommend the passage, by the present Legislature, of a law, making it a grave misdemeanor to meddle in any way (either by springing or breaking them) with the alarm boxes of the municipal telegraph. I would also recommend that the penalty should be fine or imprisonment, or both, at the discretion of the court.

There has been a marked improvement in the character of the fire department during the past year. The scenes of disorder, so prevalent in former years, are now almost unknown. This I know must be a subject of special gratification to your Honor. The change is hailed by every good citizen as a glorious reform.

I have the honor to be,

Very respectfully,

Your obedient servant,

ALEXANDER W. BLACKBURN.

REPORT OF SUPERINTENDENT OF THE POLICE AND FIRE  
 ALARM TELEGRAPH.

OFFICE SUPERINTENDENT OF POLICE AND }  
 FIRE ALARM TELEGRAPH. }  
*Philadelphia Jan. 1860.* }

HON. ALEXANDER HENRY,

*Mayor of the City of Philadelphia.*

SIR:—In submitting the fourth annual report of this

branch of the public service, there is little new or interesting to communicate.

It affords me great pleasure to report, that so far as the present accommodations will allow, all the lines and instruments are in good working order.

The importance of the Police and Fire Alarm Telegraph, as an auxiliary to the Police and Fire Departments, is no longer a question, and the original friends of the enterprise may congratulate themselves that the experience of the past four years has demonstrated its necessity.

Since my last report, five additional circuits have been constructed, connecting nearly all the Steam Fire Engine Houses with the Central Station. The business of the office has largely increased, and is increasing, and yet there has been no additional to the number of officers detailed for duty as operators, nor has any unnecessary change been made in the division of labor, exclusive of the Superintendent and assistants at the Central Station, the number of operators is thirty, all of whom, as you are aware, may at any time be called upon to perform regular Police duty.

The amount expended for the maintenance of the Telegraph for the past year, exclusive of salaries, was :

Battery, Acids, &c.,	-	-	-	\$653 72
Repairs.	-	-	-	800 00
Stationery,	-	-	-	366 87

The whole number of messages transmitted over the wires during the year, was sixty thousand five hundred and nineteen, (60,519.)

The number of strayed and stolen animals restored to owners by means of this Department, was six hundred and forty-four, (644.)

The Coroner was notified by Telegraph, five hundred and fifty-two, (552.)

The number of missing persons restored to friends, was four hundred and eighty-three, (483.)

The description of counterfeit notes, cautioning store-keepers and others, two hundred and twenty-nine, (229.)

Police officers subpoenaed by Telegraph to appear, Grand Jury and Courts, twenty-nine hundred and sixty-four, (2,964.)

Number of lost children restored to parents, thirty-eight hundred and ninety-two, (3,892.)

Frequent applications from Citizens and Fire Companies have been made to me, during the past year, for additional means of communicating, promptly, alarms of fire. The built up portions of the City are rapidly extending, and there is no doubt that an additional number of signal boxes should be located at once, especially in the extreme southern part of the City. I respectfully recommend, through you to Councils, that an appropriation be made for that purpose.

I have heretofore urged the inadequacy of the present accomodation at the Central Station for the business of the Department.

The Telegraph was constructed to facilitate public business, and accomodate our citizens, and yet in an office, which, from the nature of its business, attracts a large number of persons, there is hardly room for the operators to stand; besides, the means of access is so inconvenient as materially to interfere with the ordinary routine of business. If a riot or disturbance of any kind should make it necessary to use the Central Police Office for prisoners, or to concentrate a police force, (the very time when the Telegraph would be most needed) it would be almost impossible for any person to communicate with the operators.

The battery room is in no way suited for the purpose, and consequently is a source of increased expense to the Department. This must continue until Councils shall be able to provide other and proper rooms. I cannot too strongly urge upon you, sir, the necessity for an immediate change of location, and hope you will present the subject forcibly to Councils.

I append hereto a statement showing the number of messages transmitted to and from the Central Station, together with such other statistics as may be useful or interesting.

Permit me to acknowledge the many courtesies I have received from you in our official intercourse, and the interest you have manifested in the continued success of the Police and Fire Alarm Telegraph, and through you to thank my assistants and the whole police force, for their

cordial co-operation in the performance of our public duties.

Very respectfully,

W. J. PHILIPS,  
*Superintendent.*

## SUPPLEMENT TO CONSOLIDATION ACT.

### *A Further Supplement to the Act Consolidating the City of Philadelphia.*

SECTION I. Be it enacted by the Senate and House of Representatives of the Commonwealth of Pennsylvania, in General Assembly met, and it is hereby enacted by the authority of the same, That the Mayor of the City of Philadelphia for the time being, and the two citizens who next respectively preceding him shall have been elected by the qualified voters of the said city to the office of Mayor, and one citizen who shall be elected by the Select and Common Councils of the said city, in joint meeting, on the last Thursday in May, in the year one thousand eight hundred and sixty, and on the last Thursday in May annually thereafter, for the term of one year from the first day of June then next ensuing, and one citizen who shall be appointed by the Court of Common Pleas of the City and County of Philadelphia, in the month of May, one thousand eight hundred and sixty, and in the month of May annually thereafter, for the term of one year from the first day of June then next ensuing, shall, on and after the first day of June, one thousand eight hundred and sixty, be the Commissioners of Police for the City of Philadelphia, and shall form a Police Board, over which the Mayor of the City shall preside, for the appointment, organization, and supervision of the Police of the said city, and for the performance of such other duties as shall be herein enjoined; and they shall have and exercise all the powers, rights, and authorities given by this Act: *Provided*, That no member of the said Councils, or of any municipal department, or board, or officer connected with either thereof, shall be

elected or appointed, or shall serve as a Commissioner of Police: *Provided also*, That if either or both of the two citizens hereby constituted Commissioners of Police by virtue of their election as aforesaid to the office of Mayor, shall decline to act with, or shall resign from the said Police Board, or shall cease to reside in the said city, or shall, by death, or otherwise, vacate such office, the said Court of Common Pleas shall thereupon appoint to the remainder of the term so vacated; and whenever the office of any Commissioner of Police appointed by the said Court, or elected by the said Councils, shall be vacated as aforesaid, the unexpired term thereof shall be supplied and filled by said Court which appointed, or at any stated meeting thereof jointly by the Councils which elected the Commissioner whose office is thus vacated.

SECT. II. That no salary or emolument shall be paid or allowed to the said Commissioners of Police for services as members of the Police Board: *Provided*, That the salary of the Mayor shall not hereby be affected.

SECT. III. That any one of the said Commissioners, so constituted by reason of having previously served as Mayor of the City, or by appointment or election as aforesaid, who shall, during his term of office, receive any nomination for an office elective by the people, without publicly declining the same within ten days succeeding the said nomination, shall be deemed to have thereby vacated his office; and any one of the said Commissioners may be removed from office on impeachment for misdemeanor in office, or other sufficient cause or charges, to be preferred by the Common Council, and tried by the Select Council, in the manner prescribed by the Constitution and laws of this Commonwealth as to impeachment by the House of Representatives and trial thereof by the Senate.

SECT. IV. That the said Commissioners, before entering upon their duties, shall take the usual oath of office, before one of the Judges of the Court of Common Pleas, and shall thereupon organize themselves into a Board of Police, whereof a majority of the said Commissioners shall be a quorum for the transaction of business, and the meetings thereof shall not be open or accessible to citizens. The said Board is hereby authorized, from time to time, to adopt such rules and regulations for its own government as it may

deem expedient, provided the same shall in no wise be contrary to the laws of this Commonwealth; and it shall elect a Secretary, a Deputy Clerk, and a Messenger, to hold office at the pleasure of the Board, who shall keep a record of all the proceedings thereof, and perform such other duties as may be required, and who shall receive such salary therefor as may be determined by the City Councils.

SECT. V. That it shall be the duty of the said Police Board, through the police force hereinafter constituted, at all times to preserve the public peace everywhere within the boundaries of the said city, to protect the rights of persons and property therein, to prevent crime and arrest offenders, and to cause the laws and ordinances of the city to be duly executed, and to the said end, for the proper government and discipline of the said police force, the said Board may establish such rules and regulations as shall be needed.

SECT. VI. That the police force of the City of Philadelphia shall consist of a Chief of Police, a Superintendent of Detectives, two Surgeons of Police, a Fire Marshal, four High Constables, twelve Detectives, and so many Captains of Police not less than sixteen, so many Sergeants of Police not less than thirty-two, and so many Police Patrolmen not less than six hundred and fifty, as may be determined upon by the Select and Common Councils of the said city, by whom the amount of salary to be paid respectively to the said officers and policemen shall be fixed, and such salary shall not be diminished during their respective service. All of the said officers and policemen shall be severally appointed by the majority of the members of the said Police Board, in the mode prescribed by this Act, and each person so appointed shall hold office so long as he shall faithfully observe the rules of the said Board and execute the laws of the Commonwealth and the ordinances of the City, or until, upon medical inspection, he shall be declared physically incapacitated therefor; and no officer or policeman shall be removed from the said police force by the Police Board until after written charges shall have been preferred against him to the said Board, and sustained by a majority of the Commissioners, after opportunity shall have been afforded him of being heard in his defence: *And provided*, That whenever any vacancy shall

occur in the office of Captain of Police, the same shall be filled by an appointment from among the persons then serving as Sergeants of Police, and whenever a vacancy shall occur in the office of Sergeant of Police, the same shall be filled by an appointment from among the persons then serving as Police Patrolmen, and whenever a vacancy shall occur among the Police Patrolmen, the same shall be filled by appointment from among the persons then registered substitutes, as hereinafter enacted.

SECT. VII. That in addition to the permanent police force hereby constituted, the said Police Board shall, in manner aforesaid, appoint fifty persons as substitutes, who shall be properly registered as such, and who shall severally serve whenever so required in case of the suspension or other temporary absence of any police patrolmen, and from whom all vacancies among the said patrolmen shall be filled. *Provided*, That the said substitutes shall only receive the pay to which the patrolmen, in whose stead they shall respectively serve, would have been entitled if they had remained on duty.

SECT. VIII. That the qualifications for appointment, enumeration, and distribution of duties, mode of trial, and causes for removal from office of each officer, patrolman, and substitute of the said police force, shall be particularly prescribed and defined by the rules and regulations of the Police Board. *Provided nevertheless*, That no person shall be so appointed to office as patrolman in the said police force, or as a substitute connected therewith, who cannot read and write the English language, or who shall not have been legally qualified as a voter in the City of Philadelphia for at least four years next preceding his appointment, or who shall ever have been convicted of felony, or who shall not, upon inspection by one of the Surgeons of Police, be certified as physically competent for the performance of police duties.

SECT. IX. That the Police Board may, on the application of any citizen showing the necessity thereof, appoint any additional number of patrolmen to do duty at any place within the said City, at the charge and expense of the person or persons by whom the application shall be made, and the patrolmen so appointed shall be subject to the orders of the Board of Police, and shall, so far as practicable, con-

form to its general discipline, and shall, during the term of their holding appointment, possess all the powers and privileges of the regular patrol force, and the said appointment may at any time be revoked by the said Board, without assigning cause therefor. The Police Board may also, upon any emergency of riot, appoint as many special patrolmen, without pay, from among the citizens as it may deem advisable, and such special patrolmen shall possess all the powers and privileges, and perform all the duties of the patrolmen of the regular force.

SECT. X. That the Police Board shall cause to be kept, books of record of the police, wherein shall be entered the name of every member of the police force, and of the substitutes connected therewith, with his place of nativity, age, date of citizenship, if born out of the United States, time of residence in the city of Philadelphia, former occupation, place of residence, date of appointment, and removal from office, with the cause of the latter; and no person who shall ever have been removed from the police force established by this act for cause, shall be re-appointed by the said Board to any office in the said force. It shall also cause to be kept, a registry of all stolen property recovered by members of the police force, together with the name of the owner, if ascertained, the statement of the place where found, and of the person from whom taken, with the date of its receipt and other circumstances connected therewith, and the name of the officer recovering the same. It shall also cause to be kept, general complaint books, in which shall be entered every complaint preferred upon personal knowledge, with the name and residence of the complainant. It shall also cause to be kept, books accessible to all citizens, for the registry of lost or stolen property. It shall also cause to be kept in suitable books, complete inventories of all public property in the several police stations, and of all badges, rattles, and other personal accoutrements in use by the police force, belonging to the City.

SECT. XI. That all the telegraphic apparatus, public police property, books, records, and accoutrements, now in the possession of the Police Department of the City of Philadelphia, are hereby given for the use of the Police Board herein constituted. *Provided*, That the said telegraphic apparatus shall remain under the supervision of the

Superintendent of the Police and Fire Alarm Telegraph, as provided for by Ordinances of the City Councils.

*Provided further*, The Superintendent of the Police and Fire Alarm Telegraph shall be appointed by the Mayor, and hold office during good behavior, and with the consent of the said Mayor, he shall select and appoint one Assistant Superintendent, four Telegraph Operators to be central operators, and one Line Repairer, all of whom shall be immediately responsible to the said Superintendent for the performance of their respective duties, and shall be removed by the said Board, as provided for in other cases of removal under this Act. And is hereby expressly enacted that if any person shall wilfully and maliciously injure or destroy any of the posts, wires, or other materials or fixtures employed in the construction and use of the line of Electrical Police and Fire Alarm Telegraph belonging to the City of Philadelphia, or to the Electrical Telegraph Lines of the Trustees of the Philadelphia Gas Works, or in any way attempt to wilfully communicate false alarms or intelligence through the said lines, or in any way interfere with, or lead or induce from its wires, the electric current or a portion thereof, properly belonging to and in use, or in readiness to be made use of for the purpose of communicating telegraphically, with the said lines, or who shall aid and assist therein, shall, on the conviction thereof, be punished for such misdemeanor by the Court of Quarter Sessions of the City and County of Philadelphia, by a fine not exceeding one hundred dollars, or by imprisonment in the County Prison not exceeding three months.

SECT. XII. That no person holding office under this act shall be liable to perform duty as a juryman or in the militia.

SECT. XIII. That it shall be the duty of the Police Board, on or before the first day of December in each year, to furnish the Councils of the City of Philadelphia an estimate of the amount, under separate and distinct items, of expenditure, that in their judgment will be required, during the next fiscal year, for the maintenance of the police force of the said city, and for all necessary expenses appertaining thereto, and all sums expended by or for the purposes of the Police Board shall be paid by the City Treasurer, upon orders drawn by the Mayor, under appropriations regularly made by Council.

SECT. XIV. That it shall be the duty of the Police Board, with the consent of the City Councils, to divide the city into such districts as may be necessary for its proper police government, and to assign one captain and two sergeants to each of the said districts, to detail and change without regard to residence, the several members of the force to such duties and districts as it may deem advisable, to superintend the purchase of all necessary supplies, and the repair and erection of all police stations, whenever provision therefor shall be made by Councils. No expenses shall ever be incurred by the Police Board unless the same shall be authorized and provision therefor made by Councils. The office of the Board shall be located in such place as may be designated by the said Councils.

SECT. XV. That the Police Board shall have power to issue subpoenas, tested in the name of the Mayor, to compel before it the attendance of witnesses upon any proceedings authorized by its rules and regulations. Each Commissioner of Police, the Chief of Police, and the Secretary of the Police Board, are hereby given power to administer, take, receive, and subscribe all affirmations and oaths to any witnesses summoned and appearing, in any matter or proceeding authorized as aforesaid, or to any depositions necessary by the rules of the said board. Any wilful and corrupt false swearing, by any witness or person making deposition before any of the officers aforesaid, to any material fact in any proceeding under the said rules and regulations, shall be deemed perjury, and shall be punished in the manner prescribed by the laws of the State for such offence.

SECT. XVI. That whenever any member of the police force or substitute shall become bodily disabled in the actual performance of his duty, on the certificate of a surgeon of police, stating the cause and nature of the injury, his pay during the time of such inability to perform duty may be allowed by the Police Board; if such bodily disabling shall be permanent, or if any member of the police force or substitute shall be killed in the performance of his duty, or shall die from the effect of any injury received by him whilst in such performance, it shall be reported by the said Board to the City Councils, who shall thereupon appropriate such sum as they shall deem just to the party so disabled, or in case of his death to his legal representatives.

SECT. XVII. That the Police Board shall make suitable provisions for the taking by members of the police force, and by the substitutes connected therewith, of an oath of office, and for the registry of the same, in a book to be kept for that purpose, which oath of office may be taken before any Commissioner of Police who is hereby authorized to administer the same. The Police Board shall have power, by its rules and regulations, to prescribe the dress, badges and accoutrements to be worn and used by the members of the force, and to authorize, whenever they may deem it necessary, the carrying of such weapons and firearms as shall be needful for their personal safety.

SECT. XVIII. That from and after the first meeting of the Police Board, under the provisions of this act, it shall possess all the power and authority heretofore conferred by law upon the Mayor of the City of Philadelphia, as the head of the police department of the city, which power or authority shall relate to, or in any way be connected with, the police government, police appointments, or police discipline within the said City, and from and after the said first meeting of the Police Board, the duty, authority, and power of the said Mayor in relation to police government, appointment, and discipline shall wholly cease, and vest as aforesaid in the said Police Board, except so far as the said Mayor shall, as one of the said Commissioners of Police, have and exercise the same in the said Board. *Provided always,* That nothing in this Act contained shall in any manner affect or take away the power and authority now vested in the Mayor, for the suppression of riot or disturbance, or limit his control of the police force of the said City for such purpose.

SECT. XIX. That the Police Board shall remove from office such of the members of the present police department of the City who are not possessed of the qualifications set forth in section eight of this Act, or who do not possess the qualifications that the said Board shall, by their rules and regulations, prescribe as essential for appointment to the police force herein constituted.

SECT. XX. That so much of the Act, entitled, "A further Supplement to an Act, entitled, 'An Act to Incorporate the City of Philadelphia,' passed February second, one thousand eight hundred and fifty-four," and of all other

acts of the General Assembly of the Commonwealth of Pennsylvania heretofore passed, inconsistent with the provisions of this act, is hereby repealed.

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Trusts and Fire Department, to whom was referred the communication of the Chief Engineer, informing Council that he had suspended the Philadelphia Hose and Steam Fire Engine Company, beg leave to Report, that they have given the matter a full and careful consideration, and from the evidence submitted, are of the opinion that there was no intention on the part of the Company to disobey the orders of the Assistant Engineer, but owing to the confusion at the time,

the order was not obeyed with desired promptness, and the Committee in the opinion thus given, do not reflect on the action of the Chief Engineer, but to the contrary believe him to have been actuated by a desire to faithfully and fearlessly discharge the duties of his position, they therefore ask the adoption of the following Resolution.

REPORT OF THE VISITING COMMITTEE ON GIRARD COLLEGE  
FOR THE MONTH OF JANUARY, 1860.

---

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The monthly visiting Committee of Councils, on the Girard College for the month of January, performed that pleasing duty on Wednesday afternoon, 25th inst., and they respectfully Report, That they visited and examined the various Departments of the College, and found everything in excellent condition.

Your Committee think that inasmuch as the law makes every member of Councils a Trustee of the College, that a greater interest on the part of Councils should be manifested, by a prompt and full attendance, of the Visiting Committees, on the days appointed for that purpose.

The Girard College is justly the pride of our City, and all the interests of its management should be cherished with unceasing care, and constant attention by Councils.

### REPORT OF THE COMMITTEE ON POLICE.

---

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Police, to whom was referred the Resolution “in the matter of making some suitable recommendation and provision for a House of Correction,” respectfully Report, that the subject was referred to a Sub-Committee, consisting of Messrs. Leidy and Jones of Select Council, and Messrs. Thomas and Potter of Common Council, to inquire and examine into the subject. The Sub-Committee having prepared a Report, which has been adopted by the Committee on Police, it is herewith submitted and the adoption of the Resolution recommended.

THOMAS POTTER, <i>Chairman</i> .	JAMES PETERS,
JOHN M. FORD,	CHARLES THOMPSON JONES,
S. SNYDER LEIDY,	WM. BRADFORD.
JOHN THOMPSON,	

---

GENTLEMEN:—The Sub-Committee on Police to whom was referred the Resolution in relation to providing for a

House of Correction and Employment, Report that in order to obtain all the information possible on this important subject, they conferred with Sub Committees of Guardians of the Poor and Inspectors of the Prison. After several meetings held, at each of which there was a free interchange of opinion expressed, as to the authority given and to be exercised by the Inspectors of the County Prison and Guardians of the Poor, in the matter of sending persons to the Almshouse and committing persons to the County Prison, the Committee were convinced that there exists already Acts of Assembly, one having passed the fifth day of March 1828, sufficient to meet the entire purpose of a House of Correction and Employment at the Almshouse, not only to provide for the relief of the poor, but for the correction and employment of vagrants, able bodied paupers, disorderly persons, &c.

Your Committee express regret that the City should have so long suffered for the want of a House of Correction and Employment for the idle and dissolute, when Acts of Assembly have so long existed, giving all the authority needed in the premises; that the Guardians long since felt the truth of this, it is fair to suppose, since there are to be found within the hollow square of buildings at the Almshouse, a range of one story frame work-shops, wherein are employed shoemakers, painters, and carpenters. and a small brick building containing weavers, the whole number employed about sixty; these work-shops were constructed many years ago, but no effort of any moment had ever been made thereafter, except in the instance of a proposition submitted by the last Board of Guardians, 1858-59, to Councils, to give them further extension, which passed Common Council and was defeated in Select Council. Had there been buildings constructed more substantial, and of much greater extent on the Almshouse grounds, in order and to the end, that the requirements of the law could have been properly carried out, the citizens of Philadelphia could witness to-day, one of the most efficient establishments in the United States, complete in all its details, for the relief of the poor, the correction and employment of the idle, disorderly persons, vagrants, and habitual drunkards.

In support of this belief, your Committee refer to Section

XIV of an Act of Assembly, passed March 5, 1823, relating to the Guardians of the Poor, as follows :

SECTION XIV. That the said Board of Guardians be, and they are hereby authorized, whenever any person or persons shall be received into the said Almshouse, to inquire into the situation and circumstances of such persons, and into the causes which have produced his or her application for relief ; and if in the opinion of said Guardians the case shall be such as to make it expedient, they shall cause to be opened in the books of the Almshouse an account with the person or persons so received, and shall charge him, her, or them, a fair and moderate price for the maintenance and other articles furnished for their relief ; and shall credit such persons with a just and liberal allowance for any work they may perform, or services they may have rendered ; and persons who may be sent to the hospital and cured of any disease brought on by vicious habits, shall be removed to the house of employment ; and also any idle, disorderly and vagrant person, who may be sent to the said almshouse by any of the said Guardians, may be detained in the said house by the Board of Guardians. and compelled to perform such work and services as the said Board may order and direct, until they have compensated by their labor for the expenses incurred on their account, unless discharged by special permission of the Board of Guardians ; and it shall be the duty of said Board of Guardians to furnish such person or persons as aforesaid, with sufficient work and employment, according to their physical abilities, so that the opportunity of reimbursement may be fully afforded ; and for the more complete carrying into effect the provisions of this law, the said Board of Guardians are hereby authorized and empowered to exercise such power as may be necessary to compel all persons within the said almshouse and house of employment, to do and perform all such work, labor, and services, as may be assigned to them by the said Board of Guardians. *Provided*, the same be not inconsistent with the condition or ability of such persons.

And also, Section XIV of an Act of Assembly, passed 14th April, 1835, relating to the County Prison, as follows:

SECTION XIV. All persons who may be convicted ac-

according to the existing laws of this Commonwealth, before the Mayor, Recorder, or any Alderman of the City of Philadelphia, or before any Alderman or Justice of the Peace of the County of Philadelphia, as a vagrant or disorderly person, shall be sentenced to suffer separate or solitary confinement at hard labor, in the Philadelphia County Prison, for the term of one month, and be fed, clothed, and treated as convicts in said prison, are to be fed, clothed, and treated; *Provided*, That the inspectors may discharge persons so committed, as vagrants and disorderly, or send them to the Almshouse, there to be dealt with according to the provisions of the Fourteenth Section of the law passed the fifth of March, one thousand eight hundred and twenty-eight, entitled, "An Act for the relief and employment of the poor of the City of Philadelphia, the District of Southwark, and the Township of the Northern Liberties," (and Penn.)

These Acts of Assembly point clearly to the spirit and intent of a law that should provide for a House of Correction and Employment, by the concurrent action of the Inspectors of the County Prison, and the Guardians of the Poor, and in such manner it is believed, as would give to the Guardians of the Poor the means of protecting and providing for the really unfortunate poor who have a right to assistance from the public, while the vagrant poor are generally vicious and self-destroyed, and forfeited to a great extent their social privileges, should be committed to prison, as provided for by law, and be under the charge and protection of the Inspectors of Prison.

Your Committee can only recommend, therefor, in this connection, that the Department of Poor and Department of Prisons, each for itself, make early application to Councils for an appropriation that shall enable the one to purchase ground in addition to that already owned by the City of Philadelphia, joining the Prison on the south, to the end that they may construct suitable work-shops within the extension of the prison walls, to enable them to employ vagrants, &c., and to extend accommodations for prisoners, the present buildings being much too limited,—and to enable the other, that is to say, the Guardians of the Poor, to make an application to Councils for an appropriation to the Department of Poor, for such an amount as they may deem

necessary in the premises, to enable them to construct suitable work-shops that may be deemed proper and necessary for the employment of the unfortunate poor, who may be sent to that institution.

In recommending this course, the Committee feel that all the benefit that could be afforded by a separate institution, as was designed by a recent Act of Assembly, may be afforded by the plan proposed, and thus save to the City of Philadelphia an outlay of at least three hundred thousand dollars, besides do away with the necessity of an additional Board of Managers, and the employment of salaried officers. And in conclusion offer the following Resolution.

S. SNYDER LEIDY,	} <i>Sub Committee.</i>
DANIEL G. THOMAS,	
THOMAS POTTER.

RESOLUTION.

*Resolved*, By the Select and Common Councils of the City of Philadelphia, That the Committee be discharged from the further consideration of the subject.

REPORT OF THE SPECIAL COMMITTEE.

---

*To the Common Council of the City of Philadelphia.*

GENTLEMEN.—The Committee appointed to confer with a similar Committee of Select Council, as to the difference between the two Chambers in relation to an Ordinance, entitled, “An Ordinance to make an appropriation for the purchase of the Bridge over the river Schuylkill, at the Falls of Schuylkill,” respectfully Report, That they have agreed to recommend the adoption of the following, in lieu of the third section of the Ordinance:

SECTION III. The sum of fifteen thousand dollars appropriated by the first section of this Ordinance shall be repaid into the City Treasury from a loan to be hereafter created.

Your Committee further recommend that Common Council adopt the following amendment made by Select Council to the second section, insert after the words "shall be" in the eighth line, the words "clear of all incumbrances whatever and."

#### AN ORDINANCE

To make an Appropriation for the purchase of the Bridge over the river Schuylkill, at the Falls of Schuylkill.

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, That the sum of fifteen thousand dollars be, and the same is hereby appropriated to the Department of Highways, to pay the Falls of Schuylkill Bridge Company for the Bridge belonging to said Company crossing the river Schuylkill at the Falls of Schuylkill.

SECT. II. Warrants for the said appropriation shall be drawn by the Chief Commissioner of Highways whenever the Falls of Schuylkill Bridge Company shall convey to the City of Philadelphia all their right, title, and interest in the said Bridge, with the contiguous land now held by them, which conveyance and title shall be approved by the City Solicitor.

SECT. III. That the said sum of fifteen thousand dollars shall be returned to the City Treasury at any time hereafter, when a loan shall be executed for the purpose of purchasing said Bridge.

## APPENDIX No. 109.

## REPORT OF THE SPECIAL COMMITTEE.

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—Your Committee, to whom was referred the petition of sundry citizens of the 24th Ward, praying a re division of the Election Divisions of said Ward, having carefully considered the subject, beg leave to Report:—

That it is true, as set forth in the said petition, that all of the election divisions of said Ward exceed the number of taxable inhabitants provided by the Act of Assembly of the 28th of April, 1851, and some of them are twice the number fixed by said Act. The Act of 1851 still remains in force, and by the third section of the Act of February 2, 1854, it is made the duty of the City Councils to rearrange the divisions of the Ward having the excess of voters therein. In the examination of this matter, we find that there has not been an election since 1855, which has not, under the law imposed upon Councils, the duty of rearranging the divisions of this Ward.

Our duty being thus peremptory, we entered upon our work with a full knowledge that the task imposed was one that required a great deal of consideration, so as to afford to citizens the best facility in exercising the right of suffrage on the one hand, and so as not to produce unnecessary confusion on the other, as is the case now in the election of School Directors; in part of the Ward, Citizens are directed to vote at one place for City, County, and State officers, and for School Directors at another.

We find that, in the Divisions as they now exist, the return of the taxables for 1859 shows that the—

1st Division contains,	-	-	479 taxables.
2nd     "         "	-	-	553     "
3d       "       "	-	-	542     "
4th       "       "	-	-	600     "
5th       "       "	-	-	787     "
6th       "       "	-	-	940     "

Upon examination we found that for survey districts the Ward was divided by Market street through the centre; so we determined to leave that as the natural division of the Ward, and to divide that part of the Ward, south of Market street, into four election divisions, and that north of Market street into five election divisions.

In making these divisions, we have had some regard to territory as well as to population, and have endeavored to give to the more rapidly growing divisions room to expand without creating the necessity within another brief period of time of again dividing.

Your Committee propose to divide the Ward into nine Divisions, to contain, as near as we can ascertain, as follows:

1st Division,	-	-	-	479	taxables.
2nd     "	-	-	-	315	"
3rd     "	-	-	-	316	"
4th     "	-	-	-	485	"
5th     "	-	-	-	506	"
6th     "	-	-	-	429	"
7th     "	-	-	-	396	"
8th     "	-	-	-	601	"
9th     "	-	-	-	475	"

We do not pretend to say that our work is perfect; but we believe it to be as good as could be obtained from the information we have been able to get, and we have tried all sources that were open to us.

We have, with the exception of a single instance, abolished the crooked lines that have heretofore been the boundaries of most of the divisions, and we have substituted in lieu thereof, as far as practicable, straight lines of streets and avenues.

Your Committee, therefore, Report the following Ordinance, and respectfully ask its consideration.

D. C. ENOS, <i>Chairman</i> ,	SAML. W. CATTELL,
JOS. S. RILEY, JR.,	ALEX. C. GARVIN,

#### AN ORDINANCE

To Re-arrange the Election Divisions of the Twenty fourth Ward.

SECTION I. The Select and Common Councils of the

City of Philadelphia, do Ordain, That in lieu of the present Election Divisions of the Twenty-fourth Ward, said Ward shall be divided into *nine* Election Divisions, as follows, to wit:

1st Division—All that part of said Ward lying south of the Baltimore turnpike and Mill Creek, shall be the First Division, and shall vote at the house of Charles W. Lloyd, on the Darby plank road.

2d Division—All that part of said Ward bounded by Market street, by Cobb's creek, the Baltimore turnpike, and Fifty-first street, shall be the Second Division, and shall vote at the house of Benj. Sharp, on Market street, east of Forty-third street.

3d Division—All that part of the said Ward bounded by Market street, Fifty-third street, Westminster avenue, Fifty-seventh street, City avenue, and Cobb's creek, shall be the Third Division, and shall vote at the Public School House, in Haddington.

4th Division—All that part of said Ward bounded by Westminster avenue, Fifty-seventh street, City avenue, and the river Schuylkill, shall be the Fourth Division, and shall vote at the Columbia Hotel, at Hestonville.

5th Division—All that part of said Ward bounded by Market street, Thirty-ninth street, Lancaster avenue, Westminster avenue, and Fifty-third street, shall be the Fifth Division, and shall vote at the house of Saml. S. Wise, on Lancaster avenue.

6th Division—All that part of said Ward bounded by Westminster avenue, Lancaster turnpike, Bridge street, and the river Schuylkill, shall be the Sixth Division, and shall vote at the Mantua Public School House.

7th Division—All that part of said Ward bounded by Bridge street, Thirty-ninth street, Market street, and the river Schuylkill, shall be the Seventh Division, and shall vote at the house situate at the junction of Market street and Lancaster turnpike.

8th Division—All that part of said Ward bounded by Thirty-seventh street, the Darby plank road, the southwestern boundary line of the Blockley Alms House, (including the Alms House property) the river Schuylkill, and Market street, shall be the Eight Division, and shall vote

at the West Philadelphia Hall, corner of Thirty-seventh and Market streets.

9th Division—All that part of said Ward bounded by Market street, Thirty-seventh street, Darby plank road, (westwardly side) the south-western boundary line of the Blockley Alms House, the river Schuylkill, Mill creek, the Baltimore turnpike, and 41st street, shall be the Ninth Division, and shall vote at the office of Alderman James Allen, Chestnut street, below Fortieth street.

### REPORT OF THE COMMITTEE ON FINANCE.

---

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Finance, to whom were referred the claim of James Murphy, late Steward of the Almshouse, for the expenses of boarding the Assistant Resident Physicians of that Institutions, from January 1st, to July 12th, 1858, respectfully Report, That they have carefully examined the same, and are satisfied that it is correct and just, and that it ought to be paid. It appears by the annexed statement of the circumstances and the laws of the Board of Guardians, upon which this claim is founded, that the Steward was fully authorized, if not absolutely required, to furnish boarding for the Physicians, while it is manifest that the City is legally bound to liquidate the claim, as the Board of Guardians expressly declared that such bills should “be paid by the Institution.”

The Committee therefore submit the annexed Ordinance, and ask that it may be passed.

" 10. At 2 " 384,800,	-	7,696 00

NOTE.—The Sinking Fund on Loan 10th is paid to and invested by the City.

The above tables give the specific replies to the several parts of the Resolution of Councils, as they are understood by the Trustees ; but they do not show the actual state of the Sinking Fund, from the fact that a large part of it is invested in City Loans, not created for the use of the Works. These investments are applicable to the redemption of each Gas Loan as it falls due, although not specifically credited to any particular one of said loans ; and further, the Trustees provide, out of their receipts, the sum of thirty-six thousand dollars per annum, to pay the interest on and redeem the principal of \$450,000 of the City Debt, being the estimated values of the Spring Garden, Moyamensing, West Philadelphia, and Frankford Gas Works, placed in the hands of said Trustees, by Ordinance of March 20, 1855.

They have also to provide for the extinguishment of the purchase money of the Gas Works of the Southwark and Moyamensing, Germantown, Richmond, and Manayunk Gas Companies, purchased by them for the City, under the Ordinance of May 10th, 1858, amounting together to the sum of \$300,740.

The balance of Loan 10, of March 26, 1859, will all be sold in the course of the present year, so that the account of the liabilities of the City, created for the use of the Gas Works, will stand as follows:

Loans 1 to 10, inclusive,	-	:	-	\$2,370,000
City Debt, representing the Spring Garden, Frankford, Moyamensing and West Philadelphia Gas Works,	-	-	-	450,000
Purchase money of the Southwark and Moyamensing, Richmond, Germantown, and Manayunk Gas Works,	-	-	-	300,740
				<hr/>
				\$3,120,740

The annual interest payable on this sum, by Ordinance, is 6 per cent on \$2,995,740, and 5 per cent. on \$125,000, - - - \$185,994 40

The annual appropriation to the Sinking Fund is as follows :

On Gas Loans, 1 to 10, inclusive, - -	\$64,050 00
City Debt, - - - -	9,000 00

### REPORT OF THE COMMITTEE ON WATER WORKS.

---

*To the Common Council of the  
City of Philadelphia.*

GENTLEMEN:—The Committee on Water Works of Common Council, to which was referred an Ordinance, entitled, “An Ordinance to provide suitable accommodations for the Department for supplying the City with

water," have given the same a careful consideration, and are of opinion that the recommendation of the Committee in their report of January 5, 1860, (See Appendix to Select Council, No. 53, page 55,) should be approved by Councils, they therefore Report the Ordinance as originally Reported, and Respectfully ask its adoption.

PETER BOBB, <i>Chairman.</i>	JOHN G. SCHOCH,
JOS. S. RILEY, Jr.,	MORRIS DAVIS.
JOS. MANUEL, Jr.,	<i>Feb. 9, 1860.</i>

---

#### AN ORDINANCE

To provide suitable accommodations for the Department for supplying the City with Water.

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, That the Chief Engineer of the Water Works be, and he is hereby authorized and directed to lease the second story rooms of the Philadelphia Bank building for the accommodation of the officers and clerks of the Department for Supplying the City with Water, and for the transaction of the business connected therewith, at a rent not exceeding two thousand dollars per annum. And that the sum of one thousand dollars be, and the same is hereby appropriated for the purpose of fitting up and arranging the same, for the convenience of the public and the officers of said department.

##### REPORT OF SELECT COMMITTEE.

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Select Committee, to which was re-

ferred the Resolutions relative to the removal of the Seat of Government to the City of Philadelphia, respectfully Report, That they have had the matter under consideration, and are unanimously of opinion that it is expedient to make the proposed removal. That Philadelphia should be the political as well as the financial and commercial centre of the State, must be obvious to every reflecting mind. Her population now entitles her to more than one-sixth of the representatives in the popular branch of the Legislature, and this ratio will be increased at every succeeding apportionment of the State. But, great as is her present and prospective numerical strength in the Legislature, it bears no proportion to the amount of legislation required by her citizens, in comparison with the rural sections of the Commonwealth. Our great metropolis requires probably more legislation than all the rest of the State combined, and these demands will doubtless increase with our onward march in population and wealth. Hence, it is of the greatest importance that Philadelphia have proper facilities for procuring that legislation which it is necessary for her to have in her race with rival cities and in her struggle for commercial pre-eminence. If the seat of government were removed to this City, we would confidently hope for an increased number of able men in the Legislature. Better men will come here from the country than will consent to go to Harrisburg, and hence legislation would be purer and better; country members would form an attachment for our City and her institutions; that prejudice which has always more or less existed against the City would be removed, and our legislators could, from personal observation and inquiry, ascertain our real necessities, and we would not be compelled to go begging at the doors of the Capitol every session for that legislation which we should have by right. We would not then in all probability have the petitions and remonstrances of City Councils and our citizens so frequently disregarded.

Without wishing to underrate the ability of the present City delegation in the Legislature, which embraces several of our most distinguished citizens, your Committee would refer to the well known fact, that our most able professional and business men cannot often be induced to accept places in the Legislature, in consequence of the want of social

and other attractions at Harrisburg, and the pecuniary loss they sustain by absence from their business. But if the seat of government were removed here, our City would always be represented by our most competent citizens, and thus while the interest of the City would be in more able hands, the dignity of the Legislature would at the same time be elevated, and the interests of the State correspondingly advanced.

The interests of this City and State are identical. We have a common heritage and a common destiny. Every building erected within the City limits is that much added to the substantial growth of the State, increases the receipts of the treasury, and lessens the burden of the farmer in the remotest corner of the Commonwealth. Philadelphia pays into the State Treasury thirty three per cent. of the whole amount of tax assessed for State purposes, and instead of our country friends regarding us with a jealous eye, they should rejoice at the eminent position we have attained among the great cities of the world, and the brilliant future that is set out before us.

If the meetings of the Legislature were held in this City, the Representatives of the People would at all times be afforded an opportunity of consulting with their constituents on questions of legislation. Our City is constantly visited by the most prominent gentlemen of every county in the State, in pursuit of either business or pleasure, and they, the representatives and constituents, would be brought more immediately in contact than they can possibly be in any other locality. Most of the visitors of the present Capitol are drawn thither by motives entirely different from those which bring citizens of the interior to Philadelphia.

The causes which operated in favor of the removal of the seat of government from this City, about the beginning of the present century, have long since disappeared. At that time, the journey from the western to the eastern end of the State was laborious and dangerous, and required a week to perform. Hence, it was right that the seat of government should be located as nearly as possible at the geographical centre of the Commonwealth. But, since the introduction of railroads, the distance between the extreme limits of the State is traversed in about fifteen hours, and by the Magnetic Telegraph we are in instant communica-

tion with every county in the State. By the achievements of the present century, Philadelphia is virtually at every man's door, and is more readily accessible to a majority of the people of the State than any other point within its limits.

They therefore offer the following Resolution.

JOHN H. POMEROY, <i>Chairman</i> ,	CHAS. THOMSON JONES,
HENRY DAVIS,	JOHN THOMPSON,
WM. ROTCH WISTER,	THEO. CUYLER.

#### RESOLUTION

Relative to a Removal of the Seat of Government to Philadelphia.

*Resolved*, That the Special Committee having charge of the subject be, and they are hereby instructed to Report an Ordinance creating a loan for a sufficient sum of money to erect the necessary buildings for the removal of the seat of government to Philadelphia.

#### AN ORDINANCE

To authorize a loan for the payment of road damages, and to purchase and rebuild the Bridge over the river Schuylkill at the Falls.

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, That the Mayor of the City be, and he is hereby authorized to borrow, at not less than par, on the credit of the City Corporation, from time to time as may be required by the City Treasurer, such sums of money, not exceeding one hundred thousand dollars, as may be necessary for the following purposes, to wit:—For the payment of road damages, not exceeding the sum of seventy-five thousand dollars.

For the purchase of the Bridge over the river Schuylkill at the Falls, not exceeding fifteen thousand dollars.

For rebuilding the Bridge over the river Schuylkill at the Falls, not exceeding ten thousand dollars.

Interest on said loan, not to exceed six per cent. per annum, shall be paid half yearly on the first days of January and July, at the office of the City Treasurer. The principal of said loan shall be payable and paid at the expiration of thirty years, from July 1st, A. D. 1860, and not before, without the consent of the holders thereof, and certificates therefor in the usual form of certificates of City Loan, shall be issued in such amounts as the lenders may require, but not for any fractional part of one hundred dollars, or if required in amounts of five hundred or one thousand dollars, and it shall be expressed in said certificates, that the said loan therein mentioned, and the interests thereof, are payable free from all taxes.

SEC. II. Whenever any loan shall be made by virtue thereof, there shall be, by force of this Ordinance, annu-

ally appropriated out of the income of the corporate estates and from the sum raised by taxation, a sum sufficient to pay the interest on said certificates, and the further sum of three tenths of one percentum of the par value of such certificates shall be appropriated quarterly, out of said income and taxes, to a sinking fund, which fund and its accumulations are hereby specifically pledged for the redemption and payment of said certificates.

---

RESOLUTION.

*Resolved*, That the Clerk be authorized and required to publish in two daily newspapers of this City, daily for four weeks, the Ordinance presented to Common Council at a stated meeting thereof, held on the eighth day of March, A. D. 1860, entitled, "An Ordinance to authorize a loan for the payment of road damages, and to purchase and rebuild the Bridge over the river Schuylkill at the Falls," and the said Clerk at the stated meeting of Councils next after the expiration of four weeks from the first day of said publication shall present to Councils one of each of the said newspapers for every day in which the same shall have been made.

## APPENDIX No. 119.

### REPORT OF THE COMMITTEE ON MARKETS.

---

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN :—A Bill now before the House of Representatives at Harrisburg, has been brought to the notice of your Committee, (and it is herewith appended,) which confers upon farmers the right of perpetual possession of the stalls they may now occupy, and also gives them the privilege of selling meats not the produce, and which has not been fattened upon their own farms.

The Committee have already given to farmers, occupying stalls which have been set apart for “farm produce only,” the privilege of selling meats which have been in good faith produced or fattened upon their farms; and no bona fide farmer has asked any greater privilege in this respect, but the aforementioned bill has been introduced, to give to a certain class of persons, known as shiners, the right to sell meat in the Market Houses, on Farmers Stalls, by paying but one-fifth of the rent demanded of Butchers, and it also gives them the right of selling meats upon the streets without charge.

The passage of this Bill would interfere materially with the Ordinance regulating the Markets, and would do great injustice to the Butchers, who have paid heavy premiums, and pay high rents for the same privileges that this bill confers upon shiners.

By a former Act of Legislature, the City is debarred from charging Farmers more than twenty dollars per annum for their stalls. In a great many cases, these Farmers have underlet their stalls to hucksters and others at a heavy rent, and thus make a handsome revenue, by

speculating upon the property of the City. In this way abuses have been introduced into the Market Houses, and Farmer's stalls have been converted into cake, coffee, and dry good stands.

The passage of the bill alluded to, would perpetuate these abuses, and take from the City, in a great measure, the control of its own Market Houses, which have been built and paid for by its own citizens.

The Committee therefore Report the annexed Resolution, and ask its adoption.

#### RESOLUTION

Remonstrating against the passage of a certain Bill, by the State Legislature.

*Resolved*, That the Select and Common Councils, of the City of Philadelphia, do hereby remonstrate against the passage of any Bill by the Legislature of this State, that will in any way interfere with the right of the City of Philadelphia, to rent its own property to such persons, and for such purposes, as the Councils of the City may deem proper.

*Resolved*, That the Clerks of Councils send copies of the above Resolution, to all the members of the Senate and House of Representatives at Harrisburg.

##### REPORT OF THE COMMITTEE ON GAS WORKS.

---

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Gas Works, to

whom was referred a Resolution to “inquire and report if some effectual means cannot be devised for such dispensation of the coal tar, and other noxious matter as will remove all causes of complaint,” Report, That the Committee visited the City Gas Works, and from an examination of the arrangements there made for the storage and disposal of the coal tar, and other residuary liquids, and from the statements made in relation to the subject by the officers of the Works, have such information as enables them to report that great care is used to save for sale the tar, and all other saleable products, and that cisterns are provided, in which to store these products, whenever the demand is less than the supply. And further, that the cisterns for this purpose were so much enlarged during last summer, as to prevent, since that time, any overflow of tar into the river.

RESOLUTION

To Pave, Re-pave, and Grade certain Streets.

1. *Resolved*, By the Select and Common Councils of

the City of Philadelphia, That the Department of Highways is hereby authorized to enter into a contract with one or more competent paver or pavers, who shall be selected by a majority of the owners of property, for the paving of the following streets, to wit: Mifflin street, from Master to Thompson, in the 17th Ward; Twenty-second street, from Brown to College avenue, in the 15th Ward; and Ella, (late Price street,) between Amber and Emerald streets, in the 19th Ward. The conditions for which contract for paving said streets shall be, that the City is liable only for the paving of the intersections, the contractor or contractors to give security to keep the street in repair for two years after the paving shall have been finished; and the Department of Highways is hereby authorized to do the necessary grading preparatory to the paving, and to repave Bennett street, from Seventh to Eighth street, in the 6th Ward, with tramway stone, and if the cartway is wider than is necessary for a single track, the Commissioners are authorized to reduce the width thereof, so that an equal quantity shall be taken from each side.

2. *Resolved*, That the Department of Highways be, and they are hereby authorized to grade Watkin's street, Pearce street, Celeste street, Amelia street, Moore street, and Mifflin street, between Sixth and Seventh street, in the 1st Ward; *Provided* the expense does not exceed one thousand dollars, (\$1,000) and the Commissioners of Highways are not to engage such grading, unless the same can be done for that amount. Also, to grade Thorp's lane, in the 22d Ward, at a cost not to exceed five hundred dollars: *Provided* the property owners will subscribe the like sum of five hundred dollars. Also, to grade Norris street, between township line and McKane avenue, and West Logan street, and to expend a sum therein not exceeding seven hundred dollars: *Provided* the property owners will subscribe a sufficient amount to bring them to the established grade. Also, to grade America street, from Cherry street to north line of Norris street; and Norris street, from America to Second street, at a sum not exceeding seven hundred and fifty dollars; and Hancock street, from Norris to Berks street, in the 19th Ward, at

a cost not to exceed two hundred dollars; and the Chief Commissioner of Highways is hereby directed to notify property owners to curb and pave their footways of both sides of the said America, Norris, and Hancock streets, within the space respectively specified.

*To the President and Members of the Select and  
Common Councils of the City of Philadelphia.*

GENTLEMEN :—Your Committee on Surveys and Regulations, to whom was referred the proposition of the Board of Trustees of the Philadelphia Gas Works, to dedicate to public use for a Highway, (as 29th street,) a certain portion of ground held by said Trust in the First Ward, believe the action desired would be greatly to the advantage of that section of the City, particularly as it would promote the erection of a large number of buildings in the immediate vicinity of the works, at the same time it is of great importance that the line of street proposed should correspond with the line of street as projected upon the general plan of the City, we therefore offer the following Resolution.

RESOLUTION.

Relative to the dedication of streets.

*Resolved,* By the Select and Common Councils of the

City of Philadelphia, that the Mayor be, and he is hereby authorized to attach the seal of the City to a Deed, dedicating to the public use for a Highway, a certain strip of ground at the south-easterly corner of property, held by the Trustees of the Philadelphia Gas Works, adjoining property of William S. Sleeper, in the First Ward.

*Provided*, The form of said Deed shall previously be approved by the City Solicitor, and the Chief Engineer and Surveyor shall have certified that the line of said highway conforms to the general plan of the City.

*And further Resolved*, That no Deed of dedication of public streets shall hereafter be considered valid, unless endorsed as correct in form by the City Solicitor.

### AN ORDINANCE

Authorizing the construction of a Culvert in the Twentieth Ward.

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, That the Department of Highways be, and is hereby authorized and directed to construct a culvert, nine feet in diameter, from the east line of Sixth street, on Montgomery street, westward to Ninth street; thence eight feet in diameter northward on Ninth street, to the intersection of Conocksink Creek; and also, to extend the line of culvert on Montgomery street, as follows: with a diameter of three feet from Ninth street to Tenth street, and four feet diameter from Tenth street to the west side of Broad street, with such inlets upon the line thereof as may be requisite for the proper surface drainage. The entire work to be performed in accordance with plans and specifications prepared by the Department of Surveys.

SEC. II. The Chief Commissioner of Highways shall advertise in two daily newspapers, for one week, announcing that proposals will be received for the construction of the said culvert, and he shall allot the same to the lowest bid-

der; and it shall be a condition of such contract that the contractor shall accept the sums assessed upon and chargeable to the properties lying upon the line of said culvert, as authorized by Section 8 of the Supplement to the Act of Consolidation, approved April 21, 1855, and in manner and form provided in the 3rd and 4th Sections of an Ordinance entitled, "An Ordinance to provide for the construction of Branch Culverts, approved November 11, 1858;" and the cost thereof over and above the amount of assessment bills furnished, to be paid by warrants upon the City Treasury, drawn by the Chief Commissioner, upon estimates made out and certified to by the Chief Engineer and Surveyor, and chargeable to the Culvert Loan, authorized by Ordinance approved October 1, 1858; *Provided*, That the work shall not be commenced until the property owners upon the line thereof shall secure to the City the payment of seventy-five cents per lineal foot of property on each side thereof.

SEC. III. That the proceeds of so much of the Culvert Loan authorized by Ordinance of October 1, 1858, remaining after the completion of the necessary culverting on the Cohocksink Creek, east of Fifth street, and ordered in Ordinance of February 27, 1858, as may be required for the construction above described, be and the same is hereby appropriated for that purpose.

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Finance, to whom was referred the claim of Samuel Sloan, for preparing designs and making plans of a City Hospital, proposed to be erected in lieu of the one at Bush Hill, respectfully Report that they have examined the same, and believe that

it is just, and that the payment of the amount now claimed would be an economy. The original claim of Mr. Sloan was for \$1,500, for which he brought suit in the Supreme Court and obtained an award of the Arbitrators in his favor for \$900.

The Committee Report an Ordinance to pay this award, and recommend its passage.

##### MESSAGE FROM THE MAYOR.

---

OFFICE OF THE MAYOR, }  
*March 29, 1860.* }

*To the President and Members of  
 Common Council of the City of Philadelphia.*

GENTLEMEN:—Having been advised that the Sunbury

and Erie Railroad Company had applied to the General Assembly for the passage of a Bill, granting to them certain privileges, and affording relief from the foreclosure of mortgage of the said Company, I deemed it my duty in the name of the City of Philadelphia, so largely interested in the success of that enterprize, to memorialize the Legislature in behalf of such application. I transmit herewith a copy of the document addressed by me on the 26th inst. to the Senate and house of Representatives, and would commend the entire subject to your immediate attention, asking that such Resolutions be adopted as may befit the importance of the proposed measures.

Respectfully, &c.,

ALEXANDER HENRY,

*Mayor of Philadelphia.*

---

*To the Honorable the, Senate and House of  
Representatives of the Commonwealth of Pennsylvania*

The undersigned, on behalf of the City of Philadelphia, begs leave to invite the prompt and favorable action of your honorable bodies on the Bill recently reported by the Committee of Ways and Means of the House of Representatives, for the relief of the Sunbury and Erie Railroad Company.

The City of Philadelphia at all periods of her history, has identified her interest with those of the Commonwealth, and has contributed very largely to the construction of improvements for the public accommodation, which are not within her borders. She has appropriated large sums of money from time to time, amounting in the aggregate to many millions of dollars, which have been expended for such purposes in various parts of the State, both east and west of the Allegheny mountains, without asking security for its return.

Among her subscriptions to such improvements is that of \$2,250,000 to the capital stock of the Sunbury and Erie Railroad Company, a work universally conceded to

be of great importance as a means of developing more fully, the resources of the State.

The inability of the Company to negotiate their five per cent. bonds, has forced them to apply for the relief contemplated by the Bill referred to. It is believed to be a measure of necessity, the failure of which may involve the absolute loss to the City of Philadelphia, of the whole amount of her subscription to the stock of the Company, as well as the greater part of the debt owing by the Company to the State, amounting to \$3,500,000.

As the City of Philadelphia pays two-fifths of the entire revenue of the State, it will be perceived that two-fifths of the debt of \$3,500,000, must fall upon her citizens if the Company shall fail to pay it, or their property shall be sacrificed; thus swelling the aggregate loss to be borne by them to \$3,600,000.

It is believed that the adoption of the measure proposed by the Company, and approved by the Committee of Ways and Means, will not only avert such a disaster to the public interests, but will enable the Company to complete their work, and make good as well their debt to the State as the investments of their stockholders.

Under these circumstances the undersigned conceives it to be within the line of his duty to the City of Philadelphia, to present to your Honorable Bodies this Petition for the passage of the said Bill.

ALEXANDER HENRY,

*Mayor of Philadelphia.*

REPORT OF THE COMMITTEE ON HIGHWAYS.

---

*To the Select and Common Councils.  
of the City of Philadelphia :*

GENTLEMEN:—The Committee on Highways, &c, in response to sundry petitions presented to Councils and referred to them, herewith Report four Resolutions.

The first is for the paving of certain streets.

The second is to authorize the Department to proceed with the grading of certain streets, within the spaces specified, each at a cost therein limited.

The third directs notice to be given of the intended opening of two streets under the Act of 1855.

And the fourth is to authorize the Chief Commissioner of Highways, to pay the sum of four hundred and fifty dollars to James Murkoe for grading done on certain streets, opened through the Camac estate in the Twentieth Ward, in the latter part of the year 1857 and the beginning of 1858.

This appropriation was made by the fourth of five Resolutions, passed December 22nd, A. D. 1857, which will be found on page 397, of the Ordinances of that year.

The Resolution requires that not less than six thousand seven hundred cubic yards of grading, shall be done, and a certificate from the Surveyor of the District has been presented, and is on file in the Highway Department, showing that a greater quantity than this has been done, and paid for by Mr. Markoe.

#### RESOLUTIONS.

To pave certain streets herein named, and for other purposes.

*Resolved*, By the Select and Common Councils of the City of Philadelphia, That the Department of Highways is hereby authorized to enter into a contract, with a competent paver or pavers, who shall be selected by a majority of the property owners on Walter street from 15th to 17th streets, and Columbia Avenue between 23rd and 24th streets, in the 20th Ward; and Brown street from Cumberland street to Huntington street, and York street

from Richmond street to the Aramingo Canal, in the 19th Ward; and Pollards street from New Market street to Laurel street, in the 16th Ward. The conditions of which contracts shall be, that the contractor will collect the cost of said paving, from the owners of property fronting on each of said streets respectfully, and that the City shall be liable only for the intersections, and also that the contractor will enter into an obligation to the City, to keep said streets in good repair for two years after the said paving is finished, and that the water pipes be laid in said streets before the paving is commenced, and that the Department of Highways is hereby authorized to do the grading necessary to be done, preparatory to the paving thereof.

*Resolved*, That the Department of Highways is hereby directed, to grade Forty-first street between Locust and Spruce streets, in the Twenty-fourth Ward, and to expend therein a sum not exceeding two hundred and fifty dollars; also to grade Penn street from Sellers street to Oxford Plank Road, in the 23rd Ward, at a cost not to exceed one thousand dollars; also to grade Lehigh Avenue from Kensington Avenue to Second street, in the 19th Ward, for a sum not exceeding five hundred dollars.

*Resolved*, That the Chief Commissioner of Highways is hereby directed, to give notice to the owners of property through and over which Venango street, from Broad street to 21st street, in the 21st Ward, and Mermaid lane, in the 22nd Ward, will pass that at the expiration of three months from the date of said notice, the City will require the said street for public use.

*Resolved*, That the Chief Commissioner of Highways be, and he is hereby directed to draw a warrant in favor of James Markoe, for the sum of four hundred and fifty dollars to be paid out of Item No. 5, of the appropriation to the Department of Highways for the present year, the same having been appropriated for the grading of certain streets in the Twenty-first Ward, by Resolution approved the 22nd day of December, A. D. 1857.

*To the Common Council of the  
City of Philadelphia.*

GENTLEMEN:—The Committee on Schools of Common

Council, to whom was referred the Bill passed by Select Council, entitled, "Resolution approving the conduct of the City Controller in refusing to countersign certain warrants, respectfully Report, That they have examined the matter referred to them, and deem the passage of the Resolution, at this time, necessary and proper.

Other warrants have been issued to the Teachers of the Normal School, under similar circumstances as those adverted to in the Report of the School Committee, all of which warrants are still in the possession of the Teachers; and it is obvious that the Board of Controllers intend to carry out in the present year, the policy adopted by them relative to these Teachers, unless restrained by Councils and the City Controller, as the following will show; Councils appropriated for 1860 to the Normal School, for salaries of three Assistants, \$900, (making \$300 for each of them yearly.) The Board of Controllers have issued, within a few days, three warrants to these three Assistant Teachers, warrants for one quarters salary at the rate of \$500 per year, the same as complained of in the Bill before you, therefore your Committee recommend, the immediate passage of this Bill, and also recommend in addition, that the Joint Committee on Schools of Select and Common Councils, examine into this subject fully, and report, at an early day, a Resolution of instruction to the Controller to guide him for the year 1860.

REPORT OF SPECIAL COMMITTEE.

---

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Special Committee appointed for

the purpose of examining the plans of Bridges prepared for the Schuylkill at Chestnut Street, now on file in the Department of Surveys, which plans were submitted to a Commission of Engineers appointed by Ordinance of Councils, having completed the duty entrusted to them, beg leave to Report, That they have been afforded all the facilities that could be desired, and found all the plans and designs carefully arranged for inspection and reference.

We cannot but express our surprise at the great variety of plans, both in generalities and details, that has been presented, and upon examination, we fully agreed that the plans selected by the Commission for premiums, are the very drawings that (initiated as we may be in the science of Engineering.) would have suggested themselves to us, as worthy of the premiums allotted, and in our investigations determined to confine ourselves to the several plans thus chosen.

Your Committee in looking at this question have assumed that, the present examination is for a bridge having one pier, and so understanding, will treat the subject. They have concluded that what is most requisite for a bridge in such a position, as the crossing of the Schuylkill at Chestnut Street, is a highway that will to all intents and purposes be as solid as the street itself, to reach this *in fact*, will require a *Stone Bridge*, but a Stone Bridge we cannot have, with these proportions, for it would throw the carriage-way to such height above the river, as to give a gradient of 6 88-100 feet for every hundred, which would be a very serious impediment to its free use. The question then is, what is the next most permanent structure to a Stone Bridge? and by permanent we wish to express solidity in itself, so as to allow an uninterrupted use by travel as to speed. The Truss Bridge presented to us has been spoken very favorably of by the Commission, and it is comparatively small in first cost, but our own experience in the use of bridges tells us that we have never yet seen a *Truss Bridge* that was free from motion when even ordinary travel was passing over it, and that too on wooden bridges where the material of which they are composed is exposed to a crushing force, it must therefore be greater where the main strength depends on wrought iron rods of small diameter, that certainly are

elastic, this style of bridge is no doubt a good one, but we want something else than strength.

The single arch bridge of wrought iron, is indeed, as is said by the Commission, a bold design, but too much of an experiment for the span proposed for us, to consider it with favor in the present instance, it is also wanting in solidity of roadway, as we believe the wind alone would affect it, the cost as returned is even less than the Truss Bridge, but would in our opinion be costly at less price for the site under consideration. We then turn to the cast iron arch, in this style of bridge we find that the same forces are brought into action exactly as in a stone bridge, that the force exerted is entirely a *crushing one*, and the material to resist such force fully equal and in fact superior to stone, the difference between it and a stone arch being, that there is not the same amount of material used, is therefore lighter, and from its being melted, is placed in such shapes and forms, as will best meet the forces it is called upon to resist.

As to the professional view of cast iron as a material suitable for arched bridges, we have before us letters from J. Edgar Thomson, Esq., Charles Ellet, Jr., Esq., Capt. M. C. Meigs, U. S. A., S. W. Roberts, and Joseph Harrison, Jr., all Engineers of long standing, and well deserving celebrity, whom unhesitatingly approve—and we will quote Mr. Harrison relative to several points which have been by us previously considered objections. The first is as to the injurious effects of cold weather,—he has kindly sent for our inspection, the drawing of a cast iron bridge erected by himself across the river Neva, at St. Petersburg, Russia, of seven spans, 156 feet, being the largest. He says: “this bridge was thrown open to public use in 1850, and has undergone the extreme changes of temperature incident to a latitude nearly as high as *sixty degrees north*, and I have heard no complaint or misgivings growing out of the fact of its being made of cast iron.” This, connected with the fact that there are numerous instances of similar structures that have stood for sixty years and upwards, certainly forces us to a favorable conclusion as to their durability. As to the Truss Bridge, if the question of inapplicability of cast iron, is to weigh with us, we must not forget that when composed of iron, that portion

upon which the greatest dependence must be placed, is always made of cast iron—and in the plan before us, the top chord is a *cast iron pipe*. Again, in the *arch*, we feared the effect of expansion and contraction, and that the result would be an uneven bearing upon the joints of the segments or pieces composing the arch; but here the experience of Mr. Harrison is of great value to us. He states that in constructing the Neva bridge, before placing it upon its piers, it was erected on land, (with a tie-rod in the place of abutments,) and was there tested by the Russian Government; in doing so they tightened the tension rods so as to raise the crown of the arch six inches, and with the closest scrutiny, could not discover any alteration at the joints.

This again forces us to a favorable conclusion, for in the span tested it was only 156 feet, with a rise of six inches, while in the span required for Chestnut street, (195 feet,) the greatest rise that can take place with extremes of temperature of 130 degrees, would not exceed  $2\frac{1}{4}$  inches—which as in the instance noted, will be so distributed in the arch by its elasticity, as to be inappreciable at any one point.

With these points at rest in our minds, we desired the Chief Engineer and Surveyor to prepare for us estimates of the three general plans, including the approaches, so that we might present to Councils such statement, in detail, and thus get a better idea of the difference of value for the bridge *itself*, and the masonry *itself*—his report is annexed, but having had an opportunity of examining the prices for masonry, as well as for cast iron, used by that gentleman in his calculations, (he having returned the designers cost for their proposed bridge in each instance,) we do not hesitate to say that we believe a cast iron bridge can be erected at the site proposed, including masonry, as follows:

Cast Iron Bridge, - - -	\$110,000
Masonry, abutments, piers, and approaches, - - -	190,000
	<hr/>
	\$300,000

From which deduct the amount to be appropriated by the Passenger Railway on Chestnut street, - - -

- \$100,000

We have as required from the City,	<hr/>	\$200,000
------------------------------------	-------	-----------

Your Committee therefore, present the following Resolution.

RESOLUTION

*Resolved*, By the Select and Common Councils of the City of Philadelphia, That the general plan for a Cast Iron Arched Bridge, to span the river Schuylkill, at Chestnut street, approved by the Board of Surveyors, in accordance with Ordinance approved November 29, 1858, be, and the same is hereby confirmed.

DEPARTMENT OF SURVEYS, }  
*Philadelphia March 21, 1860.* }

GENTLEMEN:—As directed by your Resolution, I have prepared and herewith submit a statement exhibiting the comparative cost of the three plans for a proposed bridge on the line of Chestnut Street, for which premiums were allotted by the late Commission.

It shows the estimate of *superstructure* as returned by the several designers, and also the estimated cost of *abutments, pier, and approaches*, arranged by *myself* to suit the plans in question; this arrangement is requisite to enable the Committee to judge of the entire cost, as the estimate for the approaches, is not in all instances returned with the plans.

I have also prepared an estimate for a cast iron structure, throwing out all the *timber* portions proposed in the *premium plan*, and assumed weights and prices, that upon examination I feel assured will be approved, weights that will meet all the requirements of a public thoroughfare of the character in question, and give a crushing force to the material of 1-15, the lowest estimate that can be found for it, thus furnishing to a great extent that inertia which

is the principal value of a stone arch, the prices also are higher than have been presented with other designs, but in this I am supported by the actual cost of the Southwark Bridge, London, as well as Neva Bridge, built in Russia a few years since by our townsman, Joseph Harrison, Jr., Esq.,

In the arrangement of the masonry, it is proposed to have retaining walls from 23rd street on the east, and Keen street on the west, with two arches of 55 feet span on each side, immediately adjoining the main abutments.

The eastern abutment to be laid in coffer dam, the western on platform supported by piling.

The pier to be laid upon the solid rock by means of apparatus similar somewhat to the diving bell, on the eastern approach a small bridge of 40 feet span must be erected over 24th street, to give free communication north and south. For the description of the several plans I refer you to the Report of the Commission.

Very respectfully,

## REPORT OF THE COMMITTEE ON HIGHWAYS.

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Highways, &c., Report herewith four Resolutions.

The first is to authorize the Department to proceed with the paving over the Market house spaces on Market street from Front to Eighth streets, an appropriation was made for this work among the appropriations to the Department for the present year, and the season has arrived when the work should be commenced.

The second, is to authorize the repaving of four small streets with tramway stone, and is reported in response to petitions heretofore presented to Councils and referred to the Committee.

The third, is to authorize the repairing of the present bridge, or the construction of a culvert over Mill creek on the line of Spruce street, in the Twenty-fourth Ward. The streets in that locality are being extended over Mill creek,

and improvements are rapidly advancing on the west side of it. The Bridge now there, was constructed by the property owners in the vicinity some three or four years since, and appears to be insufficient to bear the filling in necessary to be done to make the street an available highway. The number of valuable dwelling houses erected and projected in this neighborhood, would seem fully to warrant the expenditure proposed by this Resolution.

The fourth, is to authorize the grading of certain streets each at a cost not to exceed the sums therein limited.

Respectfully submitted, by

#### RESOLUTIONS

To authorize the paving over the spaces recently occupied by the Market Houses on Market Street, and for other purposes.

1. *Resolved*, By the Select and Common Councils of the City of Philadelphia, That the Highway Department is hereby authorized to proceed with the paving over those portions of Market street, from Front to Eighth streets, recently occupied by the market houses, and to pay the cost and expenses thereof, out of Item No. 24, of the appropriations made to the Department for the year 1860, and the Department is also authorized to do the necessary grading upon the said spaces preparatory to the paving thereof.

2. *Resolved*, That the Highway Department is hereby authorized to repave Landis street from Fourth to Fifth north of Spruce street, and Middle alley from Sixth to Seventh, north Spruce street, in the Fifth Ward; Dean street from Locust to Spruce streets, in the Eighth Ward, and Fayette street from Filbert to Arch streets in the Ninth Ward; said repaving to be done with tramway stone in the track of the wheels, and in case the cartway of any

of the said streets is wider than is necessary for the passage of one vehicle, the Department is authorized to reduce the width thereof, taking an equal quantity from each side.

3. *Resolved*, That the Highway Department is hereby authorized to repair the present bridge, or construct a culvert (whichever may be deemed most expedient,) over Mill creek, on the line of Spruce street, in the Twenty-fourth Ward, and to expend therein a sum not exceeding one thousand dollars; to be paid out of Item No. 8, of the appropriations made to the Highway Department for the year 1860.

4. *Resolved*, That the Highway Department is hereby authorized, to proceed with the grading of the following streets, viz:

Tower street from Cotton to Levering streets, in the late Borough of Manayunk, Twenty-first Ward; and to expend therein a sum not exceeding one thousand dollars, Stenton avenue from Main street to East Logan street, in the late Borough of Germantown, Twenty-second Ward, and to expend therein a sum not exceeding one thousand dollars; Spruce street from Fortieth to Forty-fourth streets, in the Twenty-fourth Ward, and expend therein a sum not exceeding five hundred dollars; Baring street from Thirty-second to Thirty fifth streets, in the Twenty-fourth Ward, and to expend therein a sum not exceeding three hundred dollars; Forty-second street from Spruce street to the Baltimore Turnpike, and to expend therein a sum not exceeding three hundred and fifty dollars, and Fiftieth street from Haverford Road northward to Westminster Avenue, and to expend therein a sum not exceeding three hundred and fifty dollars.

*To the President and Members of the Select and  
Common Councils of the City of Philadelphia.*

GENTLEMEN:—Your Committee on Surveys and Regu-

lations, to whom was referred the petition of owners of property on the line of the branch of Gunners Run, passing near the line of Huntingdon street, in the 19th Ward, have given the application their careful attention and have examined the locality, the importance of the work, is not a matter of question, either as to its bearing upon the health of the City, or the returns that will be made, consequent upon the improvement of that section, we are reliably informed that the building of a large number of houses, but waits the construction of the culvert, and further, we can say that the allotment of the work at this time will be a saving to the City of at least one thousand dollars in the cost, we will also add, that the owners of property along the line, have in person assured the Committee that the charge of 75 cents per foot will be willingly paid by them, we therefore present an Ordinance authorizing the construction asked for, and recommend its adoption.

#### AN ORDINANCE

For the construction of a Culvert in the Nineteenth Ward.

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, That the Department of Highways be, and is hereby authorized and directed to construct a culvert, seven feet diameter, on the line of Huntingdon street from the west line of Lemon street, westward to the centre line of Amber street, thence on Amber street southward, to the westerly line of Frankford Road, with such inlets upon the line thereof as may be requisite for the proper surface drainage, to be performed in accordance with plans and specifications to be prepared by the Department of Surveys.

SECT. II. The Chief Commissioner of Highways shall

advertise in two daily newspapers for one week, announcing that proposals will be received for the construction of the said culvert, and he shall allot the same to the lowest bidder; and it shall be a condition of such contract, that the contractor shall accept the sums assessed upon, and chargeable to the properties lying upon the line of said culvert, as authorized by Section 8 of the Supplement to Act of Consolidation, approved April 21, 1855, and in manner and form provided in the 3rd and 4th Section of Ordinance, entitled, "An Ordinance to Provide for the construction of Branch Culverts," approved November 11th, 1858; the cost thereof, over and above the amount of assessment bills furnished, to be paid by warrants upon the City Treasury, drawn by the Chief Commissioner of Highways, upon estimates made out and certified to by the Chief Engineer and Surveyor.

SECT. III. That the sum of eight thousand dollars, is hereby appropriated to the Department of Highways for the specific purpose of building the culvert hereby authorized.

*To the Select and Common Councils

GENTLEMEN:—The Committee on Finance, to whom was referred the Petition of Howard Spencer, make Report, that a lot belonging to the Petitioner, 26 feet in front on the south side of Master street, with a depth of 45 feet so located, that Franklin street as actually opened, takes the whole of it, with the exception of one foot and half an inch. That said lot was paved and curbed in 1859, without the knowledge or consent of Petitioner, and that as soon as the same was brought to his notice, he filed his petition in the Court of Quarter Sessions, and an award of jury in his favor for \$1,300 was confirmed by the Court on the 13th day of June, A. D. 1859. Your Committee find that the lot is entirely lost to the Petitioner, by reason of the conduct of the officers of the City; and they therefore report the sum mentioned in the accompanying Ordinance, as a compensation. They have not awarded the full amount, because there is due against said lot certain sums for paying and for water pipe.

GENTLEMEN:—The Committee on Police, to whom was referred a Resolution offered in Common Council, authorizing the Mayor of the City to offer rewards for the arrest and conviction of certain murderers, respectfully Report adverse to the Resolution, believing the policy of offering rewards for the arrest of criminals, to be in most cases, evil in its tendency.

Having a demoralizing influence on those who are appointed as the guardians of the lives and properties of

citizens, and whose best qualification for such service must be an abiding sense of duty, the Committee concluded that a wiser and safer course would be, to place at the disposal of the Mayor of the City an adequate sum of money, to be used at his discretion, in pursuing and arresting fugitives from justice, with that portion of the police force appointed with special reference to such services.

The Committee therefore respectfully Report the accompanying Ordinance, making such an appropriation, and ask its adoption.

## RESOLUTIONS

To authorize the paving of Twenty-seventh street in the First Ward, and for other purposes.

*Resolved,* By the Select and Common Councils of the City of Philadelphia, That the owners of property or a majority thereof, fronting on the following named streets, within the spaces designated, viz: Twenty-seventh street from Gray's Ferry Road to Wharton street, and Webster street from Twentieth to Twenty-first streets, in the First Ward; Shirley street (late Charles street,) from Coates street northwestward, to Nineteenth street, and Parrish street from Nineteenth street to Corinthian Avenue, in the Fifteenth Ward; are hereby authorized to select a competent paver or pavers, with whom the Department of Highways shall contract for the paving of the said streets respectfully.

The said work to be carefully supervised by the proper officer of the Department, while the same is progressing, and the water pipe to be laid in the said streets before the paving is begun.

*Provided*, That the charge for paving the intersections shall be no greater than is paid for the other portions of the said streets.

*Resolved*, That the Department of Highways is hereby authorized, to grade Cuyler street (north of Callowhill street,) from Nineteenth to Twentieth streets, in the Fifth Ward, and to expend therein a sum not exceeding two hundred dollars; and to grade Frankford street, from Wakeling street northward, to Little Taconey creek in the late Borough of Frankford, now the Twenty-third Ward, and to expend therein a sum not exceeding one thousand dollars.

## AN ORDINANCE

Authorizing the opening of Chew Street, from Township line Road to Penn Street, in the Twenty-second Ward.

*Whereas*, In pursuance of a Resolution, approved July 8th, 1859, notice has been duly given to the owners of property through and over which Chew street, from Township line Road to Penn street, in the 22d Ward, will pass, that at the expiration of three months from the service of said notice, said street, within the space aforesaid, would be opened for public use; *and whereas*, the Councils of Philadelphia deem the public exigency to demand the opening of said street, which is laid upon one of the public plans of the City. Now therefor,

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, That pursuant to the power conferred upon Councils by the 7th Section of the Act of Assembly, of the Commonwealth of Pennsylvania, approved the 21st day of April, A. D., 1855, entitled, "A Supplement to the Act consolidating the City of Philadelphia," the Highway Department be hereby authorized and directed to cause all obstructions on the line of the said street within the space specified, to be removed, and the same to be thrown open as a highway.

SECTION II. If the opening of the said street be resisted by any owner or owners of property over which it will pass the Chief Commissioner of Highways is hereby authorized to procure a sufficient number of proper and competent persons to become sureties to any such owner or owners in such sum as the Court of Quarter Sessions of the County of Philadelphia, may direct conditioned for the payment of any damage that may be assessed and awarded to any such owner or owners for the ground taken by the opening of the said street, and the Mayor of Philadelphia is hereby authorized to pledge the faith of the City, to indemnify the persons entering such security.

##### REPORT OF THE COMMITTEE ON GAS WORKS.

---

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Gas Works, to whom were referred the following Resolutions, viz :

*Resolved*, By the Select and Common Councils of the City of Philadelphia, That the Committee on Gas Works be instructed to inquire and report whether the manufacture of gas from any materials other than those now in use at the Philadelphia Gas Works, is practicable, and if so,

whether such gas can be manufactured at a cheaper rate than is now charged; and if so, at what rate; and whether such gas gives an equal or greater degree of light than that manufactured from coal; and if thought practicable, what cost will be incurred in change of apparatus, &c., and any other information relative to the subject, which they may deem important.

*Resolved*, That they be further instructed to inquire and report from what cause (if it can be ascertained,) the bills of consumers of gas have been of late, so largely increased, whether from defective meters, or from inferior quality of gas furnished, or from other causes.

*Resolved*, That the Committee be instructed to report at as early a day as convenient.

Respectfully report,

That, in reference to the First Resolution, the Committee are not as yet, prepared to Report.

In pursuance of the Second Resolution, directing inquiry into the cause of the recent increase in the amount of gas bills, it seemed right for the Committee first to ascertain whether the increase referred to, had any existence in fact.

For this purpose, a statement has been compiled from the bill books of the gas offices, exhibiting all the bills issued in the months of December, January, and February, during four successive years, to all consumers, who, for that time, have continued to use gas in the same premises, in the Wards comprising the old City proper, Moyamensing, Spring Garden, Penn Township, and West Philadelphia.

This statement comprises the bills of 11,114 consumers, to whom more than 44,000 bills were issued during the four winters.

It appears that the bills of 3,259 of the consumers, or not quite one-third, are higher in the last winter than in those of the three previous years, and the bills of 7,855, or rather more than two-thirds, are not higher than those for previous years.

The aggregate amount of all the bills to these consumers, in the winter of

1856-7,	was	-	-	-	\$138,177 70
1857-8,	"	-	-	-	125,762 24
1858-9,	"	-	-	-	137,923 36
1859-60,	"	-	-	-	141,358 54

the increase of 1859-60 over 1856-7, being \$3,190 84, or about 2 $\frac{1}{4}$  per cent.

The reports of the Inspectors of Fittings show that in the interval between 1856 and 1859, the number of additional lights, put on by the consumers included in the foregoing statements, is 8,300, or about 6 per cent. increase of lights, if these customers are supposed to have in use the average number of lights, which is shown by the published reports to be, 12 to each consumer.

From this it appears that the amount of gas used has not increased as much as the number of lights in use, and a similar result is exhibited by comparing the whole quantity of gas sold in the year, with the whole number of lights in use at the beginning of the year. For example, the number of lights reported to Councils, as in use in January 1856, was 300,406, and the cubic feet of gas sold in that year, was 415,888,950, being 1,384 feet to each light, the lights reported in use in January 1859, was 378,462, and the cubic feet of gas sold in that year, was 494,128,345, being 1,305 feet to each light, or 5 $\frac{1}{2}$  per cent. less than before.

These comparisons have been carried back so as to include four years, in order to avoid the erroneous conclusions which would result from taking only the past two years, which included a period of commercial depression, the effects of which are very marked upon the consumption of gas by certain classes of consumers, among whom the various manufacturers present very conspicuous examples, while among other classes not thus affected by business, the quantity of gas consumed has been curiously regular, sometimes the bills for three or four successive winters not materially varying in amount, and in thousands of instances not differing so much as one dollar for several years. The aggregate amount of the bills for the periods of commercial distress, and also the average consumption per light in use, are shown to be diminished in a remarkable degree, and give strong confirmation to the other proofs, elicited by this laborious investigation, of the carefulness

and accuracy with which the books and accounts of the City Gas Trust are kept.

The table of annual consumption per light, compiled from the published reports to Councils, show the average amount of gas used per light, to be less in 1859, than in any other of the eighteen years, elapsed since the City has owned the Gas Works, except 1857 and 1858, when the consumption was so much reduced by the suspension of business.

In addition to the statements exhibiting the foregoing facts, relating only to consumers who have been supplied during four successive years, two others have been prepared, embracing all those consumers, who have used gas during the last two winters in Southwark and Kensington.

These comprise two bills for each of 3,408 consumers, amounting to 6,816 bills, and make an aggregate of more than 50,000 bills, whose amounts, making a total of \$543,231 84, have been examined and compared in this investigation.

In the first named district, the gas was derived from the City Works, during both winters, but in the former season received only an inadequate supply, in consequence of the imperfect communication between the local mains of the Southwark Gas Company, and those of the City from which the supply was drawn, which defects were removed in the summer of 1859.

The aggregate of the bills here, on the first of March, 1859, was \$10,652 79, and in March 1860, was \$11,683 24, the increase being \$1,030 45, or not quite 10 per cent.

In Kensington, the bills rendered by the Northern Liberties Gas Company, on the first of April 1859, amounted to \$12,573 42, and those by the City Gas Works to the same consumers, for the corresponding period in 1860, amount to \$10,224 74; the former amount being greater by \$2,348 68, or 22 per cent. over the latter.

Part of this gain to the people of Kensington, results from the lower price now paid per one thousand cubic feet, but the books show that nearly half of it is in the saving of gas consumed, which is nearly 10 per cent. less since their supply from the City Works. It is proper to remark in this connection, that the saving to the City of cost of gas for public lighting, by the purchase of the Kensington Works is about \$5,000 a year, while the quantity of light

in the streets is generally greater since the change in the source of supply.

In Southwark, out of 1,618 bills rendered, 1,029 were larger in 1860 than in 1859, and 589 were not larger.

In Kensington, out of 1,790 bills rendered, 378 bills were larger in 1860 than in 1859, and 1,412 were not larger.

The unavoidable conclusion to which the Committee has arrived, after a careful consideration of the foregoing facts, is that there has been no general increase in the amount of gas bills, nor any local increase that is not evidently the result of an increased facility of supply; and moreover, that an examination of the accounts of the many thousands of gas consumers kept in the offices of the City Gas Trust, will satisfy every unbiased mind as to the regularity and reliability of the records of consumption, given by the instrument used for the measurement of gas.

The voluminous statements compiled from the bill books for the use of the Committee, are kept open to the inspection of any member of Councils, and indeed of any citizen, who may desire to examine them and thus form his own judgment as to the accuracy of the statistics that have been derived from their critical analysis.

### REPORT OF THE COMMITTEE ON HIGHWAYS.

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Highways, herewith Report five Resolutions.

The first is to authorize the paving of portions of Eighth street, petitions for which have been hitherto presented, and the Commissioner of the District in which they are located has reported that in each case a majority of the owners are in favor of the paving.

The second is to grade a portion of Adams Road in the Twenty-third Ward.

The third is to tramway two small streets in the Ninth and Twentieth Wards, and to give notice to owners on a part of Broad street, and on Canal street which has been made on the bed of Cohocksink Creek, to set the curb and pave the footways.

The fourth is to authorize the public sale of the two remaining spans of the Falls of Schuylkill Bridge, and of the toll house attached to the same.

And the fifth is to authorize the Department to give notice that a part of York street, in the Twenty-first Ward, will be opened for public use in three months from the serving of such notice.

All of which is respectfully submitted, by

#### RESOLUTIONS

To authorize the paving of a portion of Columbia Avenue in the Nineteenth Ward, and for other purposes.

1. *Resolved*, By the Select and Common Councils of the City of Philadelphia, That the Department of Highways is hereby authorized to pave the cartway of the following named streets, within the spaces specified, viz: Vineyard street from Nineteenth street to Ridge Avenue, in the Nineteenth Ward; Norris street from Girard Avenue to Duke street, in the Eighteenth Ward; Columbia Avenue from Third street to Germantown Road, Wilson street from Dauphin to York streets, Cedar street from Otis (late Wood,) street to Lehigh Avenue, Mascher street from Susquehanna Avenue to Cambria street, Huntingdon street from Second to Mascher streets, in the Nineteenth Ward; Bellevue street from Francis to Wylie streets in the Fifteenth Ward; and Cambridge street from Fifteenth to Sixteenth streets, in the Twentieth Ward; which paving shall be done by contract with a competent paver or pavers, who shall be selected by a majority of the owners

of property fronting on the said streets respectfully, one of the conditions of the said contracts shall be, that the contractor will collect the cost and expenses of the paving from the owners of property fronting on the streets paved, and the City shall be liable only for the intersections. *Provided*, That the City shall pay no greater price for paving the intersections, than is paid for the other portions of the said streets, and the water pipes shall be laid in the said streets before the paving is begun.

2. *Resolved*, That the Department of Highways is hereby authorized to do the grading necessary, in the several streets named in the foregoing Resolution, preparatory to the paving thereof, and also to grade the Adams Road from the Tacony Creek to the Kensington and Oxford Turnpike Road, in the Twenty-third Ward; and to expend therein a sum not exceeding five hundred dollars.

3. *Resolved*, That the Department of Highways is hereby authorized to re-pave Jones street from Eighteenth street to Nineteenth street, in the Ninth Ward; and Alder street from Girard Avenue to Poplar street, in the Twentieth Ward; the said re-paving to be done with tramway stone in the track of the wheels, and if the cartway of the said streets is wider than is necessary for the passage of one vehicle, the said Department is authorized to reduce the width thereof, taking an equal quantity from each side, and the said Department is hereby authorized to give notice to the owners of property on both sides of Broad street, between Columbia Avenue and Lancaster street, and of Canal street between Front street and Germantown Road, to set the curb and pave the footways in front of their respective properties.

4. *Resolved*, That the Department of Highways is hereby authorized to take down and sell at public sale on proper public notice, the materials in the two remaining spans of the Falls of Schuylkill Bridge, and also to sell in like manner the toll house of the said Bridge, to be removed within thirty days from the time of sale.

5. *Resolved*, That the Department of Highways is hereby authorized to give notice to the owners of property, through and over which York street from Broad street

to Islington Lane, in the Twenty-first Ward will pass, that at the expiration of three months from the service of such notice, the said York street within the space specified will be opened for public use, under the authority of the Act of Assembly, approved the seventh day of April, A. D. 1855.

### REPORT OF THE COMMITTEE ON SURVEYS AND REGULATIONS.

---

*To the President and Members of Select and  
Common Councils of the City of Philadelphia.*

GENTLEMEN:—Your Committee on Surveys and Regulations herewith present a Resolution relative to the allotment of contract for the construction of a culvert on Crammond, Market, and Margaretta streets, in the 24th Ward, as authorized by Ordinance of Councils, approved the 19th of March, 1860.

Your Committee having examined a schedule of the bills offered on the 16th inst., which were opened and recorded in the presence of the Committee of Highways and those offering proposals, find that John Fisher, being

the lowest, is entitled to the work, and therefore ask that the annexed Resolution may be adopted.

#### RESOLUTION

Relative to the contract for the construction of a Culvert in the 24th Ward.

*Resolved*, By the Select and Common Councils of the City of Philadelphia, That the City Solicitor be, and is hereby authorized and directed to prepare and have executed, a contract with Mr. John Fisher, for the construction of a branch culvert of four and one-half feet interior diameter, on the line of Crammond street, from the south side of Walnut street to Market street, thence on Market street westerly to Margaretta street, thence northerly on Margaretta street to a point where the natural water course crosses the line thereof; to be circular in form, with nine inch arch, as authorized by Ordinance of March 19, 1860, at the following prices, they being the lowest bids received on the 16th April, 1860, duly advertised for, viz:

For Brick Culvert, including timber, repairing,	
and excavation, per lineal feet,	- - \$1 87
Man-hole Shafts, including wrought and cast iron	
cover, each,	- - - 10 00
Cast Iron Inlets, with brick connections, each,	- 90 00

REPORT OF THE COMMITTEE ON SURVEYS AND REGULATIONS.

*To the President and Members of Select and  
Common Councils of the City of Philadelphia.*

GENTLEMEN:—Your Committee on Surveys and Regu-

lations, to whom was referred the Petition of property holders on the line of Story street, between 39th street and Culvert street, in the 24th Ward, asking that they may be relieved from the imperfections of the drainage of that immediate locality, beg leave to state that they are fully aware of the great importance of the short culvert asked for, as imperative for the health of the neighborhood, and believe that the cost thereof over and above the charge against the property holders, (which charge they have reason to believe will be cheerfully met.) can be provided out of an appropriation already made, as the great competition shown in the bids offered for the Market street culvert, has brought the cost of that work far below the estimate upon which the appropriation therefore was based. We therefore offer the annexed Ordinance and ask its adoption.

#### AN ORDINANCE

Authorizing the construction of a Culvert on Story street, 24th Ward.

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, That the Chief Commissioner of Highways be, and is hereby authorized and directed to construct a culvert four feet diameter on the line of Story street, from 39th street to Culvert street, in the 24th Ward, a distance of about 260 feet, with such inlets upon the line thereof as may be requisite for the proper drainage; to be constructed in accordance with plans and specifications to be prepared by the Department of Surveys.

SEC. II. The Chief Commissioner of Highways shall advertise three times in three daily newspapers, announcing that proposals will be received for the construction of said culvert, and shall allot the same to the lowest

bidder: *Provided*, the contract for the same shall specify that the sums assessed upon and chargeable to the properties lying upon the line thereof, (as authorized by Section 8 of the Supplement to Act of Consolidation, approved April 21, 1855, and in manner and form provided in Sections 3 and 4 of Ordinance, entitled, "An Ordinance to provide for the construction of Branch Culverts," approved November 11, 1858,) shall be received as so much cash paid on account thereof. The cost thereof, over and above the amount of assessment bills furnished, to be paid by warrants upon the City Treasurer, chargeable to an appropriation made for the construction of a culvert on Market street, in the 24th Ward, approved March 19th, 1860; said warrants to be drawn by the Chief Commissioner of Highways, upon estimates made out and certified to by the Chief Engineer and Surveyor.

*Provided*, That no allotment shall be made nor work commenced, until the property holders on the line thereof shall indemnify the City of Philadelphia to the amount of 75 cents per foot of building front thereon, nor until the Chief Commissioner of Highways shall ascertain that the residue of appropriation made for the construction of the Market street culvert aforesaid, after the completion thereof, will be sufficient to meet the estimates therefor.

SEC. III. That the unexpended portion of the appropriation made for the specific purpose of building a culvert on Crammond, Market, and Margaretta streets, in the 24th Ward, approved March 19th, 1860, after the completion of the same, is so far as may be requisite, hereby appropriated to and for the construction above authorizee.

### REPORT OF THE COMMITTEE ON SURVEYS AND REGULATIONS.

---

*To the President and Members of the Select and  
Common Councils of the City of Philadelphia.*

GENTLEMEN.—Your Committee on Surveys and Regula-

tions, to whom was referred the Petition of Messrs. D. & C. Kennedy, contractors for building the large culvert on 24th street, have closely examined the matter and the circumstances of the case, all of which they desire now to lay before Councils. They ask that a correction may be made in the list of prices upon which their current estimates are made out, and state that their proposal was intended to read \$3 10 per foot for culvert 8 feet in diameter, instead of \$2 10 as recorded, which if granted will add to the amount of their estimates, \$712 00.

Your Committee have examined the proposals as handed in, and upon which the contracts were executed, and find that the record is correct, but that there has evidently been an error on the part of the contractor, in transcribing the bid from his original document; it is evident, because his offered bid is for \$2 33 for an eight foot culvert with a *four inch* bottom, and only \$2 10 for the same diameter with a *nine inch* bottom, where there is at least 25 per cent. more bricks used. This is contrary to reason; and again, on examining his preposals for the same sized culvert, presented the *same date* for *other work*, we find his bids reading, \$2 33 for four inch bottom, and \$3 10 for nine inch bottom, where he was again a successful bidder.

Your Committee also find, by reference to the schedule of proposals made for that work, that of Messrs. Kennedy's bid had been recorded as intended by them, they would yet have been the lowest bidders by near \$1,000.

We therefore consider it as a matter of justice that the City should not permit a loss, where it is so palpably a mistake, particularly when the work in charge has been prosecuted with energy, and satisfactorily to all parties, and fully convinced ourselves that it is their just due, we offer the annexed Ordinance, and ask its adoption.

## AN ORDINANCE

Relative to the Contract for the 24th street Culvert.

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, That the Chief Engineer and Surveyor is hereby authorized and directed to correct an error in the contract of Messrs. D. & C. Kennedy, for the construction of the 24th street culvert, by inserting three dollars and ten cents, (\$3 10) per foot for culvert eight feet, (8 ft.) diameter, instead of two dollars and ten cents, (\$2 10) as now recorded.

## REPORT OF THE COMMITTEE ON CLAIMS.

---

*To the Common Council of the  
City of Philadelphia.*

GENTLEMEN :—The Committee on Claims, to whom was referred the claims of E. J. Megonegal, Jeremiah Brian, and John Roberts, respectfully Report, that they have duly considered the same, and find them to be just and correct.

The claim of E. J. Megonegal, is for services rendered to the City Commissioners in 1856, in preparing indices for and transcripts of the Assessor's lists of the Seventeenth and Nineteenth Wards, amounting to \$211 00.

This claim was approved by this Committee on two former occasions, and it was passed in Common Council, but as the Report of the Committee did not enter into the details of the claim, it was re-committed. The Committee now Report that the City Commissioners have certified that the claim is correct, and affidavits and other testimony has been submitted before them, showing that the work was done as charged by the claimant.

The claim of Jeremiah Brian is for damages sustained by him, in consequence of the falling of his horse and cart

into a trench dug in South Second street, for laying water pipes, some time in May last. The persons employed by the City in this work, did not put up proper guards in front of the trench, and the accident occurred from this neglect, at night. The horse died from the injuries received, and the cart and harness were also damaged. As the City is responsible for this damage, the Committee recommend that the sum of seventy-five dollars be allowed to the claimant, which is less than his demand.

The claim of John Roberts is for \$13 50 paid by him, as Town Clerk, in the township of Roxborough, in 1855-6, to the City Treasury, by mistake. The amount was due and payable by law to the Overseers of the Poor of the Township, and Mr. Roberts has been obliged to pay it over to them since.

The Committee, therefore, submit the annexed Bill, and ask that it may be passed.

#### AN ORDINANCE

To pay the Claims of J. Brian and John Roberts.

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, That the sum of eighty-eight dollars and fifty cents be, and the same is hereby appropriated to pay the following claims against the City, to wit:

1. To pay Jeremiah Brian, for damages sustained by him by the falling of his horse and cart into a trench dug in Second street, for laying water pipes, seventy-five dollars.

2. To pay John Roberts, Town Clerk of Roxborough, for fines paid into the City Treasury by him, in error, thirteen dollars and fifty cents.

SEC. II. That warrants for the above appropriations shall be drawn by the City Commissioners.

REPORT OF THE COMMITTEE ON PORT WARDENS, PUBLIC  
WHARVES, AND LANDINGS.

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Port Wardens, Public Wharves and Landings, respectfully Report in favor of rebuilding and extending the wharf at Lombard street, on the river Schuylkill. Your Committee is convinced that it is an absolute necessity that this landing should be re-built, and a culvert extended through it to carry off the dirt and rubbish which is now discharged into a dock belonging to a private individual, who is compelled at intervals to remove, at his own expense, the dirt thus accumulated, or lose the use of a portion of his property, this of itself, should be a sufficient motive to induce Councils to make the proposed improvement, but when it is considered that it is essentially requisite to the health of the neighborhood, that the filth from the streets should be carried to the current of the river, it becomes as before stated, a matter of actual necessity. The street, too, is giving way, and every rain washes a portion of it into the dock; the landing is and has been for some years, without a tenant, it is an unsightly place in its present condition, a manifest injury to the property and business around it.

This matter was last year brought to the notice of Councils, and a Resolution was passed, instructing the Commissioner of Market Houses to advertise for proposals for building said wharf, the Commissioner has complied with the Resolution, and Reports the lowest bid at \$3,600.

Your Committee believing this to be a very moderate price for the work, and having already an offer to rent the proposed wharf at an amount sufficient to pay the interest of the money to be invested, would earnestly urge upon

Councils the immediate adoption of the annexed Ordinance.

Respectfully,

FORT IHRIE, <i>Chairman</i> ,	JNO. P. WETHERILL,

AN ORDINANCE

To make an appropriation for the construction of a Wharf at Lombard street, on the river Schuylkill.

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, That the sum of three thousand six hundred dollars be, and the same is hereby appropriated to the Department of Public Wharves and Landings, for the construction of a wharf at Lombard street, on the river Schuylkill.

SECT. II. Warrants for said appropriation shall be drawn by the Commissioner of Market Houses, in conformity with existing Ordinances.

REPORT OF THE COMMITTEE ON FINANCE.

---

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Finance, have had under consideration the bill of Crissy & Markley, for printing 1,700 copies of the Digest of the Acts of Assembly, relative to the City of Philadelphia, as authorized by Ordi-

nance of Councils, approved March 2, 1859, (Ord. 1859, page 117,) which they have approved.

The Committee have also had before them, bills of expenses incurred in arranging and preparing a catalogue of the Library of Councils, and all the Documents remaining in the loft in the City Building, south-west corner of Fifth and Chesnut streets, formerly belonging to the old City Corporation and the several Districts, prior to Consolidation. This work was authorized by Joint Resolutions of Councils, (November 17, 1859, C. C. Journal, page 22.) A great quantity of very valuable records have been thus rescued from waste and destruction, and are now arranged in book-cases, and accessible to all the members of Councils.

The Committee Report the annexed Ordinance, and ask its adoption.

#### AN ORDINANCE

To make an appropriation to pay for the printing of the Digest of Acts of Assembly, and for the expenses of re-arranging the Library of Councils.

SECTION I. The Select and Common Councils of the City of Philadelphia, do Ordain, That the sum of twelve hundred and thirty-one dollars and fifteen cents be, and the same is hereby appropriated to pay the following claims:

1. To pay Crissy & Markley, for printing Digest of Acts of Assembly, seven hundred and sixty dollars and sixty-five cents.
2. To pay for re-arranging the Library of Councils, four hundred and seventy dollars and fifty cents.

SECTION II. Warrants for the payment of the above appropriations shall be drawn by the Clerks of Councils, in conformity with existing Ordinances.

## RESOLUTIONS.

To authorize the paving of Ellsworth street, in the First Ward and for other purposes.

*Resolved*, By the Select and Common Councils of the City of Philadelphia, That the Department of Highways is hereby authorized to pave the cartway of the following streets, within the spaces specified, viz:

Ellsworth street, from Broad to Fifteenth street; Fifteenth street, from Ellsworth to Federal street; and Tiernan street, from Ellsworth to Federal street, in the First Ward; and Hope street, from Jefferson to Berks (late Chatham) street, in the Seventeenth and Nineteenth Wards; which paving shall be done by a competent paver or pavers, who shall be selected by a majority of the owners of property fronting on the said streets, respectfully, and approved by the said Department; one of the conditions of the said contracts, shall be that the contractors will collect the cost and expenses of the paving from the owners of property

fronting on the street paved, and the City shall be liable only for the intersections. *Provided*, That the City shall pay no greater price for paving the intersections than is paid for paving the other portions of the said streets, and the water pipes shall be laid in said streets before the paving is begun.

*Resolved*, That the Department of Highways is hereby authorized to repave Emeline street, from Eighth westward to Ovington street, in the Fourth Ward; Porcelain street, from Twentieth to Twenty-first street, in the Eighth Ward; and Budden's alley, from Twelfth to Juniper street, in the Tenth Ward; said repaving to be done with tramway stone in the track of the wheels, and if the cartway is wider than is necessary for a single track, the same may be reduced in width, by taking an equal quantity of ground from each side.

## APPENDIX No. 163.

### REPORT OF MINORITY OF COMMITTEE ON HIGHWAYS.

---

*To the Select and Common Councils.  
of the City of Philadelphia :*

GENTLEMEN:—The undersigned, a minority of the Committee on Highways, &c., submit the following reasons why the Ordinance submitted to day by the majority of the Committee to make an appropriation to pay road damages, ought not to pass.

1. There has not been time to consider the Ordinance in Committee. The Ordinance to create the loan to pay road damages, passed Select Council on Thursday April 19th, and was signed by the Mayor on the 21st. The Ordinance now submitted was before the Committee for the first time on Monday April 23rd, when upon a single reading it was directed to be reported.

2. There has not been sufficient time to consider it properly in Committee, some of the items appropriated are for damages which the undersigned believe have been paid, there are some awards of damages of long standing which are not in the Ordinance.

3. The Act of Assembly, approved April 21, 1855, enjoins that, "It shall be the duty of Councils to institute an inquiry as to persons benefitted by the opening of any new street, and to withhold appropriation for the opening of the same, until the persons found to be benefitted shall have contributed according to the benefit to be derived therefrom, toward the damages awarded to the owners whose ground will be taken therefor," and the undersigned submit that this wise provision of law has been wholly disregarded, no such inquiry has been instituted in a single instance.

4. The amount proposed to be appropriated by the Ordinance, is about eighty thousand dollars, five thousand more than the loan, and already there has come to the knowledge of the undersigned, eight thousand eight hundred dollars, which is not included in the Ordinance.

5. In one item of the Ordinance, seven thousand five hundred dollars is appropriated for a property that has never been worth over one third of that sum, and in another item, wherein the property was benefitted by the opening or widening an appropriation is made to more than twice the cost of the whole property.

## APPENDIX No. 165.

### REPORT OF THE COMMITTEE ON GAS WORKS.

---

*To the Select and Common Councils  
of the City of Philadelphia.*

GENTLEMEN:—The Committee on Gas Works, to whom were referred the following Resolutions, viz:

*Resolved*, By the Select and Common Councils of the City of Philadelphia, That the Committee on Gas Works be instructed to inquire and report whether the manufacture of gas from any materials other than those now in use at the Philadelphia Gas Works, is practicable; and if so, whether such gas can be manufactured at a cheaper rate than is now charged, and if so, at what rate; and whether such gas gives an equal or greater degree of light than that manufactured from coal; and if thought practicable, what cost will be incurred in change of apparatus &c., and any other information relative to the subject, which they may deem important.

*Resolved*, That they be further instructed to inquire and report from what cause (if it can be ascertained,) the bills of consumers of gas have been of late, so largely increased; whether from defective meters, or from inferior quality of gas furnished, or from other causes.

*Resolved*, That the Committee be instructed to report at as early a day as convenient.

Respectfully Report, That having at the last meeting of Councils, reported in part, they now present the result of their farther deliberations on the subjects committed to them.

In pursuance of the first Resolution, they have examined into the details of the apparatus and processes used in producing three different kinds of gas.

The first is the gas obtained from the distillation of bituminous coals, in the manner now practised in most of the large gas works, in this and other countries.

The second is the gas obtained from the distillation of wood, in an apparatus in use in some European Cities, and also in certain towns in the Southern part of the United States, and which has been in constant use for several years past in part of the City Gas Works.

The third is the gas produced from distillation of rosin, or some other hydro-carbon, in conjunction with the vapor of water, and hence called "water gas," which has lately for some weeks, been manufactured at the Northern Liberties Gas Works.

These several processes, in actual operation, have been inspected by the Committee at the City Works, and it was made evident that each can produce illuminating gas of excellent quality, and that the choice between them must therefore depend on their relative economy, convenience, and certainty.

So far as the Committee have been able to ascertain, by an inspection of the carbonizing accounts, it appears, that, with the prices now prevailing here, for coal, wood, rosin, lime, iron and labor, the cost of the gas produced from wood is the lowest, and that from rosin and steam, the highest of the three kinds.

It may be well to observe here however, that in view of the present limited supply of a proper article of pine wood, it would, in the opinion of your Committee, be inexpedient to rely on this material for any considerable proportion of the gas required; and it should be further remarked that the difference in cost of the three methods of manufacture depends, in some degree, upon the price

of materials and labor, and does not seem to be so great that it might not be materially changed or even reversed in the future.

Your Committee have been in communication with parties interested in the process for making the Steam and Rosin Gas, who express great confidence in their ability to demonstrate its practicability and superior economy, and who, in proof of their own confidence in the process, have made a proposition to put their gas into the Gas Holders of the City Works, at a price, which no doubt seems exceedingly cheap to persons not practically familiar with the business of making and distributing gas, but is shown in the accounts of the Gas Works, to be not lower than the cost of coal gas, at the same stage of manufacture.

As the subject of cheapening the cost of gas light is of much interest to the whole community, all proper encouragement and careful examination should be given to every attempt to accomplish it, and your Committee have learned with pleasure, that the Trustees of the City Works, to whom properly belongs the consideration of such matters, have appointed a special Committee, with authority to make such investigation as will enable them to report fully upon the subject, and who are prepared to take immediate action in the premises.

Your Committee very much regret that the near expiration of the period of their official year will prevent further examination into this subject, which is one of vital importance to every citizen; but they cannot close this part of their report, without adding that in their opinion, no change could as yet be advantageously made in the materials for the manufacture of gas by the Philadelphia Gas Works.

In conclusion, your Committee offer the following Resolution, and ask its adoption.
